THE JOURNAL OF GENERAL MICROBIOLOGY

CUMULATIVE INDEX

1957-63

COVERING THE JOURNAL OF
GENERAL MICROBIOLOGY, VOLUMES 16–33 AND
THE SYMPOSIA OF THE
SOCIETY FOR GENERAL MICROBIOLOGY,
NUMBERS 7–13

CAMBRIDGE
PUBLISHED FOR THE SOCIETY FOR GENERAL MICROBIOLOGY
AT THE UNIVERSITY PRESS
1972

PUBLISHED BY THE CAMBRIDGE UNIVERSITY PRESS
Bentley House, 200 Euston Road, London NWI 2DB
American Branch: 32 East 57th Street, New York, N.Y. 10022

© THE SOCIETY FOR GENERAL MICROBIOLOGY 1972

Printed in Great Britain at the University Printing House, Cambridge

NOTE

The second cumulative index of the *Journal of General Microbiology* covers Volumes 16 to 33 (1957–1963) and the seven Symposia volumes which were published during the same years.

The subject index covers all ordinary papers and abstracts published in the Proceedings of the Society for General Microbiology. The Symposia are listed, with the full title of each contribution, but separate entries are not included. Entries in this index are in two forms:

1959, **20**, 704 refers to a paper published in the *Journal*.
1959, **20**, ii refers to an abstract in the Proceedings.

As in the first cumulative index, entries are listed under nouns wherever possible, with a few exceptions such as chemical substances, e.g. deoxyribonucleic acid.

The author index is strictly alphabetical, and there is an entry for each author of each paper mentioned, including in this case the papers published in the Symposia volumes. Where there are three or more authors, the second and subsequent authors are listed with the first author only:

Ada, G. L., French, E. L. & Lind, P. E.
French, E. L., *see* Ada, G. L.
Lind, P. E., *see* Ada, G. L.

LINDA PEERLESS
B. C. J. G. KNIGHT
A. F. B. STANDFAST

Published separately:

Microbial Ecology. 1957, *Symposium* **7**.
The Strategy of Chemotherapy. 1958, *Symposium* **8**.
Virus Growth and Variation. 1959, *Symposium* **9**.
Microbial Genetics. 1960, *Symposium* **10**.
Microbial Reaction to Environment. 1961, *Symposium* **11**.
Microbial Classification. 1962, *Symposium* **12**.
Symbiotic Associations. 1963, *Symposium* **13**.

Published as abstracts in the Proceedings of the Society:

Antibiotics: Structure and Function. 1963, **33**, i-vi.

Published as short papers in the Journal:

Plankton. 1957, **16**, 265–297.
Bacterial Lysis. 1958, **18**, 473–533.
Metabolic Activity and Bacterial Structure. 1962, **29**, 15–68.
Aspects of Cell-surface Adsorption Phenomena. 1963, **32**, 11–32.
Some Comparative Aspects of Intermediary Metabolism in Micro-organisms. 1963, **32**, 151–184.

No abstracts published:

Carbohydrate Metabolism. 1960, **23**, i-ii.
L Forms. 1960, **23**, ii.
Influence of Environment on Survival. 1960, **23**, ii.
Streptococci. 1960, **23**, iii.
Aspects of Microbial Survival. 1961, **24**, i-ii.

Index of Authors

* indicates title only, no abstract

AARONSON, S. & BENSKY, B. (1962). *O*-Methylthreonine, a new bleaching agent for *Euglena gracilis*. **27,** 75.

ABBOT, A., *see* ADA, G. L. (1958). Biological and physical properties of the Ryan strain of filamentous influenza virus. **19,** 23.

ABBOT, A., *see* ADA, G. L. (1961). Purification of Murray Valley encephalitis virus. **24,** 177.

ABBOT, A., *see* ADA, G. L. (1962). Particle counts and some chemical properties of Murray Valley encephalitis virus. **29,** 165.

ABBOT, A., *see* RODWELL, A. W. (1961). The function of glycerol, cholesterol and long-chain fatty acids in the nutrition of *Mycoplasma mycoides*. **25,** 201.

ABBOTT, B. C., *see* BALLANTINE, D. (1957). Toxic marine flagellates; their occurrence and physiological effects on animals. **16,** 274.

ABBOTT, V., *see* BARRY, G. T. (1962). Relationship of colominic acid (poly *N*-acetylneuraminic acid) to bacteria which contain neuraminic acid. **29,** 335.

ABBOTT, P. MCV., *see* HAWKER, L. E. (1963). Fine structure of vegetative hyphae of Rhizopus. **30,** 401.

ABBOTT, P. MCV., *see* HAWKER, L. E. (1963). Fine structure of the young vegetative hyphae of *Pythium debaryanum*. **31,** 491.

ABBOTT, P. MCV., *see* HAWKER, L. E. (1963). An electron microscope study of maturation and germination of sporangiospores of two species of *Rhizopus*. **32,** 295.

ABOU AKKADA, A. R. & BLACKBURN, T. H. (1963). Some observations on the nitrogen metabolism of rumen proteolytic bacteria. **31,** 461.

ABRAHAM, E. P., *see* BRIGGS, S. (1957). Some properties of Gram-negative bacilli obtained from a strain of *Staphylococcus aureus* in the presence of benzylpenicillin. **16,** 614.

ABRAHAM, E. P., *see* BRIGGS, S. (1959). Further observations on the relationships between Gram-negative rods and staphylococci grown in the presence of penicillin. **21,** 205.

ABRAHAM, E. P., *see* CRAWFORD, K. (1957). The synergistic action of cephalosporin C and benzylpenicillin against a penicillinase-producing strain of *Staphylococcus aureus*. **16,** 604.

ACHARYA, U. S., *see* PANICKER, R. K. (1962). The effect of amino acid on the uptake and utilization of tryptophan and other precursors of nicotinic acid by *Neurospora crassa*. **28,** 409.

ADA, G. L., ABBOT, A., ANDERSON, S. G. & COLLINS, F. D. (1962). Particle counts and some chemical properties of Murray Valley encephalitis virus. **29,** 165.

ADA, G. L., *see* ANDERSON, S. G. (1961). The action of phospholipase A and lipid solvents on Murray Valley encephalitis virus. **25,** 451.

ADA, G. L., ANDERSON, S. G. & ABBOT, A. (1961). Purification of Murray Valley encephalitis virus. **24,** 177.

ADA, G. L., *see* FRENCH, E. L. (1959). Stimulation of the production of neuraminidase in *Vibrio cholerae* cultures by *N*-acetylneuraminic acid and sialyl lactose. **21,** 550.

ADA, G. L. & FRENCH, E. L. (1959). Stimulation of the production of neuraminidase in *Vibrio cholerae* cultures by *N*-acetylmannosamine. **21,** 561.

ADA, G. L., FRENCH, E. L. & LIND, P. E. (1961). Purification and properties of neuraminidase from *Vibrio cholerae*. **24,** 409.

ADA, G. L., LIND, P. E. & LAVER, W. G. (1963). An immunological study of avian, viral and bacterial neuraminidase based on specific inhibition of enzyme by antibody. **32,** 225.

ADA, G. L. & PERRY, B. T. (1958). Properties of the nucleic acid of the Ryan strain of filamentous influenza virus. **19,** 40.

ADA, G. L., PERRY, B. T. & ABBOT, A. (1958). Biological and physical properties of the Ryan strain of filamentous influenza virus. **19,** 23.

ADAM, K. M. G. (1959). The growth of *Acanthamoeba* sp. in a chemically defined medium. **21,** 519.

ADAMS, J. N. (1963). Nuclear morphogenesis during the developmental cycles of some members of the genus *Nocardia*. **33,** 429.

ADAMS, J. N. & MCCLUNG, N. M. (1962). On the nature of cytoplasmic inclusions of *Nocardia rubra*. **28,** 231.

ADAMS, M. E. & POSTGATE, J. R. (1959). A new sulphate-reducing vibrio. **20,** 252.

ADAMS, M. E. & POSTGATE, J. R. (1961). On sporulation in sulphate-reducing bacteria. **24,** 291.

ADIGA, P. R., SIVARAMA SASTRY, K. & SARMA, P. S. (1962). Amino acid interrelationships in cysteine toxicity in *Neurospora crassa*. **29,** 149.

ADLER, H. I., *see* CROMROY, H. L. (1962). Influences of β-mercaptoethylamine and oxygen removal on the X-ray sensitivity of four strains of *Escherichia coli*. **28,** 431.

Index of Subjects

* indicates title only, no abstract

Aberrancy, hereditary, in growth of *Bacillus megaterium*. Iványovics & Nagy, 1958, **19,** 407.

Acanthamoeba sp. growth in a chemically defined medium. Adam, 1959, **21,** 519.

Acetate and ethanol oxidation by *Euglena gracilis*. Wilson & Danforth, 1958, **18,** 535.

Acetate assimilation by *Chlorobium thiosulphatophilum*. Gibson & Hoare, 1963, **31,** xxii.

Acetate, dissimilation of, methanogenesis in bovine rumen. Oppermann, Nelson & Brown, 1961, **25,** 103.

Acetate permeases of *Myobacterium smegmatis*. Ellard & Clarke, 1959, **21,** 338.

Acetate requirements of streptomycin-resistant *Staphylococcus*. Gardner & Lascelles, 1962, **29,** 157.

Acetic acid bacteria, DNA compositions of. De Ley & Schell, 1963, **33,** 243.

Acetic acid bacteria, lactate and pyruvate catabolism in. De Ley & Schell, 1962, **29,** 589.

Acetic acid bacteria, the infrared spectra of some. Scopes, 1962, **28,** 69.

Acetobacter acetigenum, celluloseless mutants of. Steel & Walker, 1957, **17,** 12.

Acetobacter acetigenum, production of cellulose in defined medium. Dudman, 1959, **21,** 327.

Acetobacter acidophilum, prov.sp. Wiame, Harpigny & Dothey, 1959, **20,** 165.

Acetobacter and gluconobacter, carbohydrate metabolism and phylogenetic relationship. De Ley, 1961, **24,** 31.

Acetobacter, cellulose production in submerged culture. Dudman, 1960, **22,** 25.

Acetobacter, formation of acetoin. De Ley, 1959, **21,** 352.

Acetobacter, metabolic patterns in. Cooksey & Rainbow, 1962, **27,** 135.

Acetobacter spp., comparative study of cellulose-producing cultures and celluloseless mutants of certain. Steel & Walker, 1957, **17,** 445.

Acetobacter spp., production of cellulose by. Dudman, 1959, **21,** 312.

Acetobacter strains, studies on antibacterial activity. Steel & Walker, 1958, **18,** 369.

Acetobacter xylinum var. *africanum*, celluloseless mutants of. Steel & Walker, 1957, **17,** 12.

Acetoin formation by Acetobacter. De Ley, 1959, **21,** 352.

Acetomonas and *Pseudomonas*, differentiation. Shimwell, Carr & Rhodes, 1960, **23,** 283.

N-Acetylmannosamine, stimulation of the production of neuraminidase in *Vibrio cholerae*. Ada & French, 1959, **21,** 561.

N-Acetylneuraminic acid isolation from *Citrobacter freundii* polysaccharide. Barry, Chen & Roark, 1963, **33,** 95.

N-Acetylneuraminic acid stimulation of the production of neuraminidase in *Vibrio cholerae*. French & Ada, 1959, **21,** 550.

Achromobacter eurydice habitat. Bailey, 1963, **31,** 147.

Achromobacter spp. on flatfish. Liston, 1957, **16,** 205.

Achromobacter sp., the metabolism of 2:4-D and MCPA by a strain of. Steenson & Walker, 1957, **16,** 146.

Acid, folic, in the synthesis of methione by *Escherichia coli*. Kisliuk & Woods, 1958, **18,** xv.

Acid, linoleic, on *Lactobacillus casei*, studies on the effect of. Kodicek, 1958, **18,** xiii.

Acids, long-chain fatty, in the nutrition of *Mycoplasma mycoides*. Rodwell & Abbot, 1961, **25,** 201.

Acriflavine, action on brewers' yeasts. Millbank & Hough, 1961, **25,** 191.

Acriflavine-resistant mutants of *Aspergillus nidulans*. Roper & Käfer, 1957, **16,** 660.

Actidione, effect on nucleic acid and protein synthesis in *Saccharomyces carlsbergensis*. Kerridge, 1958, **19,** 497.

Actidione on protein and nucleic acid synthesis in *Saccharomyces mandshuricus*. Kerridge, 1957, **16,** v.

Actidione resistance in Neurospora. Hsu, 1963, **32,** 341.

Actinomyces aureofaciens, recombination in. Alikhanian & Borisova, 1961, **26,** 19.

Actinomyces bovis, morphology, physiology and biochemistry. Pine, Howell & Watson, 1960, **23,** 403.

Actinomyces bovis 'sulphur granules,' structure and composition of. Pine & Overman, 1963, **32,** 209.

Actinomyces, cell-wall composition of, pathogenic. Cummins & Harris, 1959, **21,** ii.

Actinomyces, chemical composition and antigenic structure of cell walls of. Cummins, 1962, **28,** 35.

Actinomyces israelii, amino acid requirements in a chemically defined medium. Keir & Porteous, 1962, **28,** 193.

Actinomyces israelii, growth in simplified medium. Christie & Porteous, 1962, **28,** 443.

Actinomyces israelii, growth requirements of Wills strain. Christie & Porteous, 1962, **28,** 455.

Actinomyces israelii, method for obtaining uniform inocula. Christie & Porteous, 1960, **23,** 261.

Actinomyces propionicus, sp.nov., producing propionic acid. Buchanan & Pine, 1962, **28,** 305.

Actinomycetales, a new genus of. Lechevalier, Solotorovsky & McDurmont, 1961, **26,** 11.

Actinomycetales, a new genus of, *Microellobosporia* gen.nov. Cross, Lechevalier & Lechevalier, 1963, **31,** 421.

Actinomycetales, a new genus: *Waksmania* gen.nov. Lechevalier & Lechevalier, 1957, **17,** 104.

Actinomycetales and related groups, cell wall composition and taxonomy. Cummins & Harris, 1958, **18,** 173.

Actinomycete, an oral aerobic, *Nocardia salivae*. Davis & Freer, 1960, **23,** 163.

Actinomycetes, formation of a mixture of antibiotic substances by strains from soil. Vaněk, Doležilová & Řeháček, 1958, **18,** 649.

Actinomycetes in mouldy hay. Corbaz, Gregory & Lacey, 1963, **32,** 449.

Actinomycetes, lysogenic, and actinophages in nature. Welsch, 1957, **17,** x.

Actinomycins, structure and activity in. Gale, 1963, **33,** i.

Actinophage ϕ17, morphology of. Bacq & Horne, 1963, **32,** 131.
Actinophages and lysogenic actinomycetes in nature. Welsch, 1957, **17,** x.
Action of bacterial receptors on coliphage T3. Klemperer, 1957, **16,** 299.
Action of chemical disinfectants on bacteria in droplets compared with that in large volumes. Valentine, 1957, **17,** 474.
Action of sulphonamide drugs, biochemical mode of. Woods, 1962, **29,** 687.
Activation and thermostability of *Neurospora crassa* tyrosinase. Gest & Horowitz, 1958, **18,** 64.
Activation of one tobacco necrosis virus by another. Kassanis & Nixon, 1961, **25,** 459.
Activity in the actinomycins. Gale, 1963, **33,** i.
Activity, antibacterial, of certain strains of *Acetobacter*. Steel & Walker, 1958, **18,** 369.
Acytostelium leptosomum: a unique cellular slime mould with an acellular stalk. Raper & Quinlan, 1958, **18,** 16.
Adaptability to new environments in *Aspergillus glaucus*. Jinks, 1959, **20,** 223.
Adaptation in the bacterial oxidation of 2:4-dichloro- and 4-chloro-2-methylphenoxyacetic acid. Steenson & Walker, 1958, **18,** 692.
Adaptation, formation of bacteriochlorophyll by *Rhodopseudomonas spheroides*. Lascelles, 1959, **20,** iii.
Adaptive variation in the level of oxidative activity in *Saccharomyces cerevisae*. Strittmatter, 1957, **16,** 169.
Adenine independence in *Schizosaccharomyces pombe* and methionine effects. Clarke, 1963, **31,** 353.
Adenovirus, dose-response curves of toxic and infective actions of, in HeLa cell cultures. Pereira & Kelly, 1957, **17,** 517.
*Adenovirus, toxic action of. Pereira & Kelly, 1958, **18,** viii.
Adenovirus, type 5, infectivity titrations and particle counts. Pereira & Valentine, 1958, **19,** 178.
Adsorption, cause of bacterial cell wall. Rogers, 1963, **32,** 19.
Adsorption, haemagglutination as model of specific receptor. Belyavin, 1963, **32,** 15.
Adsorption of antibody on to tissue cells. Humphrey, 1963, **32,** 25.
Adsorption of herpes simplex virus in chorio-allantois. Watkins, 1960, **22,** 40.
Aeration, effect on the respiratory system of a pseudomonad in continuous culture. Rosenberger & Kogut, 1958, **18,** ii.
Aeration and growth rate on the respiratory and cytochrome system of a fluorescent pseudomonad grown in continuous culture. Rosenberger & Kogut, 1958, **19,** 228.
Aerobacter aerogenes, effect of chilling. Strange & Dark, 1962, **29,** 719.
Aerobacter aerogenes, isolation and composition of the nucleic acids of. Jones, Marsh & Rizvi, 1957, **17,** 586.
Aerobacter aerogenes mutants blocked in inorganic polyphosphate. Harold & Harold, 1963, **31,** 241.
Aerobacter aerogenes, preparation and properties of spheroplasts. Gebicki & James, 1960, **23,** 9.
Aerobacter aerogenes, stationary phase, survival in aqueous suspension. Strange, Dark & Ness, 1961, **25,** 61.
Aerobacter aerogenes, valine carboxyl group as a source of active formate in. Webb, 1958, **18,** xiv.
Aerobacter cloacae, an outline of the pattern of generation times. Powell, 1958, **18,** 382.
Aerobacter sp. in the excystment of *Schizopyrenus russelli*. Singh, Mathew & Anand, 1958, **19,** 104.
Aerobacter spp., the oxygen requirement of, determined by means of the continuous culture technique. Pirt, 1957, **16,** 59.
Aeromonas; a note on the genus. Stevenson, 1959, **21,** 366.
Aeromonas, classification of. Park, 1962, **27,** 121.
Aeromonas and *Serratia*, specificities of extracellular antigens. Liu, 1961, **24,** 145.
Aerospora of hospital wards. Noble & Clayton, 1963, **32,** 397.
Aetiology of fatal infections in partially resistant hosts and their application to mice challenged with *Salmonella paratyphi-B* or *S. typhimurium* by intraperitoneal injection. Meynell & Stocker, 1957, **16,** 38.
Agar gel diffusion techniques, identification of streptomycetes by. Cross & Spooner, 1963, **33,** 275.
Agar media, semi-solid, for rapid drug sensitivity tests on cultures of *Mycobacterium tuberculosis*. Knox & Woodroffe, 1957, **16,** 647.
Agar, myxobacteria, decomposing. Veldkamp, 1961, **26,** 331.
Agar, nutrient, inhibition of small inocula on the surface of. Taylor, 1957, **16,** ix.
Agar, semi-solid, effect of oxygen on growth of *Mycobacterium tuberculosis* in. Knox, Lister & Thomas, 1957, **17,** ix.
Agar, semi-solid, polarographic estimation of oxygen in. Penikett, 1957, **17,** ix.
Agar-diffusion method for titrating *Bacillus anthracis* immunizing antigen and its application to a study of antigen production. Thorne & Belton, 1957, **17,** 505.
Air-spora, summer, at Rothamsted in 1952. Gregory & Hirst, 1957, **17,** 135.
Alcohol formation, comparative aspects of. Dawes, 1963, **32,** 151.
Alga, blue-green, filament anastomosis in the developmental cycle. Lazaroff & Vishniac, 1962, **28,** 203.
Alga, blue-green, growth in laboratory of a red-pigmented marine. Pintner & Provasoli, 1958, **18,** 190.
Algae, blue-green, characteristics of, with uric acid as nitrogen source. van Baalen & Marler, 1963, **32,** 457.
Algae, blue-green, effects of extracts on pigment production by *Serratia marcescens*. Davidson, 1959, **20,** 605.
Algae, blue-green, effect of light on development. Lazaroff & Vishniac, 1961, **25,** 365.
Algae, marine unicellular, utilization of trace elements by. Spencer, 1957, **16,** 282.
Algae, relationships between metabolism and growth in plankton. Fogg, 1957, **16,** 294.
Algae, symbiosis of hydra with. Muscatine & Lenhoff, 1963, **32,** vi.
Alkali resistance in a pathogenic *Bacillus cereus*. Kushner & Lisson, 1959, **21,** 96.
Alkylation, effect on deoxyribonucleic acid. Strauss, 1963, **30,** 89.
Alysiella filiformis, characterization. Steed, 1962, **29,** 615.
Amidase produced by *Pseudomonas aeruginosa*. Kelly & Clarke, 1962, **27,** 305.

Amine, diazotizable, produced by yeast. Lones, Rainbow & Woodward, 1958, **19,** 146.
Amino acid accumulation in *Bacillus megaterium*. Marquis, 1963, **31,** xxv.
Amino acid-amino sugar-lipid complexes accumulating in the growth medium of an *Escherichia coli* mutant. Meadow, 1958, **18,** iii.
Amino acid, effect on nutrition of *Neurospora crassa*. Panicker, Shanmugasundaram & Acharya, 1962, **28,** 409.
Amino acid incorporation into Salmonella flagella. Kerridge, 1963, **33,** 63.
Amino acid interrelationships in cysteine toxicity in *Neurospora crassa*. Adiga, Sastry & Sarma, 1962, **29,** 149.
Amino acid metabolism of *Microsporum canis*. Chattaway, Toothill & Barlow, 1962, **28,** 721.
D-Amino acid oxidase of *Trigonopsis variabilis*. Senthe-Shanmuganathan & Nickerson, 1962, **27,** 465.
Amino acid, oxidases in aged suspensions of *Proteus* sp., change in activity of. Clarke, 1958, **18,** vi.
Amino acid requirements of *Actinomyces israelii*. Keir & Porteous, 1962, **28,** 193.
Amino acid requirements of *Haemophilus pertussis*. Jebb & Tomlinson, 1957, **17,** 59.
Amino acid requiring mutants of *Salmonella typhimurium*, synthesis of flagella by. Kerridge, 1959, **21,** 168.
Amino acids, effect on induction of L-phase. Michel & Hijmans, 1960, **23,** 35.
Amino acids, for formation of the reductive amination system in *Bacillus subtilis*. Shah & King, 1959, **20,** 78.
Amino acids, formation, by *Mycobacterium butyricum* growing in a chemically defined medium. Wright, 1959, **20,** 554.
Amino acids in the cell walls of *Streptococcus pyogenes*. Michel & Gooder, 1962, **29,** 199.
Amino acids, neutral, in *Proteus vulgaris*, decarboxylation of. Ekladius, King & Sutton, 1957, **17,** 602.
Amino acids of *Staphylococcus aureus*, release and analysis of. Hancock, 1958, **18,** v.
Amino acids on the growth of two varieties of *Ophiobolus graminis*. Turner, 1957, **16,** 531.
Amino acids, optical activity of, formed by reductive amination in *Bacillus subtilis*. Shah *et al.*, 1957, **17,** 620.
Amino acids, permeability of the envelopes of *Staphylococcus aureus* to. Mitchell & Moyle, 1959, **20,** 434.
Amino acids, sulphur-containing, uptake by yeast. Maw, 1963, **31,** 247.
Amino acids, uptake of, during the terminal bacteraemia in guinea pigs infected with *Bacillus anthracis*. Smith & Tempest, 1957, **17,** 731.
5-Aminoimidazole and its riboside from yeast. Woodward & Rainbow, 1961, **25,** 141.
Amino sugars, in cell walls of *Streptococcus pyogenes*. Michel & Gooder, 1962, **29,** 199.
Ammonia, alginate wool filters, for collecting micro-organisms from air. Hammond, 1958, **19,** 267.
Ammonia, influence of corn steep liquor to nitrite by *Nitrosomonas europaea*. Gundersen, 1958, **19,** 190.
Amoeba, free-living soil, nutritional and related studies. Band, 1959, **21,** 80.
Amoeba, stage of *Naegleria gruberi*, cultural, cytological and ecological observations. Chang, 1958, **18,** 565.
Ampicillin inactivation and sensitivity of coliform bacilli. Ayliffe, 1963, **30,** 339.
Ampicillin resistance in a strain of *Escherichia coli*. Smith, 1963, **30,** 299.
Anacystis montana, fine structure of cell boundary and photosynthetic lamellae of. Echlin, 1963, **32,** iv.
Anaerobic amylolytic coccus, characters of. Provost & Doestch, 1960, **22,** 259.
Anaerobiosis and dihydrostreptomycin, indirect evidence for two sites of action. Williamson, 1958, **19,** 584.
Anaerobiosis produced with chromous salts. Marshall, 1960, **22,** 645.
Ankistrodesmus spp., morphogenesis and polymorphism of. McMillan, 1957, **17,** 658.
Antagonism by *Staphylococcus aureus*. Barrow, 1963, **31,** 471.
Antarctica, yeasts from. di Menna, 1960, **23,** 295.
Anthrax, factors I and III of toxin. Stanley & Smith, 1961, **26,** 49.
Anthrax, purification of toxin factor III. Smith & Stanley, 1962, **29,** 517.
Anthrax toxin production *in vitro* of, previously recognized *in vivo*. Harris-Smith, Smith & Keppie, 1957, **16,** viii.
Anthrax toxin, purification of factors I and II. Stanley, Sargeant & Smith, 1960, **22,** 206.
Anthrax toxin, serological relationships with factors I and II. Stanley, Sargeant & Smith, 1960, **22,** 219.
Anthrax toxin, three factors of. Stanley & Smith, 1963, **31,** 329.
Antibiotic, chloramphenicol, effect on protein synthesis by *Shigella flexneri*. Yee, Pan & Gezon, 1962, **27,** 521.
Antibiotic, cycloheximide in morphology of *Saccharomyces pastorianus*. Gundersen & Wadstein, 1962, **28,** 325.
Antibiotic, fungistatic, produced by a streptomyces strain with evidence of an active water-excreting mechanism in fungi. Links, Rombouts & Keulen, 1957, **17,** 596.
Antibiotic, megacin formed by *Bacillus megaterium*. Holland, 1962, **29,** 603.
Antibiotic, mode of action of antifungal heptaene. Henis & Grossowicz, 1960, **23,** 345.
Antibiotic, new: Ramycin. van Dijck & De Somer, 1958, **18,** 377.
Antibiotic, produced by *Staphylococcus aureus* type 71. Barrow, 1963, **32,** 255.
Antibiotics, activities of different penicillins. Knox & Smith, 1962, **28,** 471.
Antibiotics, assay of cephalosporin C. Bond, Brimblecombe & Codner, 1962, **27,** 11.
Antibiotics, biochemical mode of action. Woods, 1962, **29,** 687.
Antibiotics, effect of streptogramin on *Staphylococcus aureus*. Vazquez, 1963, **31,** xvi.
*Antibiotics, effect on fixation of penicillin by sensitive bacteria. Reynolds, 1963, **31,** xxv.
Antibiotics, formation of mixtures by actinomycetes from soil. Vaněk, Doležilová & Řeháček, 1958, **18,** 649.
Antibiotics from *Aspergillus amstelodami*. Darling, Campbell & McArdle, 1963, **33,** 191.
Antibiotics from yeasts. MacWilliam, 1959, **21,** 410.
Antibiotics, inhibition of phage by streptomycin. Brock, Mosser & Peacher, 1963, **33,** 9.
*Antibiotics, inhibition zones in staphylococcal agar cultures. Cooper, Linton & Sehgal, 1958, **19,** ii.

Antibiotics, iron-containing, and growth factors. Keller-Schierlein, 1963, **33,** ii.
Antibiotics, iron-containing sideromycins. Burnham, 1963, **32,** 117.
Antibiotics, microbial antagonism by *Staphylococcus aureus*. Barrow, 1963, **31,** 471.
Antibiotics, mode of action of megacin. Ivánovics, Alföldi & Nagy, 1959, **21,** 51.
Antibiotics, pesticin biosynthesis. Hertman & Ben Gurion, 1959, **21,** 135.
Antibiotics, polyenic, production of, by soil streptomycetes. Ball, Bessell & Mortimer, 1957, **17,** 96.
Antibiotics, quaternary ammonium compounds. Cox & D'Arcy, 1959, **20,** i.
Antibiotics, relationship between RNA synthesis and induced lag. Brock & Brock, 1961, **26,** 393.
Antibiotics, relationship of yeasts. di Menna, 1962, **27,** 249.
Antibiotics, resistance, and changes in serological type of Lancefield group D streptococci in chickens receiving dietary chlortetracycline. Elliott & Barnes, 1959, **20,** 426.
Antibiotics, RNA synthesis and degradation during treatment. Brock & Brock, 1961, **26,** 393.
Antibiotics, sensitivity to and production by some bacteria. Stout, 1962, **27,** 209.
Antibiotics, the ostreogrycins, a family of synergistic. Lester Smith, 1963, **33,** iii.
Antibiotics which act as analogues of metabolites. McQuillen, 1963, **33,** v.
Antibody, adsorption on to tissue cells. Humphrey, 1963, **32,** 25.
Antibody, enzyme neuraminidase inhibited by. Ada, Lind & Laver, 1963, **32,** 225.
Antibodies, fluorescent, of *Paramecium aurelia*. Beale & Mott, 1962, **28,** 617.
Antibodies, fluorescent, studies on the identification of rumen bacteria with. Hobson & Mann, 1957, **16,** 463.
Antibodies, passive protection of mice against *Haemophilus pertussis*. Brown, 1958, **18,** 48.
Antibodies, relationship to cytoplasmic inclusions in *Trypanosoma lewisi*. Ormerod, 1959, **21,** 287.
Antigen, *Bacillus anthracis* immunizing, an agar-diffusion method for titrating, and its application to a study of antigen production. Thorne & Belton, 1957, **17,** 505.
Antigen, group D, in faecal streptococci, influence on growth medium. Medrek & Barnes, 1962, **28,** 701.
Antigen, group D, in *Streptococcus faecalis*. Shattock & Smith, 1963, **31,** iv.
Antigen, group F in streptococci. Ottens & Winkler, 1962, **28,** 181.
Antigen group location of streptococcus D. Jones & Shattock, 1960, **23,** 335.
Antigen, group-specific and cell-wall polysaccharide in L-phase variants of streptococci. Hijmans, 1962, **28,** 177.
Antigen in the cell walls of *Corynebacterium*, *Mycobacterium*, *Nocardia*, *Actinomyces* and *Arthrobacter*. Cummins, 1962, **28,** 35.
δ-Antigen of *Clostridium histolyticum*, cysteine inactivation. Oakley & Warrack, 1958, **18,** 9.
ε-Antigen of *Clostridium welchii*, fractionation on cellulose ion exchangers. Thompson, 1963, **31,** 79.
Antigen of *Streptococcus pyogenes* type 4, precipitation of. Hambly, 1958, **18,** 285.
Antigen, production by *Pasteurella pestis*, in continuous culture. Pirt, Thackeray & Harris-Smith, 1961, **25,** 119.
Antigen, reversion of transduced characters in *Salmonella typhimurium*. Spicer & Datta, 1959, **20,** 136.
Antigen, streptococcal group D, identity with teichoic acid. Wicken, Elliott & Baddiley, 1963, **31,** 231.
Antigenic variation in *Vibrio cholerae*, a study of. Bhaskaran & Gorrill, 1957, **16,** 721.
Antigenicity of three factors of anthrax toxin. Stanley & Smith, 1963, **31,** 329.
Antigens, bacterial spore. Norris, 1962, **28,** 393.
Antigens, complement-fixing, of trachoma and inclusion blennorrhoea. Reeve & Taverne, 1962, **27,** 501.
Antigens, criteria of purity. Stanley & Smith, 1961, **26,** 63.
Antigens, distinctions between moulds in Ouchterlony gel plates. Feinberg & Grayson, 1958, **18,** i.
Antigens, extracellular, specificities in genera *Aeromonas* and *Serratia*. Liu, 1961, **24,** 145.
Antigens, new, associated with flagellar variation in Salmonella. Taylor, Lee, Edwards & Ramsey, 1960, **23,** 583.
Antigens of *Paramecium aurelia* as studied with fluorescent antibodies. Beale & Mott, 1962, **28,** 617.
Antigens of *Paramecium aurelia*, immunological assay of immobilizing. Bishop, 1963, **30,** 271.
Antigens of *Paramecium aurelia* with the aid of fluorescent antibodies. Beale & Kacser, 1957, **17,** 68.
Antigens of *Pasteurella septica*. MacLennan & Rondle, 1957, **17,** vii.
Antigens of the Reiter treponeme. de Bruijn, 1963, **31,** iii.
Antigens of *Trypanosoma brucei*. Weitz, 1960, **23,** 589.
Antigens, rough somatic, composition and distribution of, in some Gram-negative bacteria. Davies, 1957, **17,** vi.
Antigens, soluble, characterization of rabies. Mead, 1962, **27,** 415.
Antigens, soluble, purification and concentration on calcium phosphate. Taverne, Marshall & Fulton, 1958, **19,** 451.
Antigens, soluble, purification of rabies. Mead, 1962, **27,** 397.
Antigens, somatic, serological specificities of *Pasteurella pseudotuberculosis*. Crumpton, Davies & Hutchison, 1958, **18,** 129.
Antigens, somatic, smooth and rough, of *Pasteurella pseudotuberculosis*. Davies, 1958, **18,** 118.
Antigens, specificity of staphylococcal coagulase in relation to bacteriophage group. Barber & Wildy, 1958, **18,** 92.
Antigens, studies of the immobilization of *Paramecium aurelia* variety 2. Finger, 1957, **16,** 350.
Antigens, trypanosomal, by immunofluorescence. Weitz, 1963, **32,** 145.
Antihistamines, protozoa as pharmacological tools. Sanders & Nathan, 1959, **21,** 264.
Antimicrobial agents, effects on ribonucleic acid polymerase. Waring, 1963, **33,** x.
Antrycide, action on nucleic acid synthesis in a trypanosomid flagellate. Newton, 1958, **19,** ii.
Apparatus, Coulter counter for micro-organisms. Curby, Swanton & Lind, 1963, **32,** 33.
Apparatus for the continuous culture of bacteria at constant population density. Perret, 1957, **16,** 250.

D-Arabitol production by *Debaryomyces subglobosus*. Anderson & Harris, 1963, **33,** 137.
Arginine, influence of, on the motility of a strain of *Pseudomonas* sp. Sherris, Preston & Shoesmith, 1957, **16,** 86.
Arginine, motility in *Pseudomonas* sp. activated by. Shoesmith & Sherris, 1960, **22,** 10.
Arginine synthesis in *Neurospora crassa*; genetic studies. Newmeyer, 1957, **16,** 449.
Arginine, test for rapid breakdown by bacteria. Sherris, Shoesmith, Parker & Breckon, 1959, **21,** 389.
Argininosuccinase, *Neurospora crassa* mutants lacking. Fincham & Boylen, 1957, **16,** 438.
Argininosuccinate, genes influencing conversion from citrulline. Newmeyer, 1962, **28,** 215.
Aromatic compounds, microbiological degradation of. Evans, 1963, **32,** 177.
Arthrobacter, carbohydrate catabolism. Zagallo & Wang, 1962, **29,** 389.
Arthrobacter, chemical composition and antigenic structure of cell walls of. Cummins, 1962, **28,** 35.
Arthrobacter globiformis, metabolism of. Morris, 1960, **22,** 564.
Arthrobacter species, glutamic acid producing. Veldkamp, 1963, **31,** viii.
Ascospores in discomycete *Dasyscyphus* sp. Moore & McAlear, 1962, **28,** 211.
Ascus collection in *Neurospora crassa*. Strickland & Thorpe, 1963, **33,** 409.
Ascus, rapid collection in Neurospora. Maling, 1960, **23,** 257.
Asparagine, effect on growth of Gram-positive coccus. Garvie, Gregory & Mabbitt, 1961, **24,** 25.
Aspergillus amstelodami, antibiotics from. Darling, Campbell & McArdle, 1963, **33,** 191.
Aspergillus glaucus, lethal suppressive cytoplasms in aged clones. Jinks, 1959, **21,** 397.
Aspergillus glaucus, selection for adaptability to new environments in. Jinks, 1959, **20,** 223.
Aspergillus, inoculum size and carbon metabolism in. Meyrath & McIntosh, 1963, **33,** 47.
Aspergillus nidulans, acriflavine-resistant mutants of. Roper & Käfer, 1957, **16,** 660.
Aspergillus nidulans conidia, changes occurring in the composition of, during germination. Shepherd, 1957, **16,** i.
Aspergillus nidulans, genetic analysis of carbohydrate utilization in. Roberts, 1963, **31,** 45.
Aspergillus nidulans, inhibitors of protein and nucleic acid synthesis in Shepherd, 1958, **18,** iv.
Aspergillus nidulans, metabolism of D-galactose in. Roberts, 1963, **31,** 285.
Aspergillus nidulans, oxidation of certain aromatic compounds by the conidia of. Shepherd & Villanueva, 1959, **20,** vii.
Aspergillus nidulans, replica plating technique for isolation of nutritionally exacting mutants of a filamentous fungus. Roberts, 1959, **20,** 540.
Aspergillus nidulans, sulphate assimilation in. Nakamura, 1962, **27,** 221.
Aspergillus niger, effect of quaternary ammonium compounds on citric acid and sterol synthesis in. Raman & Shanmugasundaram, 1963, **31,** 23.
Aspergillus niger mutant, effect of lipids on citric acid production. Millis, Trumpy & Palmer, 1963, **30,** 365.
Aspergillus niger, nutritional requirements for citric acid production. Trumpy & Millis, 1963, **30,** 381.
Aspergillus oryzae, effects of inoculum size in. McIntosh & Meyrath, 1963, **33,** viii.
Aspergillus oryzae, influence of media components on respiration of. Meyrath & McIntosh, 1963, **33,** viii.
Aspergillus oryzae, inoculum size and nitrogen metabolism in. McIntosh & Meyrath, 1963, **33,** 57.
Aspergillus oryzae, size of inoculum on metabolism of. McIntosh & Meyrath, 1963, **31,** vi.
Assay, biological, of cephalosporin C. Bond, Brimblecombe & Codner, 1962, **27,** 11.
Assay, chemical, of tetanus toxin receptor in nervous tissue. van Heyningen, 1959, **20,** 301.
Assay for thiamine, *Flavobacterium aquatile*. Weeks & Beck, 1960, **23,** 217.
Assay, immunological, of immobilizing antigens of *Paramecium aurelia*. Bishop, 1963, **30,** 271.
Assay of adenovirus type 5. Pereira & Valentine, 1958, **19,** 178.
Assay, of vitamin B_6 with *Saccharomyces carlsbergensis* 4228. Morris, Hughes & Mulder, 1959, **20,** 566.
Athiorhodaceae, the formation of isocitratase by. Kornberg & Lascelles, 1960, **23,** 511.
Atmosphere containing Nigrospora spores in Jamaican banana plantations. Meredith, 1961, **26,** 343.
Atmosphere, isolation of *Rhodotorula nitens* sp.nov. Mackenzie & Auret, 1963, **31,** 171.
Autolysis of *Bacillus subtilis*, studies on the mechanism of anaerobic. Kaufmann & Bauer, 1958, **18,** xi.
Autolytic release and osmotic properties of 'protoplasts' from *Staphylococcus aureus*. Mitchell & Moyle, 1957, **16,** 184.
Auxotrophs of *Penicillium chrysogenum*, isolation of. Macdonald, Hutchinson & Gillett, 1963, **33,** 365.
Auxotrophs, sulphur, examination of and a warning. Postgate, 1963, **30,** 481.
Auxotrophy and organic compounds in the nutrition of marine phytoplankton. Droop, 1957, **16,** 286.
Auxotrophy in *Escherichia coli*, dose-mutation relationships in ultraviolet-induced reversion from. Hill, 1963, **30,** 281.
Auxotrophy in *Escherichia coli*, stability of spontaneous and ultra-violet-induced reversions from. Hill, 1963, **30,** 289.
Avery, Oswald Theodore; obituary notice. MacLeod, 1957, **17,** 539.
Avirulent strain of *Mycobacterium tuberculosis*, production of virulence in, by certain non-ionic surface-active agents. Hart & Rees, 1957, **16,** vii.
Azotobacter bacteriophages, isolation and classification. Duff & Wyss, 1961, **24,** 273.
Azotobacter chroococcum, production of Gram-positive variants by. Bisset *et al.*, 1957, **16,** 572.
Azotobacter, species distinguished by dyes. Callao & Montoya, 1960, **22,** 657.
Azotobacter spp. hydrogenase activity and nitrogen fixation. Nicholas, Fisher, Redmond & Wright, 1960, **22,** 191.
Azurin: a copper protein found in Bordetella. Sutherland & Wilkinson, 1963, **30,** 105.

Bacilli, Gram-negative, obtained from a strain of *Staphylococcus aureus* in the presence of benzylpenicillin. Briggs *et al.*, 1957, **16,** 614.
Bacillus anthracis, factors I and III of toxin. Stanley & Smith, 1961, **26,** 49.
Bacillus anthracis, immunizing antigen, agar-diffusion method for titrating, and its application to a study of antigen production. Thorne & Belton, 1957, **17,** 505.
Bacillus anthracis lysogenic with mutants of phage W, the pathogenicity of. Ivánovics, 1962, **28,** 87.
Bacillus anthracis, rapid identification by bacteriophage lysis. Chadwick, 1959, **21,** 631.
Bacillus anthracis, reverting and non-reverting rough variants of. Meynell, 1963, **32,** 55.
Bacillus anthracis, toxin production. Harris-Smith, Smith & Keppie, 1957, **16,** viii.
Bacillus anthracis, toxin production *in vitro*. Harris-Smith, Smith & Keppie, 1958, **19,** 91.
Bacillus anthracis, uptake of amino acids during the terminal bacteraemia in guinea pigs infected with. Smith & Tempest, 1957, **17,** 731.
Bacillus cereus, a bacteriolytic principle associated with cultures of. Norris, 1957, **16,** 1.
Bacillus cereus, alkali resistance in a strain pathogenic for the larch sawfly. Kushner & Lisson, 1959, **21,** 96.
Bacillus cereus, bacteriophage morphology. Dawson, Smillie & Norris, 1962, **28,** 517.
Bacillus cereus, bacteriophages of. Norris, 1961, **26,** 167.
Bacillus cereus, cell-bound penicillinase in protoplasts of. Sheinin, 1959, **21,** 124.
Bacillus cereus electron microscope study of sporulation and protein crystal formation. Norris & Watson, 1960, **22,** 744.
Bacillus cereus, germination of endospores under alkaline conditions. Chislett & Kushner, 1961, **25,** 151.
Bacillus cereus, poly-β-hydroxybutyrate metabolism. Macrae & Wilkinson, 1958, **19,** 210.
Bacillus cereus, rate of growth between divisions. Collins & Richmond, 1962, **28,** 15.
Bacillus cereus, refractive index measurements on spores and vegetative cells of strains of. Ross & Billing, 1957, **16,** 418.
Bacillus cereus, sonic disruption of spores. Berger & Marr, 1960, **22,** 147.
Bacillus cereus, swarmers of. Bisset & Hale, 1963, **31,** 281.
Bacillus, characters of a group of Bacillus phages. Meynell, 1962, **28,** 103.
Bacillus circulans, a strain capable of growing under alkaline conditions. Chislett & Kushner, 1961, **24,** 187.
Bacillus circulans, germination of endospores under alkaline conditions. Chislett & Kushner, 1961, **25,** 151.
Bacillus, genus, electron microscope study of the spores of some species of, using carbon replicas. Bradley & Williams, 1957, **17,** 75.
Bacillus larvae, cultivation and growth. Bailey & Lee, 1962, **29,** 711.
Bacillus megaterium, amino acid accumulation in. Marquis, 1963, **31,** xxv.
Bacillus megaterium, bacteriocinogenesis in. Ivánovics & Alföldi, 1957, **16,** 522.
Bacillus megaterium, cell structure and Gram staining of. Scherrer, 1963, **31,** 135.
Bacillus megaterium, infrared absorption spectrum. Norris & Greenstreet, 1958, **19,** 566.
Bacillus megaterium, megacin, a bacteriocin formed by. Holland, 1962, **29,** 603.
Bacillus megaterium, normal and filamentous, observations upon the growing points in. Pontieri & Schiano, 1958, **18,** 607.
Bacillus megaterium, oxidative activities during inhibition by streptomycin. Hancock, 1961, **25,** 429.
Bacillus megaterium, poly-β-hydroxybutyrate metabolism. Macrae & Wilkinson, 1958, **19,** 210.
Bacillus megaterium, refractive index measurements on spores and vegetative cells of strains. Ross & Billing, 1957, **16,** 418.
Bacillus megaterium, specific exosporium reaction. Tomcsik & Baumann-Grace, 1959, **21,** 666.
Bacillus megaterium, strain M, localization of enzymes in. Weibull, Beckman & Bergström, 1959, **20,** 519.
Bacillus megaterium strains, hereditary aberrancy growth. Ivánovics & Nagy, 1958, **19,** 407.
Bacillus megaterium, surface structure and serological typing of. Baumann-Grace & Tomcsik, 1957, **17,** 227.
Bacillus megaterium, transmission of megacinogenic factors in. Holland & Roberts, 1963, **31,** xi.
Bacillus megaterium uptake of ^{14}C-streptomycin. Hancock, 1962, **28,** 503.
Bacillus phage W, lysogenicity and immunity to. McCloy, 1958, **18,** 198.
Bacillus, protein synthesis in a thermophilic. Hancock, 1957, **16,** v.
Bacillus spp., cell wall lytic enzyme associated with spores of. Strange & Dark, 1957, **16,** 236.
Bacillus species, cell-wall lytic enzymes at sporulation and spore germination in. Strange & Dark, 1957, **17,** 525.
Bacillus spp., haemolytic material from. Williams, 1957, **16,** 16.
Bacillus spp. isolation and estimation of poly-β-hydroxybutyrate inclusions. Williamson & Wilkinson, 1958, **19,** 198.
Bacillus subtilis, amino acid requirements for formation of the reductive amination system. Shah & King, 1959, **20,** 78.
Bacillus subtilis, composition of the spore wall and cell wall. Salton & Marshall, 1959, **21,** 415.
Bacillus subtilis, formation of lysozyme by a strain of. Richmond, 1958, **18,** xii.
Bacillus subtilis, location of cell-bound penicillinase in. Kushner & Pollock, 1961, **26,** 255.
Bacillus subtilis, measurement of liberation of penicillinase from. Pollock, 1961, **26,** 239.
Bacillus subtilis, mechanism of liberation of penicillinase from. Pollock, 1961, **26,** 267.
Bacillus subtilis mutant, recovery of alkylated DNA. Strauss, 1963, **30,** 89.
Bacillus subtilis, optical activity of amino acids formed by reductive amination in. Shah *et al.*, 1957, **17,** 620.
Bacillus subtilis penicillinase, an immunological study of. Kushner, 1960, **23,** 381.
Bacillus subtilis phages. Takahashi, 1963, **31,** 211.
Bacillus subtilis, pH value at the surface of. Weiss, 1963, **32,** 331.
Bacillus subtilis, studies on the mechanism of the 'anaerobic autolysis' of. Kaufmann & Bauer, 1958, **18,** xi.
Bacillus thuringiensis, crystalline protein inclusions in. Monro, 1959, **21,** iv.

Bacitracin, mechanisms of antibacterial action of. Smith & Weinberg, 1962, **28,** 559.
Bacteria, action of chemical disinfectants on, in droplets compared with that in large volumes. Valentine, 1957, **17,** 474.
Bacteria, anaerobic cellulose-decomposing, isolated from soil. Skinner, 1960, **22,** 539.
Bacteria associated with leguminosae of South-Western Australia. Lange, 1961, **26,** 351.
Bacteria containing neuraminic acid, relationship of colominic acid (poly *N*-acetylneuraminic acid). Barry, Abbott & Tsai, 1962, **29,** 335.
Bacteria, detection of gas production from glucose by heterofermentative lactic acid. Hayward, 1957, **16,** 9.
Bacteria, differentiation and classification of, by paper partition chromatography. Mattick *et al.*, 1957, **17,** iii.
Bacteria, dividing, distribution of flagella in. Bisset & Pease, 1957, **16,** 382.
Bacteria, glycerol-fermenting and lipolytic, from sheep rumen. Hobson & Mann, 1961, **25,** 227.
Bacteria, Gram-negative, composition and distribution of rough somatic antigens in. Davies, 1957, **17,** vi.
Bacteria, Gram-negative, lysis by serum. Rowley & Wardlaw, 1958, **18,** 529.
Bacteria, Gram-positive and Gram-negative, phosphorus-containing compounds in relation to the Gram stain. Jones, Rizvi & Stacey, 1958, **18,** 597.
Bacteria, Gram-positive, turbidity changes in suspensions of, in relation to osmotic pressure. Kuczynski-Halmann, Avi-Dor & Mager, 1958, **18,** 364.
Bacteria, infectious drug-resistance in. Datta, 1963, **33,** xi.
Bacteria, lactic acid, nutrition of, isolated from the rumen. Ford, Perry & Briggs, 1958, **18,** 273.
Bacteria, lysogenic, defective, mechanism of lysis by phage studied with. Jacob & Fuerst, 1958, **18,** 518.
Bacteria, marine, mineral requirements. Tyler, Bielling & Pratt, 1960, **23,** 153.
Bacteria, non-halophilic, sodium and potassium content in relation to salt tolerance. Christian & Waltho, 1961, **25,** 97.
Bacteria, origin of the charge carried by. Gittens & James, 1963, **31,** i.
Bacteria, planktonic. Collins, 1957, **16,** 268.
Bacteria, proteolytic, isolated from sheep rumen. Blackburn & Hobson, 1962, **29,** 69.
Bacteria, rumen, studies on the identification of, with fluorescent antibodies. Hobson & Mann, 1957, **16,** 463.
Bacteria, starved, survival of. Postgate & Hunter, 1962, **29,** 233.
Bacterial classification, prejudice in. Sneath, 1957, **17,** ii.
Bacterial classification, some thoughts on. Sneath, 1957, **17,** 184.
Bacterial lysozyme. Richmond, 1957, **16,** iv.
Bacterial types on flatfish, occurrence and distribution of. Liston, 1957, **16,** 205.
Bacteriochlorophyll, adaptive formation of, by *Rhodopseudomonas spheroides*. Lascelles, 1959, **20,** iii.
Bacteriochlorophyll formation in *Rhodopseudomonas spheroides*. Lascelles, 1960, **23,** 487.
Bacteriochlorophyll synthesis in *Rhodopseudomonas spheroides*. Bull & Lascelles, 1962, **28,** iv.
Bacteriocin-like material produced by *Pasteurella pestis*. Ben-Gurion & Hertman, 1958, **19,** 289.
Bacteriocinogenesis in *Bacillus megaterium*. Ivánovics & Alföldi, 1957, **16,** 522.
Bacteriolysis by cysteamine and its derivatives, induction. Weinberg, Saz & Pilgren, 1958, **19,** 419.
Bacteriolytic principle associated with cultures of *Bacillus cereus*. Norris, 1957, **16,** 1.
Bacteriophage, *see also* phage.
Bacteriophage, adsorption to kaolin and bacteria. Fildes & Kay, 1963, **30,** 183.
Bacteriophage, *Bacillus cereus* morphology. Dawson, Smillie & Norris, 1962, **28,** 517.
Bacteriophage carrier state of *Shigella dysenteriae*. Li, Barksdale & Garmise, 1961, **24,** 355.
Bacteriophage, development of phage 'populations'. Mayr-Harting, 1959, **21,** v.
Bacteriophage from *Mycobacterium phlei*, action of chromogenic acid-fast. Mankiewicz, 1961, **24,** 63.
Bacteriophage group, antigenic specificity of staphylococcal coagulase in relation to. Barber & Wildy, 1958, **18,** 92.
Bacteriophage induction phenomena in Q1(A) strains of *Salmonella typhimurium*. Boyd & Bidwell, 1959, **21,** 635.
Bacteriophage-infected staphylococci, appearance of virolysin in. Ralston, Baer, Lieberman & Kreuger, 1961, **24,** 313.
Bacteriophage, infection of *Escherichia coli* with lambda phage and the establishment of lysogeny. Fry, 1959, **21,** 676.
Bacteriophage inhibition by streptomycin. Brock, Mosser & Peacher, 1963, **33,** 9.
Bacteriophage, lysis on solid medium. Mayr-Harting, 1958, **18,** x.
Bacteriophage lysis used for rapid identification of *Bacillus anthracis*. Chadwick, 1959, **21,** 631.
Bacteriophage, lysogenic strains of *Salmonella typhimurium*. Boyd & Bidwell, 1962, **29,** 659.
Bacteriophage, lytic to Mycobacteria by soil-enrichment, isolation of. Coster & Schuitemaker, 1963, **31,** xi.
Bacteriophage, 'marine,' thermal inactivation of. Spencer, 1957, **16,** vi.
Bacteriophage multiplication and toxin production in *Corynebacterium diphtheriae*. Barksdale, 1958, **18,** x.
Bacteriophage, nascent, lysis of streptococci, active agent in. Maxted, 1957, **16,** 584.
Bacteriophage of *Escherichia coli* structure. Bradley, 1963, **31,** 435.
Bacteriophage, phages of *Bacillus* characters of a group. Meynell, 1962, **28,** 103.
Bacteriophage reproduction in synchronized cultures of *Escherichia coli*. Stárka, 1962, **29,** 83.
Bacteriophage, Salmonella, role of magnesium ions in growth. Tucker, 1961, **26,** 313.
Bacteriophage sensitivity in *Xanthomonas malvacearum*. Hayward, 1963, **33,** viii.
Bacteriophage sensitivity, possible example of geographical variation in. Spencer, 1957, **17,** xi.
Bacteriophage, temperate, of *Salmonella typhimurium*. Boyd & Bidwell, 1961, **26,** 443.
Bacteriophage, the effect of infection with, on the electrokinetic potential of *Rhizobium leguminosarum*. Kleczkowski & Kleczkowski, 1959, **21,** 308.
Bacteriophage, the pathogenicity of lysogenic *Bacillus anthracis*. Ivánovics, 1962, **28,** 87.

Bacteriophage used for estimating the division rate of infecting bacteria in animals. Meynell, 1959, **21,** 421.
Bacteriophage, Vi typing scheme for *Salmonella typhi*. Bernstein & Wilson, 1963, **32,** 349.
Bacteriophage, virulent, biochemical parallels between lysis by, and lysis by penicillin. Weidel & Primosigh, 1958, **18,** 513.
Bacteriophage ϕR, effect of metal ions and polyamines on development of. Tucker, 1963, **32,** 287.
Bacteriophage ϕR, nucleic acid composition of. Kay, 1962, **27,** 201.
Bacteriophage ϕR, structure of. Kay & Bradley, 1962, **27,** 195.
Bacteriophage $\phi\chi$, attacking motile bacteria. Meynell, 1961, **25,** 253.
Bacteriophage T2, for *Escherichia coli*, three star mutants of. McFall & Stent, 1958, **18,** 346.
Bacteriophage T2, properties of a star mutant of. Symonds, 1958, **18,** 330.
Bacteriophage T2r$^+$, inhibition of enzyme formation following infection of *Escherichia coli*. Levin & Burton, 1961, **25,** 307.
Bacteriophage T5, metabolism of DNA in *Escherichia coli* infected with. Crawford, 1958, **19,** iii.
Bacteriophage W, bacillus, lysogenicity and immunity to. McCloy, 1958, **18,** 198.
Bacteriophage 42D, a pure preparation of the staphylococcal typing. Huybers & Jennings, 1957, **17,** 112.
Bacteriophages, A, of *Salmonella typhimurium*, lysogenic conversion. Stocker, 1958, **18,** ix.
Bacteriophages, azotobacter, isolation and classification. Duff & Wyss, 1961, **24,** 273.
Bacteriophages, changes in phage-typing pattern in Staphylococci. Rountree & Asheshov, 1961, **26,** 111.
Bacteriophages, colicins, colicinogenic factors and their relations to. Fredericq, 1958, **18,** 527.
Bacteriophages, fine structure. Bradley & Kay, 1960, **23,** 553.
Bacteriophages from city effluents. Kay & Fildes. 1962, **27,** 143.
Bacteriophages from *Listeria monocytogenes*. Sword & Pickett, 1961, **25,** 241.
Bacteriophages, lactobacillus, characterization of. de Klerk, Coetzee & Theron, 1963, **32,** 61.
Bacteriophages of *Bacillus cereus*. Norris, 1961, **26,** 167.
Bacteriophages of *Clostridium perfringens*. Williams Smith, 1959, **21,** 622.
Bacteriophages of insect pathogens of *Bacillus cereus*. Norris, 1961, **26,** 167.
Bacteriophages of *P. rettgeri* and *P. hauseri* host-range. Coetzee, 1963, **31,** 219.
Bacteriophages, type A, of *Salmonella typhimurium*: identification by a standardized cross-immunity test. Boyd & Bidwell, 1957, **16,** 217.
'Bacterium eurydice,' habitat of. Bailey, 1963, **31,** 147.
'Bacterium eurydice', observations on. Bailey, 1957, **17,** 39.
Bacterium, iron-oxidizing, isolation and character. Beck & Elsden, 1958, **19,** i.
'Bacterium lactis aerogenes', alleged rapid adaptation to proflavine resistance in. Sinai & Yudkin, 1959, **20,** 373.
Bacterium, rumen, physiological factors in the production of an iodophilic polysaccharide from pentose by a sheep. Doetsch *et al.*, 1957, **16,** 156.
'Bacterium salmonicida,' classification of. Smith, 1963, **33,** 263.
Bacteroides amylogenes n.sp. isolation of an iodophilic polysaccharide from the rumen of a sheep. Doetsch *et al.*, 1957, **16,** 156.
Bacteroids of soybean root nodules. Bergersen, 1958, **19,** 312.
Beet ringspot, potato bouquet and tomato black ring viruses, relationship between. Harrison, 1958, **18,** 450.
Benzylpenicillin, Gram-negative bacilli obtained from a strain of *Staphylococcus aureus* in the presence of. Briggs *et al.*, 1957, **16,** 614.
Benzylpenicillin, synergistic action of, against a penicillinase-producing strain of *Staphylococcus aureus*. Crawford & Abraham, 1957, **16,** 604.
Bile salts, Teepol in substitution for. Jameson & Emberley, 1958, **18,** 238.
Biochemical activity of micro-organisms isolated from the world ocean. Kriss, Mishustina & Zemtsova, 1962, **29,** 221.
Biochemistry and morphology of 'atypical' mycobacteria. Csillag, 1961, **24,** 261.
Biochemistry of Gram-negative rods. Steel & Midgley, 1962, **29,** 171.
Biochemistry of low maximum temperature in cryptococcus. Hagen & Rose, 1962, **27,** 89.
Biochemistry of moulding of hay. Gregory, Lacey, Festenstein & Skinner, 1963, **33,** 147.
Biochemistry of the agent of 'mouse-scrapie.' Hunter, 1963, **31,** xv.
Biosynthesis of a disaccharide from pneumococci. Smith & Mills, 1963, **33,** 255.
Biosynthesis, pyocyanine, by *Pseudomonas aeruginosa*. Grossowicz, Hayat & Halpern, 1957, **16,** 576.
Biotin deficiency, effect on ornithine carbamoyl transferase in *Saccharomyces cerevisiae*. Dixon & Rose, 1963, **31,** vii.
Biotin deficiency, osmotic behaviour of *Saccharomyces cerevisiae* affected by. Rose, 1963, **31,** 151.
Biotin-deficient, excretion of nicotinic acid by *Saccharomyces cerevisiae*. Rose, 1960, **23,** 143.
Biotin, effect of deficiency on synthesis by *Saccharomyces cerevisiae*. Ahmad, Rose & Garg, 1961, **24,** 69.
Biotin effect to sparing on growth by deficient *Saccharomyces cerevisiae*. Ahmad & Rose, 1962, **28,** 147.
Blastocladiella emersonii, effect of nucleic acid synthesis. Cantino & Turian, 1959, **21,** 721.
Blastocladiella emersonii, light-stimulated polysaccharide and protein synthesis. Goldstein & Cantino, 1962, **28,** 689.
Blastocladiella emersonii, mitochondrion in germination of spore. Cantino, Lovett, Leak & Lythgoe, 1963, **31,** 39.
Blastocladiella, reversible, bicarbonate-induced enzyme activity during morphogenesis. Lovett & Cantino, 1961, **24,** 87.
Blue-green algae, nature and distribution of carotenoids in. Goodwin, 1957, **17,** 467.
Bordet, Jules; obituary notice. Beumer, 1962, **29,** 1.
Bordetella. A copper protein, azurin, found in. Sutherland & Wilkinson, 1963, **30,** 105.
Bordetella pertussis, cultivation of. Holt, 1962, **27,** 323.
Bordetella pertussis, intracranial infection of mice. Berenbaum, Ungar & Stevens, 1960, **22,** 313.
Bordetella pertussis, some factors affecting growth of. Rowatt, 1957, **17,** 279.

Bordetella pertussis strains, growth idiosyncrasies of, and intracerebral virulence of these strains in mice. Brown, 1959, **20,** 532.
Bordetella pertussis, the growth of: a review. Rowatt, 1957, **17,** 297.
Botrytis cinerea, germination of conidia. Hawker & Hendy, 1963, **33,** 43.
Botrytis fabae, effects of ultraviolet radiation on the pathogenicity of. Buxton, Last & Nour, 1957, **16,** 764.
Bovine caecum, yeasts from. van Uden & Carmo Sousa, 1957, **16,** 385.
Breakdown, aerobic, of uric acid by certain pseudomonads. Bachrach, 1957, **17,** 1.
Breakdown and synthesis of poly-β-hydroxybutyric acid by bacteria. Hayward, Forsyth & Roberts, 1959, **20,** 510.
Breakdown of 2:4-dichloro- and 4-chloro-2-methylphenoxyacetic acid by bacteria. Steenson & Walker, 1957, **16,** 146.
5-Bromouracil in the DNA of *Escherichia coli*, ultraviolet irradiation of. Greer, 1960, **22,** 618.
Brucella abortus, effect of erythritol on growth. Williams, Keppie & Smith, 1963, **31,** xxiii.
Brucella abortus, metabolism of erythritol by. Anderson & Smith, 1963, **31,** xxiii.
Brucella abortus strain 19, growth of, in aerated dialysed media. Sterne, 1958, **18,** 747.
Brucella abortus strain 19 vaccine, keeping quality of freeze-dried. van Drimmelen & Steyn, 1958, **19,** 324.
Brucella, cultures, examination for lysis by phage. Morgan, 1963, **30,** 437.
Brucella, thionin blue sensitivity test in examination. Morgan, 1961, **25,** 135.
'Bulging factor,' a fungistatic antibiotic produced by a streptomyces strain with evidence of an active water-excreting mechanism in fungi. Links, Rombouts & Keulen, 1957, **17,** 596.

Caecum, bovine, yeasts from. van Uden & Carmo Sousa, 1957, **16,** 385.
^{137}Caesium and ^{60}cobalt in fungi, translocation of. Grossbard & Stranks, 1959, **20,** iv.
Caffeine, in saccharomyces, gene controlled resistance against sensitivity to. Lindegren, Lindegren & Desborough, 1959, **20,** 504.
Calcium in cell wall of *Rhizobium trifolii*. Humphrey & Vincent, 1962, **29,** 557.
Calcium, influence on growth of Rhizobium. Vincent, 1962, **28,** 653.
Calves, development in rumen population. Eadie, 1962, **29,** 563.
Candida muscorum, new species of yeast from New Zealand. di Menna, 1958, **18,** 269.
Candida utilis, electron microscopy of membrane from. Mendoza & Villanueva, 1963, **32,** i.
Capsular properties of coliaerogenes bacteria. List & James, 1963, **31,** ii.
Carbohydrate catabolism in Arthrobacter. Zagallo & Wang, 1962, **29,** 389.
Carbohydrate metabolism in *Microsporum canis*. Chattaway, Thompson & Barlow, 1960, **22,** 649.
Carbohydrate metabolism in *Rhodopseudomonas spheroides*. Szymona & Doudoroff, 1960, **22,** 167.
Carbohydrate metabolism of *Paramecium aurelia* variety 4, stock 47.8 (sensitive). Vloedman *et al.*, 1957, **16,** 628.
Carbohydrate metabolism of pneumococci. Smith, Mills & Harper, 1957, **16,** 426.
Carbohydrate metabolism of *Staphylococcus aureus*. Strasters & Winkler, 1963, **31,** xvi.
Carbohydrate metabolism of *Staphylococcus aureus*. Strasters & Winkler, 1963, **33,** 213.
Carbohydrate, utilization in *Aspergillus nidulans*. Roberts, 1963, **31,** 45.
Carbohydrates, composition of streptococcal cell wall. Roberts & Stewart, 1961, **24,** 253.
Carbohydrates fermented by various bacteria in rumen, improved method for counts. Kistner, 1960, **23,** 565.
Carbohydrates, metabolism and phylogenetic relationship of acetic acid bacteria. De Ley, 1961, **24,** 31.
Carbon and energy storage in bacteria. Wilkinson, 1963, **32,** 171.
Carbon dioxide metabolism by *Streptococcus bovis*. Wright, 1960, **22,** 713.
Carbon dioxide tension, stimulation of glucose metabolism in *Trichophyton mentagrophytes*. Chin & Knight, 1963, **30,** 121.
Carbon dioxide tensions, changes in *Trichophyton mentagrophytes* metabolism. Chin & Knight, 1963, **30,** 113.
Carbon dioxide tensions, growth of *Trichophyton mentagrophytes* and *T. rubrum* in increased. Chin & Knight, 1957, **16,** 642.
Carbon metabolism and inoculum size in Aspergillus. Meyrath & McIntosh, 1963, **33,** 47.
Carboxydismutase formation in Thiorhodaceae. Hurlbert, 1963, **31,** xvii.
3-Carboxy-2-quinoxalinylpenicillin effects on bacteria *in vitro*. Spooner & Spicer, 1963, **33,** vii.
Carotenoid distribution in algae. Allen, Goodwin & Phagpolngarm, 1960, **23,** 93.
Carotenoid pigments of mycoplasma. Smith, 1963, **32,** 307.
Carotenoids, nature and distribution of, in some blue-green algae. Goodwin, 1957, **17,** 467.
Caryophanon latum, appraisal. Provost & Doetsch, 1962, **28,** 547.
Catabolism of nitrogenous compounds by Pseudomonas. Gaby, Logan & Whitaker, 1962, **28,** 379.
Catalase activity in pathogenic *Leptospira* spp. Faine, 1960, **22,** 1.
Catalase and peroxidase content of *Neurospora crassa*, effect of molybdenum deficiency on the. Nicholas, 1957, **17,** 689.
Catalase and peroxidase in mycobacteria, observations. Winder, 1959, **20,** v.
Catalases in Lactobacillaceae. Delwiche, 1963, **31,** vii.
Cations, effect on development of bacteriophage ϕR. Tucker, 1963, **32,** 287.
Cations, interaction with endotoxin. Mora & Young, 1961, **26,** 81.
Cations, monovalent, effect on inhibition of yeast metabolism by nystatin. Marini, Arnow & Lampen, 1961, **24,** 51.
Cations, pH and heat effect on vaccinia virus. Kaplan, 1963, **31,** 313.
Cell boundary, fine structure of *Anacystis montana*. Echlin, 1963, **32,** iv.

Cell death and 'unbalanced growth' in Neurospora. Strauss, 1958, **18,** 658.
Cell division and growth in some bacteria. Schaechter, Williamson, Hood & Koch, 1962, **29,** 421.
Cell division, dissociation of morphogenesis in *Dictyostelium discoideum.* Sussman & Sussman, 1960, **23,** 287.
Cell division process, a model for statistics. Koch & Schaechter, 1962, **29,** 435.
Cell division, the effect of ethidium bromide on, and nucleic acid synthesis. Newton, 1957, **17,** 718.
Cell ensembles; effect of correlated fluctuations. Zahlan, 1961, **25,** 1.
Cell membranes, chemical composition of Mycoplasma. Razin, Argaman & Avigan, 1963, **33,** 477.
Cell receptors, stability of virus haemagglutinins and. Buckland & Tyrrell, 1963, **32,** 241.
Cell structure of *Bacillus megaterium.* Scherrer, 1963, **31,** 135.
Cell surfaces, some sorption phenomena at mammalian. Weiss, 1963, **32,** 11.
Cell, virus relation in rat polyoma tumours. Vandeputte & De Somer, 1962, **29,** 105.
Cell wall, bacterial. Result of adsorption, structure or selective permeability? Rogers, 1963, **32,** 19.
Cell-wall composition in *Bacillus subtilis.* Salton & Marshall, 1959, **21,** 415.
Cell-wall composition in strains of *Actinomyces.* Cummins & Harris, 1959, **21,** ii.
Cell-wall composition in Streptococcus. Roberts & Stewart, 1961, **24,** 253.
Cell-wall constituents of Rickettsiae and Psittacosis-lymphogranuloma organisms. Perkins & Allison, 1963, **30,** 469.
Cell-wall lytic enzyme associated with spores of *Bacillus* species. Strange & Dark, 1957, **16,** 236.
*Cell wall of Chlorella. Northcote, 1958, **19,** iii.
Cell wall of *Escherichia coli* strain B, its rigid layer. Weidel, Frank & Martin, 1960, **22,** 158.
Cell wall of *Nadsonia elongata.* Dyke, 1963, **31,** iv.
Cell-wall preparations from *Lactobacillus casei* strains. Glastonbury & Knox, 1963, **31,** 73.
Cell wall, relationship with Gram stain. Salton, 1963, **30,** 223.
Cell-wall structure and biosynthesis. Salton, 1962, **29,** 15.
Cell wall, synthesis of mucopeptide in *Staphylococcus aureus.* Park & Hancock, 1960, **22,** 249.
Cell wall, yeast, new aspects of the structure of the. Eddy & Rudin, 1957, **17,** v.
Cell walls, activity and permeability in dried baker's yeast. Ebbutt, 1961, **25,** 87.
Cell walls, composition and taxonomy of actinomycetales and related groups. Cummins & Harris, 1958, **18,** 173.
Cell walls, composition of in *Trigonopsis variabilis.* SentheShanmuganathan & Nickerson, 1962, **27,** 465.
Cell walls, disaggregation of, by anionic detergents. Shafa & Salton, 1960, **23,** 137.
Cell walls, Gram-negative, autolytic enzymes in preparation. Weidel, Frank & Leutgeb, 1963, **30,** 127.
Cell walls, mucopeptides of. Work, 1961, **25,** 167.
Cell walls of *Corynebacterium, Mycobacterium, Nocardia, Actinomyces* and *Arthrobacter,* chemical composition and antigenic structure of. Cummins, 1962, **28,** 35.
Cell walls of Platymonas. Lewin, 1958, **19,** 87.
Cell walls of *Rhizobium trifolii,* calcium in. Humphrey & Vincent, 1962, **29,** 557.
Cell walls of *Streptococcus pyogenes,* amino acids, amino sugars and sugars in. Michel & Gooder, 1962, **29,** 199.
Cell walls, precursors in *Escherichia coli.* Lilly, 1962, **28,** ii.
Cells, composition of, in *Trigonopsis variabilis.* Senthe-Shanmuganathan & Nickerson, 1962, **27,** 465.
Cells, composition, spermidine in. Bachrach & Cohen, 1961, **26,** 1.
Cells, control of form in *Trigonopsis variabilis.* Senthe-Shanmuganathan & Nickerson, 1962, **27,** 465.
Cells, form and structure of aggregations in *Escherichia coli.* Hoffman & Frank, 1961, **25,** 353.
Cells, of de-embryonated egg, infected with influenza virus, biochemistry. Mills, 1958, **19,** 473.
Cells, tissue, adsorption of antibody on to. Humphrey, 1963, **32,** 25.
Cells, yeastlike, of Histoplasma in culture, fine structure. Edwards, Hazen & Edwards, 1959, **20,** 496.
Cellular polysaccharide of a type II non-capsulated pneumococcus. Smith *et al.,* 1957, **17,** 437.
Cellulolysis by rumen micro-organisms. Halliwell, 1957, **17,** 153.
Cellulolytic preparations from micro-organisms of the rumen and from *Myrothecium verrucaria.* Halliwell, 1957, **17,** 166.
Cellulose, bacteria isolated from soil decomposing. Skinner, 1960, **22,** 539.
Cellulose breakdown by bacteria in rumen of cattle. Halliwell & Bryant, 1963, **32,** 441.
Cellulose ion exchangers, fractionation of *Clostridium welchii,* ε-antigen on. Thompson, 1963, **31,** 79.
Cellulose production by *Acetobacter acetigenum* in a defined medium. Dudman, 1959, **21,** 327.
Cellulose production by *Acetobacter* spp. Dudman, 1959, **21,** 312.
Cellulose production by Acetobacter strains in submerged culture. Dudman, 1960, **22,** 25.
Celluloseless mutants of certain *Acetobacter* spp. Steel & Walker, 1957, **17,** 12.
Celluloseless mutants of certain *Acetobacter* spp., comparative study of. Steel & Walker, 1957, **17,** 445.
Cellulose-producing cultures and celluloseless mutants of certain *Acetobacter* spp., comparative study of. Steel & Walker, 1957, **17,** 445.
Cephalosporin C against a penicillinase-producing strain of *Staphylococcus aureus,* synergistic action of. Crawford & Abraham, 1957, **16,** 604.
Cephalosporin C, biological assay of. Bond, Brimblecombe & Codner, 1962, **27,** 11.
Cephalosporins, structure and function in. Richmond & Collins, 1963, **33,** iv.
Changes in relationship between colicin sensitivity and bacteriophage resistance. Mukai, 1960, **23,** 539.
Chemical composition of Mycoplasma cells and membranes. Razin, Argaman & Avigan, 1963, **33,** 477.
Chemical disinfectants on bacteria in droplets compared with that in large volumes, action of. Valentine, 1957, **17,** 474.
Chemotherapy, *see also* Symposium **8.**
Chilling effect on *Aerobacter aerogenes.* Strange & Dark, 1962, **29,** 719.
Chilling, effect on *Escherichia coli.* Meynell, 1958, **19,** 380.

Chilomonas paramecium and *Tetrahymena pyriformis*, growth of mixed populations. Mučibabić, 1957, **16,** 561.
Chloramphenicol on protein and nucleic acid synthesis by *Escherichia coli* strain B. Harrington, 1958, **18,** 767.
Chloramphenicol-treated *Shigella flexneri*, ribonucleic acid of. Yee & Gezon, 1963, **32,** 299.
*Chlorella, cell wall. Northcote, 1958, **19,** iii.
Chlorella pyrenoidosa, caretonoid distribution in. Allen, Goodwin & Phagpolngarm, 1960, **23,** 93.
Chlorella pyrenoidosa, heterotrophic growth of. Samejima & Myers, 1958, **18,** 107.
Chlorobium thiosulphatophilum, acetate assimilation by. Gibson & Hoare, 1963, **31,** xxii.
Chlorobium thiosulphatophilum, chromatophores of. Gibson, 1957, **16,** ix.
4-Chloro-2-methyl-phenoxyacetic acid, the breakdown of, by bacteria. Steenson & Walker, 1957, **16,** 146.
Chlortetracycline, dietary, changes in serological type and antibiotic resistance of Lancefield group D streptococci in chickens receiving. Elliott & Barnes, 1959, **20,** 426.
Chlortetracycline, influence of phosphorus on development of *Streptomyces aureofaciens* and on its ability to produce. Prokofieva-Belgovskaya & Popova, 1959, **20,** 462.
Cholesterol in the nutrition of *Mycoplasma mycoides*. Rodwell & Abbot, 1961, **25,** 201.
Choline sulphate in fungi. Harada & Spencer, 1960, **22,** 520.
Chorio-allantois, adsorption, penetration and eclipse of herpes simplex virus in. Watkins, 1960, **22,** 40.
Chromatin patterns in *Spirillum anulus*. Williams, 1959, **21,** 109.
Chromatography, examination of materials digested by plant pathogens. Smith, 1958, **18,** 42.
Chromatography, paper partition, the differentiation and classification of bacteria by. Mattick *et al.*, 1957, **17,** iii.
Chromatography, purification of bacterial flagella by ion exchange. Martinez, 1963, **33,** 115.
Chromatophores of *Chlorobium thiosulphatophilum*. Gibson, 1957, **16,** ix.
Chromatophores of photosynthetic bacteria. Lascelles, 1962, **29,** 47.
Chromobacterium, genus, serology and pathogenicity of. Sneath & Buckland, 1959, **20,** 414.
*Chromosomes, maps of *Escherichia coli* K 12. Reeves, 1959, **21,** iv.
Chromous salts, production of anaerobic conditions. Marshall, 1960, **22,** 645.
Chrysogenin production in *Penicillium chrysogenum*. Macdonald, Hutchinson & Gillett, 1963, **33,** 375.
Chrysophyceae studied in the electron microscope. Harris & Bradley, 1958, **18,** 71.
Ciliates, inter-relationships in rumen. Eadie, 1962, **29,** 579.
Citric acid cycle in the growth of the fungus *Zygorrhynchus moelleri*, metabolic significance of the. Moses, 1957, **16,** 534.
Citric acid, in *Aspergillus niger*, effect of quaternary ammonium compounds on synthesis. Raman & Shanmugasundaram, 1962, **31,** 23.
Citric acid production by *Aspergillus niger*, effect of lipids on. Millis, Trumpy & Palmer, 1963, **30,** 365.
Citric acid production, nutritional requirements of *Aspergillus niger*. Trumpy & Millis, 1963, **30,** 381.
Citrobacter freundii polysaccharide, isolation of *N*-acetylneuraminic acid and 4-oxo-norleucine. Barry, Chen & Roark, 1963, **33,** 95.
Citrovorum factor, synthesis by *Leuconostoc mesenteroides* P 60. Cross, 1960, **23,** 115.
Citrulline, genes influencing conversion to argininosuccinate. Newmeyer, 1962, **28,** 215.
Classification, *see also* Symposium **12.**
Classification, Adansonian, of mycobacteria. Bojalil, Cerbon & Trujillo, 1962, **28,** 333.
Classification, Adansonian, of the staphylococci. Hill, 1959, **20,** 277.
Classification and differentiation of bacteria by paper partition chromatography. Mattick *et al.*, 1957, **17,** iii.
Classification, a new species of yeast, *Torulopsis castellii*. Capriotti, 1961, **26,** 41.
Classification, bacterial, prejudice in. Sneath, 1957, **17,** ii.
Classification, bacterial, use of models. Lysenko & Sneath, 1959, **20,** 284.
Classification, comparison of four species of mycobacteria. Gordon & Mihm, 1959, **21,** 736.
Classification, *Metschnikowiella zobellii* and *M. krissii*, two new species. van Uden & Castelo-Branco, 1961, **26,** 141.
Classification, micropolyspora, a new genus of Actinomycetales. Lechevalier, Solotorovsky & McDurmont, 1961, **26,** 11.
Classification of a strain of *Gluconobacter liquefaciens*. Kimmitt & Williams, 1963, **31,** 448.
Classification of *Aeromonas*, *Pseudomonas* and *Comamonas*. Park, 1962, **27,** 121.
Classification of azotobacter bacteriophages. Duff & Wyss, 1961, **24,** 273.
Classification of *Azotobacter* by use of dyes. Callao & Montoya, 1960, **22,** 657.
Classification of 'Bacterium salmonicida'. Smith, 1963, **33,** 263.
Classification of certain filamentous bacteria. Davis & Baird-Parker, 1959, **21,** 612.
Classification of *Clostridium bifermentans* and *C. sordellii*. Brooks & Epps, 1959, **21,** 144.
Classification of Fusobacteria from human mouth. Baird-Parker, 1960, **22,** 458.
Classification of genus *Nocardia*. Gordon & Mihm, 1962, **27,** 1.
Classification of Gram-negative rods. Steel & Midgley, 1962, **29,** 171.
Classification of Klebsiella group. Cowan, Steel, Shaw & Duguid, 1960, **23,** 601.
Classification, of *Lactobacillus casei* serologically. Glastonbury & Knox, 1963, **31,** 73.
Classification of micrococci and staphylococci based on physiological and biochemical tests. Baird-Parker, 1963, **30,** 409.
Classification of Mycobacteria, Adanson. Cerbón & Bojalil, 1961, **25,** 7.
Classification of Pseudomonas. Lysenko, 1961, **25,** 379.
Classification of *Pseudomonas fluorescens*. Rhodes, 1959, **21,** 221.
Classification of *Pseudomonas fluorescens* using electronic computers. Rhodes, 1961, **25,** 331.

Classification of rhizosphere bacteria. Brisbane & Rovira, 1961, **26,** 379.
Classification of *Streptococcus pluton* and its differentiation from associated enterococci. Bailey & Gibbs, 1962, **28,** 385.
Classification of *Vibrio*. Davis & Park, 1962, **27,** 101.
Classification of violet-pigmented micrococci. Kocur & Martinec, 1963, **32,** 185.
Classification of *Xanthomonas uredovorus*. Hayward & Hodgkiss, 1961, **26,** 133.
Classification, oxidase reaction as a taxonomic tool. Steel, 1961, **25,** 297.
Classification, proposed, for acetobacter and gluconobacter. De Ley, 1961, **24,** 31.
Classification proposed for a Gram-negative heterotrophic marine bacterium. Brown, 1960, **23,** 471.
Classification, *Pseudomonas maltophilia*, an Alcaligenes-like species. Hugh & Ryschenkow, 1961, **26,** 123.
Classification, relationship to enterobacterium A 12 of *Shigella boydii*. Carpenter, 1961, **26,** 535.
Classification, Simonsiellaceae fam.nov. Steed, 1962, **29,** 615.
Classification, *Thiodendron mucosum*, a new species and genus of colourless sulphur bacteria. Lackey & Lackey, 1961, **26,** 29.
Clostridium genus, taxonomic studies of *C. bifermentans* and *C. sordellii*. Brooks & Epps, 1959, **21,** 144.
Clostridium histolyticum, cysteine-inactivated proteinase (δ-antigen) of. Oakley & Warrack, 1958, **18,** 9.
Clostridium histolyticum gelatinase, serological evidence for a specific. Mandl & Zaffuto, 1958, **18,** 13.
Clostridium histolyticum, proteolytic enzymes from filtrates of. MacLennan, Mandl & Howes, 1958, **18,** 1.
Clostridium pasteurianum, hydrogenase activity and nitrogen fixation. Nicholas, Fisher, Redmond & Wright, 1960, **22,** 191.
Clostridium perfringens, bacteriophages. Williams Smith, 1959, **21,** 622.
Clostridium perfringens, nutritional requirements of. Fuchs & Bonde, 1957, **16,** 317.
Clostridium perfringens, the availability of sulphur for, and an examination of hydrogen sulphide production. Fuchs & Bonde, 1957, **16,** 330.
Clostridium perfringens types, urease in. Brooks, 1961, **26,** 231.
Clostridium welchii ϵ-antigen, fractionation on cellulose ion exchangers. Thompson, 1963, **31,** 79.
Clover root hairs, infection of, by nodule bacteria studied by a simple glass slide technique. Fåhraeus, 1957, **16,** 374.
*Coagulase, activity of group D streptococcus. Wood, 1959, **20,** iv.
Coagulase, staphylococcal, in relation to bacteriophage group, antigenic specificity of. Barber & Wildy, 1958, **18,** 92.
Cobalamin and the synthesis of methionine by cell-free extracts of *Escherichia coli*. Helleiner, Kisliuk & Woods, 1958, **18,** xv.
^{60}Cobalt and ^{137}caesium in fungi, translocation of. Grossbard & Stranks, 1959, **20,** iv.
Cocci, Gram-negative, from the rumen, occurrence and properties of. Hobson, Mann & Oxford, 1958, **19,** 462.
Cocci, Gram-positive, motile pattern of growth and flagellar development in. Hale & Bisset, 1958, **18,** 688.
Coccus, anaerobic amylolytic, characters. Provost & Doetsch, 1960, **22,** 259.
Coccus, Gram-negative, from the rumen of the calf. Hobson, Mann & Oxford, 1958, **18,** i.
Cod, North Sea, bacterial flora of the skin. Georgala. 1958, **18,** 84.
Cold, effect on the viable count of *Pseudomonas pyocyanea*. Gorrill & McNeil, 1960, **22,** 437.
Cold, survival of frozen bacteria. Postgate & Hunter, 1961, **26,** 367.
Coli aerogenes bacteria, capsular and fimbriative properties of. List & James, 1963, **31,** ii.
Col I factor, infectivity of *Salmonella typhimurium*. Stocker, Smith & Ozeki, 1963, **30,** 201.
Col I transmission in *Salmonella typhimurium*. Smith, Ozeki & Stocker, 1963, **33,** 231.
Colicin, inter-relationship between bacteriophage resistance and sensitivity. Mukai, 1960, **23,** 539.
Colicine, crosses in *Salmonella enteriditis* initiated by genetics of *Salmonella enteriditis*, crosses initiated by colicine. Meynell, 1962, **28,** 169.
Colicine, transmission to *Salmonella typhimurium*. Smith, Ozeki & Stocker, 1963, **33,** 231.
Colicinogeny in *Escherichia coli*. Papavassiliou, 1961, **25,** 409.
Colicinogeny, the 'lethal zygote' produced by crossing non-colicinogenic with colicinogenic bacteria. Ben-Gurion, 1963, **30,** 173.
Colicinogeny transmission between strains of *Salmonella typhimurium*. Ozeki, Stocker & Smith, 1962, **28,** 671.
Colicins, colicinogenic factors and their relations to bacteriophages. Fredericq, 1958, **18,** 527.
Colicins, genetic control of colicinogenic factors E_2, *I* and *F*. de Zwaig, Anton & Puig, 1962, **29,** 473.
Coliform and paracolon groups, study of the factors controlling lactose-fermentation in. Lowe, 1960, **23,** 127.
Coliform bacilli, ampicillin inactivation and sensitivity of. Ayliffe, 1963, **30,** 339.
Coliform, differential effect of temperature on gas production. Hopton, 1958, **19,** 507.
Coliform group, factors controlling lactose-fermentation. Lowe, 1960, **23,** 127.
Coliphage T3, normal distribution of the resistance of, to inactivation by bacterial receptors and its application to their assay. Klemperer, 1957, **16,** 299.
Colominic acid, relationship to bacteria containing neuraminic acid. Barry, Abbott & Tsai, 1962, **29,** 335.
Colony, formation by *Lactobacillus casei*. de Klerk & Coetzee, 1962, **29,** 291.
Comamonas, classification of. Park, 1962, **27,** 121.
Compatibility, preferential, in *Streptomyces violaceoruber*. Bradley & Anderson, 1960, **23,** 231.
Competence of streptococci. Pakula & Walczak, 1963, **31,** 125.
Complement fixation with foot-and-mouth virus. Bradish, Brooksby & Tsubahara, 1960, **22,** 392.
Complement, in interactions between components of foot-and-mouth virus. Bradish & Brooksby, 1960, **22,** 405.
Complementation mapping by abortive transduction of histidine-requiring Salmonella mutants. Hartman, Hartman & Šerman, 1960, **22,** 354.
Component, properties of transmissible interfering, of vesicular stomatitis virus. Bellett & Cooper, 1959, **21,** 498.

Component, transmissible interfering, in the vesicular stomatitis virus. Cooper & Bellett, 1959, **21,** 485.
Composition, chemical of *Rhizobium trifolii.* Vincent, Humphrey & North, 1962, **29,** 551.
Composition, DNA base, of acetic acid bacteria. De Ley & Schell, 1963, **33,** 243.
Composition of lambda in *Paramecium aurelia.* van Wagtendonk & Tanguay, 1963, **33,** 395.
Composition of 'sulphur granules' of *Actinomyces bovis.* Pine & Overman, 1963, **32,** 209.
Compounds, aromatic, related to lignin, metabolism by hyphomycetes. Henderson, 1961, **26,** 155.
Compounds, aromatic, related to lignin, utilization by hyphomycetes. Henderson, 1961, **26,** 149.
Compounds, nitrogen, complex formation with autoxidized lignin. Sørensen, 1962, **27,** 21.
2-C compounds other than acetate, the assimilation of. Morris, 1963, **32,** 167.
1-C compounds, the assimilation of. Quayle, 1963, **32,** 163.
Computation, electronic, of *Pseudomonas fluorescens.* Rhodes, 1961, **25,** 331.
Computers, application of, to taxonomy. Sneath, 1957, **17,** 201.
Computers in taxonomy. Beers, Fisher, Megraw & Lockhart, 1962, **28,** 641.
Concept of virus. The third Marjory Stephenson Memorial Lecture. Lwoff, 1957, **17,** 329.
Conidia, *Aspergillus nidulans,* changes occurring in the composition of, during germination. Shepherd, 1957, **16,** i.
Conidia, *Botrytis cinerea,* germination. Hawker & Hendy, 1963, **33,** 43.
Conidial differentiation in *Neurospora crassa.* Grigg, 1960, **22,** 662.
Conidiation, genetic control in a heterokaryon of *Neurospora crassa.* Grigg, 1958, **19,** 15.
Conidiation in Neurospora, temperature sensitive genes affecting. Grigg, 1960, **22,** 667.
Conjugation in *Escherichia coli* K-12, nature of the endergonic processes in. Fisher, 1957, **16,** 136.
Conjugation in *Escherichia coli* K-12, role of the Krebs cycle in. Fisher, 1957, **16,** 120.
Conjugation process in *Escherichia coli,* the kinetics of. Hayes, 1957, **16,** 97.
Contaminants, growth of, in continuous culture. Powell, 1958, **18,** 259.
Continuous culture of bacteria at constant population density, an apparatus for. Perret, 1957, **16,** 250.
Continuous culture technique, oxygen requirement of growing cultures of an *Aerobacter* species determined by means of. Pirt, 1957, **16,** 59.
Conversion, in mitis and mitis-like *Corynebacterium diphtheriae,* and lysogeny. Groman & Memmer, 1958, **19,** 634.
Copper-dependent inactivations of cucumber mosaic virus by polyphenols. Pierpoint & Harrison, 1963, **32,** 429.
Copper, molybdenum and iron, effects of, on some enzymes in *Neurospora crassa.* Nicholas & Commissiong, 1957, **17,** 699.
Coproporphyrin, effect of cobaltous ions on formation by *Corynebacterium diphtheriae.* Clarke, 1958, **18,** 708.
Corn steep liquor, influence of oxidation on ammonia by *Nitrosomonas europaea.* Gundersen, 1958, **19,** 190.
Cortisone and other substances, influence on phagocytosis. Buttle & Northover, 1959, **20,** iii.
Corynebacteria and related pleuropneumonia-like organisms. Pease & Laughton, 1962, **27,** 383.
Corynebacterium and transitional forms, isolated from subacute bacterial endocarditis. Wittler, Malizia, Kramer, Tuckett, Pritchard & Baker, 1960, **23,** 315.
Corynebacterium, chemical composition and antigenic structure of cell walls of. Cummins, 1962, **28,** 35.
Corynebacterium diphtheriae, effect of cobaltous ions on the formation of toxin and coproporphyrin. Clarke, 1958, **18,** 708.
Corynebacterium diphtheriae, effect of ferrous ions on the formation of toxin and porphyrin. Clarke, 1958, **18,** 698.
Corynebacterium diphtheriae, inhibition by *Staphylococcus aureus.* Parker & Simmons, 1959, **21,** 457.
Corynebacterium diphtheriae in submerged culture, growth and toxin production. Edwards, 1960, **22,** 698.
Corynebacterium diphtheriae in submerged culture, uptake of iron. Edwards & Seamer, 1960, **22,** 705.
Corynebacterium diphtheriae, keto-acid metabolism of, in submerged culture. Edwards, 1960, **23,** 201.
Corynebacterium diphtheriae, mitis and mitis-like, lysogeny and conversion. Groman & Memmer, 1958, **19,** 634.
Corynebacterium diphtheriae, phage multiplication and toxin production in. Barksdale, 1958, **18,** x.
Corynebacterium erythrogenes 142, oxidation of Krebs cycle intermediates by. Tucker, 1959, **20,** vii.
Corynebacterium erythrogenes, the oxidation of tricarboxylic acid cycle intermediates. Tucker, 1960, **23,** 267.
Corynbacterium, evidence derived of its L-form to *Streptobacillus moniliformis.* Pease, 1962, **29,** 91.
Corynebacterium haemolyticum, mutation of *C. pyogenes* to. Barksdale *et al.,* 1957, **16,** 749.
Corynebacterium pyogenes, the mutation of, to *C. haemolyticum.* Barksdale *et al.,* 1957, **16,** 749.
Corynebacterium renale,* pathogenic significance of urease in. Lister, 1957, **16, ix.
Corynebacterium xerosis, purification and properties of a polymetaphosphatase from. Muhammed, Rodgers & Hughes, 1959, **20,** 482.
Coryneform bacteria, nutrition from soil and herbage. Grainger & Keddie, 1963, **31,** viii.
o-Coumaric acid, effects on inhibition of sporulation in *Venturia inaequalis.* Kirkham & Flood, 1963, **32,** 123.
Count, viable, measurement by slide culture. Postgate, Crumpton & Hunter, 1961, **24,** 15.
Count, viable, of *Pseudomonas pyocyanea,* effect of cold diluent on. Gorrill & McNeil, 1960, **22,** 437.
Counting rumen ciliate protozoa, development and testing of a method of. Boyne, Eadie & Raitt, 1957, **17,** 414.
Counts, electrical, characteristics of equivolume microorganisms. Curby, Swanton & Lind, 1963, **32,** 33.
Counts, particle, of Murray Valley encephalitis virus. Ada, Abbot, Anderson & Collins, 1962, **29,** 165.
Counts, total of bacterial spores. Cook & Lund, 1962, **29,** 97.
Cowpox and vaccinia viruses, infectivity of purified and partially purified preparations of. Kaplan & Valentine, 1959, **20,** 612.
Cowshed, air spora in. Baruah, 1961, **25,** 483.

Crithidia fasciculata, growth and nutrition of. Kidder & Dutta, 1958, **18,** 621.
Crithidia (*Strigomonas*) *oncopelti*, isolation of flagella. Chesters, 1963, **31,** xxiv.
Cross-immunity test, identification of type A phages of *Salmonella typhimurium* by a standardized. Boyd & Bidwell, 1957, **16,** 217.
Cryptococcus, low maximum temperature in. Hagen & Rose, 1962, **27,** 89.
Cucumber mosaic virus, relation of polyphenoloxidase to instability. Harrison & Pierpoint, 1963, **32,** 417.
Cultivation and identification of fungi, the membrane filter as an aid in the. Funder & Johannessen, 1957, **17,** 117.
Cultivation of *Dictyostelium discoideum* in liquid medium. Sussman, 1961, **25,** 375.
Cultivation of *Eperythrozoon coccoides*. Seamer, 1959, **21,** 344.
Cultivation of *Fuligo septica*, fruiting of *Fuligo septica*, and germination of *Fuligo septica*. Scholes, 1962, **29,** 137.
Cultivation of *Haemophilus vaginalis*. Redmond & Kotcher, 1963, **33,** 77.
Cultivation of lipolytic bacteria from rumen. Hobson & Mann, 1961, **25,** 227.
Cultivation of mycobacteria rocked in non-protein medium containing a high concentration of Tween 80. Aoyagi & Mizuno, 1959, **20,** 173.
Cultivation of *Mycobacterium lepraemurium* in rat fibroblasts. Garbutt, Rees & Barr, 1962, **27,** 259.
Cultivation of *Physarum polycephalum* on a partially defined soluble medium. Daniel & Rusch, 1961, **25,** 47.
Cultivation of rumen oligotrich protozoa. Clarke, 1963, **33,** 401.
Cultivation of sheep rumen oligotrich protozoa. Coleman, 1960, **22,** 555.
Cultural characters and pathogenicity in *Venturia inaequalis* and *V. pirina*, relationships between. Kirkham, 1957, **16,** 360.
Culture, axenic, of *Didymium nigripes*. Kerr, 1963, **32,** 409.
Culture, cell, structure and replication of the trachoma agent. Armstrong, Valentine & Fildes, 1963, **30,** 59.
Culture, cell, titration of trachoma and inclusion blennorrhoea viruses. Furness, Graham & Reeve, 1960, **23,** 613.
Culture, continuous, for bulk growth of animal cells. Cooper, Wilson & Burt, 1959, **21,** 702.
Culture, continuous, growth of contaminants and mutants in. Powell, 1958, **18,** 259.
Culture, continuous, influence of growth rate and aeration on the respiratory system of a fluorescent pseudomonad. Rosenberger & Kogut, 1958, **18,** ii.
Culture, continuous, of *Escherichia coli*, effect of environmental factors. Maclean & Munson, 1961, **25,** 17.
Culture, continuous, production of antigens by *Pasteurella pestis*. Pirt, Thackeray & Harris-Smith, 1961, **25,** 119.
Culture, continuous, yields of *Streptococcus faecalis* from. Rosenberger & Elsden, 1960, **22,** 726.
Culture of *Mycobacterium balnei* at 37°, effect of the medium on. Tolhurst, 1958, **18,** 295.
Culture of Pediococci. Günther & White, 1961, **26,** 185.
Culture of *Streptomyces rimosus* in submerged fermentation. Doskočil *et al.*, 1958, **18,** 302.
Culture, slide, cellular morphology of form 2 Mycobacteria in. Csillag, 1963, **30,** 21.
Culture, submerged, cellulose production by Acetobacter strains in. Dudman, 1960, **22,** 25.
Culture, submerged, growth and toxin production of *Corynebacterium diphtheriae* in. Edwards, 1960, **22,** 698.
Culture, submerged, uptake of iron by *Corynebacterium diphtheriae* growing in. Edwards & Seamer, 1960, **22,** 705.
Culture, tissue, effect of environment on replication of poliovirus. Furness, 1961, **25,** 421.
Culture, tissue, on polythene. Fulton, 1960, **22,** 416.
Cultures, chick cell, homotypic non-exclusion by vesicular stomatitis virus. Cooper, 1958, **19,** 350.
Cultures, chick cell, 'shortened latency' as a result of multiple infection by vesicular stomatitis virus. Cooper, 1958, **19,** 340.
Cultures, continuous, influence of growth rate and aeration on the respiratory and cytochrome system of a fluorescent pseudomonad. Rosenberger & Kogut, 1958, **19,** 228.
Cultures, continuous, relationship between population density and specific growth rate. Contois, 1959, **21,** 40.
Cultures, freeze-dried, conditions for survival. Postgate & Hunter, 1961, **26,** 367.
Cultures, freeze-dried, death of micro-organisms during. Leach, Ohye & Scott, 1959, **21,** 658.
Cultures, freeze-dried, effect of oxygen on *Escherichia coli*. Lion & Bergmann, 1961, **24,** 191.
Cultures, freeze-dried, effect of residual water on survival. Scott, 1958, **19,** 624.
Cultures, freeze-dried, influence of rehydration on the viability of. Leach & Scott, 1959, **21,** 295.
Cultures, freeze-dried, keeping quality of *Brucella abortus* strain 19 vaccine. van Drimmelen & Steyn, 1958, **19,** 324.
Cultures, freeze-dried, of Leptospires. Annear, 1962, **27,** 341.
Cultures, freeze-dried, protection against effect of oxygen. Lion & Bergmann, 1961, **25,** 291.
Cultures, freeze-dried, survival of *Escherichia coli*. Record, Taylor & Miller, 1962, **28,** 585.
Cultures, fungal, size of inoculum on growth of. Meyrath, 1963, **31,** v.
Cultures, HeLa cell, for growth of trachoma and inclusion blennorrhoea virus. Reeve & Graham, 1962, **27,** 177.
Cultures, HeLa cell monolayers for inclusion blennorrhoea virus. Furness, Henderson, Csonka & Fraser, 1962, **28,** 571.
Cultures, microbial, occurrence of struvite in. Beavon & Heatley, 1963, **31,** 167.
Cultures of *Bordetella pertussis*. Holt, 1962, **27,** 323.
Cultures of Proteus L-form, growth of elements in. Weibull & Lundin, 1962, **27,** 241.
Cultures of *Streptococcus pneumoniae*. Holt, 1962, **27,** 327.
Cultures of vesicular stomatitis virus, in chick cell, changes in ribonucleic acid. Turco, 1959, **21,** 510.
Cultures, slide, for measurement of bacterial viability. Postgate, Crumpton & Hunter, 1961, **24,** 15.

Cultures, submerged and surface production of sporidesmin and sporidesmolides. Dingley, Done, Taylor & Russell, 1962, **29,** 127.
Cultures, submerged, sulphydryl metabolism of fungi grown in. Robson & Stockley, 1962, **28,** 57.
Cultures, synchronized, *Escherichia coli* reproduction of bacteriophage. Starka, 1962, **29,** 83.
Cultures, tissue, aiding diagnosis of smallpox and other virus diseases. Dekking, 1963, **31,** xii.
Cultures, tissue, herpes virus from solitary HeLa cells. Wildy, Stoker & Ross, 1959, **20,** 105.
Cultures, tissue, neutralization of cytopathogenic bovine orphan virus by Francis type inhibitor. Turner, Kipps, Polson & van den Ende, 1961, **26,** 415.
Cycloheximide in morphology of *Saccharomyces pastorianus*. Gundersen & Wadstein, 1962, **28,** 325.
D-Cyclosterine, induction of L-phase in streptococci with amino acids. Michel & Hijmans, 1960, **23,** 35.
Cystathionine, catabolism, by *Escherichia coli*. Wijesundera & Woods, 1962, **29,** 353.
Cysteamine and its derivatives, induction of bacteriolysis. Weinberg, Saz & Pilgren, 1958, **19,** 419.
Cysteine, effect of glucose on production by *Escherichia coli* of H_2S. Anderson & Johansson, 1963, **30,** 485.
Cysteine, inactivation of proteinase (δ-antigen) of *Clostridium histolyticum*. Oakley & Warrack, 1958, **18,** 9.
Cysteine toxicity in *Neurospora crassa*, amino acid interrelationships in. Adiga, Sastry & Sarma, 1962, **29,** 149.
Cysteineless mutants of *Salmonella typhimurium* arising as a result of an apparent chromosomal deletion. Clowes, 1957, **17,** i.
Cystine, poliovirus mutants with altered responses. Dubes & Chapin, 1958, **18,** 320.
Cytidine diphosphate, occurrence of polyol derivatives in micro-organisms. Clarke, Glover & Mathias, 1959, **20,** 156.
Cytochemistry of streptomyces. Giolitti, 1960, **23,** 83.
Cytology, attempts to obtain Gram-negative rods from staphylococci treated with penicillin. Paine & Daniel, 1959, **21,** 203.
Cytology, cell walls structure. Weidel, Frank & Leutgeb, 1963, **30,** 127.
Cytology, characters of elements found in Proteus L-form. Weibull & Beckman, 1961, **24,** 379.
Cytology, characters of Rhizobium strains from tropical legumes. Bisset, 1959, **20,** 89.
Cytology, chromatin patterns in *Spirillum anulus*. Williams, 1959, **21,** 109.
Cytology, composition of the spore wall and the cell wall of *Bacillus subtilis*. Salton & Marshall, 1959, **21,** 415.
Cytology, composition of various forms of *Trigonopsis variabilis*. SentheShanmuganathan & Nickerson, 1962, **27,** 451.
Cytology, cytoplasmic membrane in bacteria. Hughes, 1962, **29,** 39.
Cytology, development of Gram-negative rods in penicillin-treated *Staphylococcus aureus*. Hilson & Elek, 1959, **21,** 208.
Cytology, effect of formaldehyde on shape of flagella. Leifson, 1961, **25,** 131.
Cytology, filament anastomosis in developmental cycle of *Nostoc muscorum*. Lazaroff & Vishniac, 1962, **28,** 203.
Cytology, fine structure of bacteriophages. Bradley & Kay, 1960, **23,** 553.
Cytology, fine structure of yeastlike cells of Histoplasma in culture. Edwards, Hazen & Edwards, 1959, **20,** 496.
Cytology, fine structure of young hyphae of *Pythium debaryanum*. Hawker & Abbott, 1963, **31,** 491.
Cytology, freezing points of bacterial cells in relation to halophilism. Christian & Ingram, 1959, **20,** 27.
Cytology, globular involution forms in bifid bacteria. Sundman & Björksten, 1958, **19,** 491.
Cytology, illegitimate mating in *Paramecium bursaria*. Larison & Siegel, 1961, **26,** 499.
Cytology, inclusions in *Nocardia rubra*. Adams & McClung, 1962, **28,** 231.
Cytology, mate-killer particles in *Paramecium aurelia*. Beale & Jurand, 1960, **23,** 243.
Cytology, mitotic cycle of *Leishmania donovani*. Chakraborty & Das Gupta, 1962, **28,** 547.
Cytology, morphology of *Nitrobacter winogradskyi*. Zavarzin & Legunkova, 1959, **21,** 186.
Cytology, movement of sodium and cell volume changes in a sodium-rich yeast. Kotyk & Kleinzeller, 1959, **20,** 197.
Cytology, negative staining process. Bradley, 1962, **29,** 503.
Cytology, observations on the amoeba stage of *Naegleria gruberi*. Chang, 1958, **18,** 565.
Cytology, of bacterial component of soybean root nodules. Bergersen & Briggs, 1958, **19,** 482.
Cytology of *Escherichia coli*; effect of radiation sensitivity. Munson & Maclean, 1961, **25,** 29.
Cytology of *Escherichia coli* in continuous culture. Maclean & Munson, 1961, **25,** 17.
Cytology of *Escherichia coli* strain B. Weidel, Frank & Martin, 1960, **22,** 158.
Cytology of form 2 Mycobacteria. Csillag, 1963, **30,** 21.
Cytology of *Myxococcus fulvus*. Loebeck & Ordal, 1957, **16,** 76.
Cytology of *Nocardia rubra*, cytoplasmic inclusions of. Adams & McClung, 1962, **28,** 231.
Cytology of *Pseudomonas* spp. as revealed by a silver-plating staining method. Rhodes, 1958, **18,** 639.
Cytology of *Rhizobium trifolii*. Vincent, Humphrey & North, 1962, **29,** 551.
Cytology of *Streptomyces*, interpretation of morphological appearances. Davis, 1960, **22,** 740.
Cytology of the flagellate transformation of *Naegleria gruberi*. Chang, 1958, **18,** 579.
Cytology of *Trypanosoma lewisi*, relation to formation of antibody. Ormerod, 1959, **21,** 287.
Cytology, permeability of the envelopes of *Staphylococcus aureus* to some salts, amino acids and non-electrolytes. Mitchell & Moyle, 1959, **20,** 434.
Cytology, photometric methods for measuring length. Powell & Stoward, 1962, **27,** 489.
Cytology, physiology of conjugation process in yeast. Brock, 1961, **26,** 487.
Cytology, relationships between Gram-negative rods and staphylococci grown in penicillin. Briggs, Crawford, Abraham & Gladstone, 1959, **21,** 205.
Cytology, spore formation and 'dimorphism' in Mycobacteria. Csillag, 1961, **26,** 97.
Cytology, structure of vegetative hyphae of Rhizopus. Hawker & Abbott, 1963, **30,** 401.

Cytology, surface structures of *Streptomyces violaceoruber*. Hopwood & Glauert, 1961, **26,** 325.
Cytology, synthesis of cell-wall mucopeptide in *Staphylococcus aureus*. Park & Hancock, 1960, **22,** 249.
Cytology, volutin granules, in different species of trypanosomes. Ormerod, 1958, **19,** 271.
Cytophaga, taxonomy. Floodgate & Hayes, 1963, **30,** 237.
Cytoplasm of a parasitic flagellate, ribonucleoprotein-containing structures in the. Newton, 1957, **17,** iii.
Cytoplasms, lethal suppressive, in aged clones of *Aspergillus glaucus*. Jinks, 1959, **21,** 397.

Dasyscyphus sp., ascospores in. Moore & McAlear, 1962, **28,** 211.
Death of micro-organisms during drying. Leach, Ohye & Scott, 1959, **21,** 658.
Debaryomyces subglobosus, production of riboflavin and D-arabitol. Anderson & Harris, 1963, **33,** 137.
Decarboxylase of Gram-negative rods. Steel & Midgley, 1962, **29,** 171.
Decarboxylase, oxalacetate, in lactobacilli. Nathan, 1961, **25,** 415.
Decarboxylation of neutral amino acids in *Proteus vulgaris*. Ekladius, King & Sutton, 1957, **17,** 602.
Decomposition of dichlorophenoxybutyrate. MacRae, Alexander & Rovira, 1963, **32,** 69.
Decomposition of dichloropropionate by soil micro-organisms. Macgregor, 1963, **30,** 497.
Dehydrogenase activity in *Staphylococcus aureus*, effect of growth conditions on. Collins & Lascelles, 1962, **29,** 531.
Dehydrogenase, glutamic acid, effect in *Neurospora crassa*. Barratt, 1963, **33,** 33.
Denitrification, influence of plants on. Woldendorp, 1963, **31,** xvii.
Denitrification influenced by oxygen. Jannasch, 1960, **23,** 55.
Density, optical, of suspensions of *Pseudomonas aeruginosa* and *Escherichia coli*. Bernheim, 1963, **30,** 53.
11-Deoxycorticosterone action on *Trichophyton rubrum*. Chattaway, Townsley & Barlow, 1963, **30,** 261.
Deoxyribonucleates from Neisseriae. Catlin & Cunningham, 1961, **26,** 303.
Deoxyribonucleic acid, base composition of acetic acid bacteria. De Ley & Schell, 1963, **33,** 243.
Deoxyribonucleic acid, effects on growth of mycoplasma. Razin & Knight, 1960, **22,** 504.
Deoxyribonucleic acid of *Escherichia coli*, containing 5-bromouracil, ultraviolet irradiation of. Greer, 1960, **22,** 618.
Deoxyribonucleic acid of *Serratia marcescens*. Jones & Walker, 1963, **31,** 187.
Deoxyribonucleic acid, recovery, from the effects of alkylation. Strauss, 1963, **30,** 89.
Deoxyribonucleic acid, metabolism in *Escherichia coli* infected with bacteriophage T5. Crawford, 1958, **19,** iii.
Deoxyribonucleic acids, extracellular and intracellular bacterial. Catlin & Cunningham, 1958, **19,** 522.
Desulfovibrio desulfuricans, nutrition. Macpherson & Miller, 1963, **31,** 365.
Desulphovibrio desulphuricans, osmotic behaviour of. Littlewood & Postgate, 1957, **16,** 596.
Desulphovibrio desulphuricans, sodium chloride and the growth of. Littlewood & Postgate, 1957, **17,** 378.
Desulphovibrio orientis, new sulphate-reducing vibrio. Adams & Postgate, 1959, **20,** 252.
Detergents, anionic, disaggregation of cell walls. Shafa & Salton, 1960, **23,** 137.
Detergents, in the study of virus of foot-and-mouth disease. Cartwright & Thorne, 1959, **20,** 61.
Detergents, ionic, lysis of protoplasts. Gilby & Few, 1960, **23,** 19.
Dextran, clinical, potentiation of serum bactericidal titre by. Wardlaw, 1957, **17,** xii.
Dextran fermenting organism from the rumen closely resembling *Lactobacillus bifidus*. Clarke, 1959, **20,** 549.
Dextran, from sucrose by rumen strains of *Streptococcus bovis*. Bailey & Oxford, 1958, **19,** 130.
Dextran, synthesis from sucrose by rumen *Streptococcus bovis*. Oxford, 1958, **19,** 617.
Dextran-producing organisms *Leuconostoc mesenteroides*, *L. dextranicum* and *Streptococcus bovis*, nature of the capsular polysaccharides of. Bailey & Oxford, 1959, **20,** 258.
Diaminopimelic acid, oxidation by certain sporulating bacteria. Antia & Work, 1961, **26,** 67.
Diatoms, some factors affecting the sinking rate of. Marshall & Orr, 1957, **16,** 273.
2:4-Dichloro- and 4-chloro-2-methyl-phenoxyacetic acid, bacterial oxidation of. Steenson & Walker, 1958, **18,** 692.
2:4-Dichloro- and 4-chloro-2-methyl-phenoxyacetic acid by bacteria, pathway of breakdown of. Steenson & Walker, 1957, **16,** 146.
Dichlorophenoxybutyrate, decomposition by Flavobacterium. MacRae, Alexander & Rovira, 1963, **32,** 69.
Dichloropropionate, decomposition by soil micro-organisms. Macgregor, 1963, **30,** 497.
Dictyostelium discoideum, cultivation in liquid medium. Sussman, 1961, **25,** 375.
Dictyostelium discoideum, dissociation of morphogenesis from cell division. Sussman & Sussman, 1960, **23,** 287.
Dictyostelium discoideum, environmental control of development in. Krichevsky & Wright, 1963, **32,** 195.
Dictyostelium discoideum, ploidal inheritance, haploidization and segregation. Sussman & Sussman, 1963, **30,** 349.
Dictyostelium discoideum, ploidal inheritance in. Sussman & Sussman, 1962, **28,** 417.
Dictyostelium discoideum wild-type and aggregateless mutants, synergistic morphogenesis by mixtures of. Ennis & Sussman, 1958, **18,** 433.
Didymium nigripes, clonal development of the true slime mould. Kerr & Sussman, 1958, **19,** 173.
Didymium nigripes, growth of myxamoebae in axenic culture. Kerr, 1963, **32,** 409.
Digestion, enzymic, chromatographic examination of products of plant pathogens. Smith, 1958, **18,** 42.
Dihydrostreptomycin and anaerobiosis—indirect evidence for two sites of action of dihydrostreptomycin. Williamson, 1958, **19,** 584.
Dimorphism in Mycobacteria. Csillag, 1961, **26,** 97.
2:4-Dinitrophenol, effect on orthophosphate accumulation in *Tetrahymena pyriformis*. Conner, Goldberg & Kornacker, 1961, **24,** 239.
2:4-Dinitrophenol, influence on phosphates in *Tetrahymena pyriformis*. Conner, Kornacker & Goldberg, 1961, **26,** 437.

Diphtheria, kinetics of toxin formation. Pappenheimer, Miller & Yoneda, 1962, **28,** 531.
Diploids, heterozygous, formation and segregation in *Penicillium chrysogenum.* Macdonald, Hutchinson & Gillett, 1963, **33,** 385.
Disaccharides, preparation of 3-ketoglycosides from. Bernaerts & De Ley, 1960, **22,** 129.
Disaccharides, structure of 3-ketoglycosides formed from. Bernaerts & De Ley, 1960, **22,** 137.
Discomycete *Dasyscyphus* sp., ascospores in. Moore & McAlear, 1962, **28,** 211.
Dispersal, splash, of fungus spores. Gregory, Guthrie & Bunce, 1959, **20,** 328.
Dissimilation, microbial, of galactomannan. Williams & Doetsch, 1960, **22,** 635.
Distribution of flagella in dividing bacteria. Bisset & Pease, 1957, **16,** 382.
Distribution of teichoic acid in staphylococci. Davison & Baddiley, 1963, **32,** 271.
Dose-mutation relationships in u.v.-induced reversion in *Escherichia coli.* Hill, 1963, **30,** 281.
Dose-response curves of toxic and infective actions of adenovirus in HeLa cell cultures. Pereira & Kelly, 1957, **17,** 517.
Droplets, action of chemical disinfectants on bacteria in, compared with that in large volumes. Valentine, 1957, **17,** 474.
Drug-resistance, infectious, in bacteria. Datta, 1963, **33,** xi.
Drug sensitivity tests on cultures of *Mycobacterium tuberculosis*, semi-solid agar media for. Knox & Woodroffe, 1957, **16,** 647.
Drugs, effect of bacterial ribonucleoprotein. Dagley, White, Wild & Sykes, 1962, **29,** 59.
Duodenum, chick, isolation of *Lactobacillus acidophilus* from. Ford & Rogosa, 1961, **25,** 249.
Dyes used to distinguish species of *Azotobacter.* Callao & Montoya, 1960, **22,** 657.

Earthworm, a microbiological study of casts. Parle, 1963, **31,** 13.
Earthworms, micro-organisms in intestines of. Parle, 1963, **31,** 1.
Eaton's primary atypical pneumonia organism, properties. Goodburn & Marmion, 1962, **29,** 271.
Eclipse of herpes simplex virus in chorio-allantois. Watkins, 1960, **22,** 40.
Ecology, *see also* Symposium **7.**
Ecology, observations on the flagellate transformation of *Naegleria gruberi.* Chang, 1958, **18,** 579.
Ecology of the amoeba stage of *Naegleria gruberi.* Chang, 1958, **18,** 565.
Edible bird-nest, haemagglutination inhibitor in. Biddle & Belyavin, 1963, **31,** 31.
Effect, bacteriostatic, in potato tubers. Jordana, 1958, **18,** xvi.
Effect of oxygen on denitrification. Jannasch, 1960, **23,** 55.
Egg, de-embryonated, biochemistry of influenza infection. Mills, 1958, **19,** 473.
Electron microscope, some unusual Chrysophyceae studied in. Harris & Bradley, 1958, **18,** 71.
Electron microscope study of the spores of some species of the genus *Bacillus* using carbon replicas. Bradley & Williams, 1957, **17,** 75.
Electron microscopy, assay of influenza virus particles by Tyrrell & Valentine, 1957, **16,** 668.
Electron microscopy of L-forms induced by penicillin in *Proteus vulgaris.* Pease, 1957, **17,** 64.
Electron microscopy of *Mycobacterium lepraemurium* and *M. leprae.* Rees, Valentine & Wong, 1960, **22,** 443.
Electron microscopy of *Streptomyces coelicolor.* Hopwood & Glauert, 1958, **18,** vi.
Electron microscopy of structure and replication of the trachoma agent. Armstrong, Valentine & Fildes, 1963, **30,** 59.
Electrophoresis of bacterial esterase systems. Norris, 1962, **28,** vii.
Embryo cells, chick, paths of phosphate transfer in, and in cells infected with vesicular stomatitis virus. Cooper, 1957, **17,** 335.
Endergonic processes, the nature of, in conjugation in *Escherichia coli* K-12. Fisher, 1957, **16,** 136.
Endocarditis, subacute, isolation of Corynebacterium and transitional forms. Wittler, Malizia, Kramer, Tuckett, Pritchard & Baker, 1960, **23,** 315.
Endosymbiote, bacterial, in osmotrophic flagellate. Newton, 1963, **32,** vi.
Endotoxin, effect on protein hypersensitivity and homologous protein. Kováts, 1963, **31,** x.
Endotoxin, interaction with cationic macromolecules. Mora & Young, 1961, **26,** 81.
Enterobacterium A 12, relationship to *Shigella boydii* 14. Carpenter, 1961, **26,** 535.
Enterococci, classification of *Streptococcus pluton* and its differentiation from. Bailey & Gibbs, 1962, **28,** 385.
Entodinium caudatum, preparation and survival of almost bacteria-free suspensions. Coleman, 1962, **28,** 271.
Envelopes, permeability, of *Staphylococcus aureus* to some salts, amino acids and non-electrolytes. Mitchell & Moyle, 1959, **20,** 434.
Environment, *see also* Symposium **11.**
Environment, control of development in *Dictyostelium discoideum.* Krichevsky & Wright, 1963, **32,** 195.
Environment, effect on NADP-specific glutamate dehydrogenase in *Neurospora crassa.* Barratt, 1963, **33,** 33.
Environment, effect on replication of poliovirus. Furness, 1961, **25,** 421.
Environment, influence on antigen production of *Pasteurella pestis.* Pirt, Thackeray & Harris-Smith, 1961, **25,** 119.
Enzyme activities of three factors of anthrax toxin. Stanley & Smith, 1963, **31,** 329.
Enzyme, cell-wall lytic, associated with spores of *Bacillus* species. Strange & Dark, 1957, **16,** 236.
Enzyme in *Pseudomonas aeruginosa*, induction and repression of. Brammar & Clarke, 1963, **32,** iii.
Enzyme induction and growth in *Escherichia coli*, stimulation by X-radiation of. Laser & Thornley, 1957, **17,** viii.
Enzyme levels in mice infected with viruses. Mahy, Parr & Rowson, 1963, **32,** i.
Enzyme, neuraminidase, inhibition by antibody. Ada, Lind & Laver, 1963, **32,** 225.
Enzyme, qualitatively altered, in a *Neurospora crassa* mutant. Fincham, 1957, **16,** iv.
Enzyme, tyrosine, of *Neurospora crassa*, activation and thermostability. Gest & Horowitz, 1958, **18,** 64.

Enzymes, amino acid requirements of reductive amination system. Shah & King, 1959, **20,** 78.
Enzymes, autolytic, in preparation of Gram-negative cell walls. Weidel, Frank & Leutgeb, 1963, **30,** 127.
Enzymes, effect of growth conditions on activity in *Staphylococcus aureus*. Collins & Lascelles, 1962, **29,** 531.
Enzymes, evidence for occurrence of permeases for tricarboxylic acid cycle intermediates in *Pseudomonas aeruginosa*. Clarke & Meadow, 1959, **20,** 144.
Enzymes, formation in *Escherichia coli* inhibited by phage T2r$^+$. Levin & Burton, 1961, **25,** 307.
Enzymes, formation of isocitratase in Athiorhodaceae. Kornberg & Lascelles, 1960, **23,** 511.
Enzymes, formation of ribulose 1:5-diphosphate carboxylase in Athiorhodaceae. Lascelles, 1960, **23,** 499.
Enzymes, inducible, repression in Pseudomonas. Rosenberger & Shilo, 1963, **31,** 413.
Enzymes, induction in three lactic acid bacteria. Nathan, 1961, **25,** 415.
Enzymes in *Escherichia coli*, induction of galactose pathway. Jordan & Yarmolinsky, 1963, **30,** 357.
Enzymes, in extracts of a non-capsulated strain of pneumococcus concerned with uridine pyrophosphoglycosyl metabolism. Smith *et al.*, 1959, **20,** 654.
Enzymes in *Neurospora crassa*, effects of molybdenum, copper and iron on. Nicholas & Commissiong, 1957, **17,** 699.
Enzymes, involved in pyrimidine synthesis and amino acid metabolism in *Escherichia coli*, formation. Sheinin, 1958, **19,** 365.
Enzymes, localization in *Bacillus megaterium* strain M. Weibull, Beckman & Bergström, 1959, **20,** 519.
Enzymes, lysis of micro-organisms by lysozyme. Salton, 1958, **18,** 481.
Enzymes, observations on catalase and peroxidase in mycobacteria. Winder, 1959, **20,** v.
Enzymes of histidine biosynthesis in *Salmonella typhimurium*, genetic control. Ames, Garry & Herzenberg, 1960, **22,** 369.
Enzymes, pectic, production by plant pathogens and other bacteria. Smith, 1958, **18,** 33.
Enzymes, proteolytic, from *Clostridium histolyticum* filtrates. MacLennan, Mandl & Howes, 1958, **18,** 1.
Enzymes, reversible, bicarbonate-induced, during morphogenesis in Blastocladiella. Lovett & Cantino, 1961, **24,** 87.
Enzymes, synthesis, bacteriochlorophyll formation. Lascelles, 1960, **23,** 487.
Enzymes, transaminases, in uredospores of *Puccinia helianthi*. Smith, 1963, **30,** 35.
Enzymic conversion of the tartaric acids to oxaloacetic acid. Shilo, 1957, **16,** 472.
Enzymic lysis of group A streptococci. Maxted & Gooder, 1958, **18,** xiii.
Eperythrozoon coccoides, fatal effect of some bacterial toxins on mice infected with. Gledhill, 1958, **18,** xvii.
Eperythrozoon coccoides, propagation and preservation of. Seamer, 1959, **21,** 344.
Eremothecium ashbyi, maintenance of. Hošťálek, 1957, **17,** 267.
Eremothecium ashbyi strain-producing riboflavin, properties of. Stárka, 1957, **17,** iv.
Eremothecium ashbyi, the physiology of riboflavin production by. Kapralek, 1962, **29,** 403.
Erysiphe graminis, effects of ultraviolet radiation on the pathogenicity of. Buxton, Last & Nour, 1957, **16,** 764.
Erythritol, effect on *Brucella abortus*, and infections with *Brucella melitensis* and *Brucella suis*. Williams, Keppie & Smith, 1963, **31,** xxiii.
Erythritol, metabolism by *Brucella abortus*. Anderson & Smith, 1963, **31,** xxiii.
Erythromycin, mutations endowing Pneumococcus with resistance to. Ravin & Iyer, 1961, **26,** 277.
Escherichia coli, ampicillin inactivation and sensitivity of. Ayliffe, 1963, **30,** 339.
Escherichia coli, a new infective factor controlling sex compatibility and gene recombination in. Bernstein, 1957, **16,** iii.
Escherichia coli, catabolism of cystathionine by. Wijesundera & Woods, 1962, **29,** 353.
Escherichia coli, cell division and reproduction of bacteriophage. Stárka, 1962, **29,** 83.
Escherichia coli, cell-wall precursors. Lilly, 1962, **28,** ii.
Escherichia coli, cobalamin and the synthesis of methionine by cell-free extracts of. Helleiner, Kisliuk & Woods, 1958, **18,** xv.
Escherichia coli containing 5-bromouracil in its DNA, ultraviolet irradiation of. Greer, 1960, **22,** 618.
Escherichia coli, control of methylation of homocysteine in. Foster, Rowbury & Woods, 1963, **31,** xix.
Escherichia coli, cycles of resistance and their bearing on variations in resistance in cultures. Sinai & Yudkin, 1959, **20,** 384.
Escherichia coli, dose-mutation relationships in u.v.-induced reversions. Hill, 1963, **30,** 281.
Escherichia coli, effect of glucose on production of H_2S from cysteine. Anderson & Johansson, 1963, **30,** 485.
Escherichia coli, effect of growth-rate on the anatomy of. Perret, 1958, **18,** vii.
Escherichia coli, effect of inorganic ions on respiration in. Miller & Avi-Dor, 1958, **18,** 221.
Escherichia coli, effect of β-mercaptoethylamine and oxygen on X-ray sensitivity. Cromroy & Adler, 1962, **28,** 431.
Escherichia coli, effect of sudden chilling. Meynell, 1958, **19,** 380.
Escherichia coli, effect of temperature on natural mutation in. Ryan & Kiritani, 1959, **20,** 644.
Escherichia coli, establishment of lysogeny in. Fry & Gros, 1958, **18,** x.
Escherichia coli, F-curing by acridine orange in. Stouthamer & De Haan, 1963, **31,** xii.
Escherichia coli, form and structure of cellular aggregations. Hoffman & Frank, 1961, **25,** 353.
Escherichia coli, formation of enzymes involved in pyrimidine synthesis and amino acid metabolism in. Sheinin, 1958, **19,** 365.
Escherichia coli, formation of the vegetative pool by induced defective and healthy lysogenic strains of. Whitfield & Appleyard, 1957, **17,** 453.
Escherichia coli, freeze-dried, effect of oxygen. Lion & Bergmann, 1961, **24,** 191.
Escherichia coli, freeze-dried, protection against effect of oxygen. Lion, 1963, **32,** 321.
Escherichia coli, growth inhibitors and their antagonists as mutagens and antimutagens in. Greer, 1958, **18,** 543.
Escherichia coli in continuous culture, effect of environmental factors. Maclean & Munson, 1961, **25,** 17.

Escherichia coli, induction of galactose pathway enzymes in. Jordan & Yarmolinsky, 1963, **30,** 357.
Escherichia coli, infection with lambda (λ_{22}) phage. Fry, 1963, **31,** 297.
Escherichia coli, infection with lambda phage and establishment of lysogeny. Fry, 1959, **21,** 676.
Escherichia coli, inhibition of enzymes with phage $T2r^+$. Levin & Burton, 1961, **25,** 307.
Escherichia coli, inter-relationships of serine, glycine and vitamin B_6 in the growth of mutants of. Morris & Woods, 1959, **20,** 576.
Escherichia coli, in the excystment of *Schizopyrenus russelli*. Singh, Mathew & Anand, 1958, **19,** 104.
Escherichia coli, isolation of Lac^+ mutants from a Lac^- strain of, by the replica plating technique. Banič, 1958, **18,** 586.
Escherichia coli, K-12, conjugal transfer of immunity to phage λ. Fisher, 1962, **28,** 711.
Escherichia coli K-12, nature of the endergonic processes in conjugation in. Fisher, 1957, **16,** 136.
Escherichia coli K-12, role of the Krebs cycle in conjugation in. Fisher, 1957, **16,** 120.
Escherichia coli, kinetics of the mating process in. Hayes, 1957, **16,** 97.
Escherichia coli, long forms, nature and radiation sensitivity. Munson & Maclean, 1961, **25,** 29.
Escherichia coli, lysogeny and coliciongeny. Papavassiliou, 1961, **25,** 409.
Escherichia coli, metabolic activities during the establishment of lysogeny. Fry & Gros, 1959, **21,** 685.
Escherichia coli, metabolism of DNA infected with bacteriophage T5. Crawford, 1958, **19,** iii.
Escherichia coli, metabolism of glycyl-L-leucine in. Meisler & Simmonds, 1963, **31,** 109.
Escherichia coli mutant, amino acid-amino sugar-lipid complexes accumulating in the growth medium of. Meadow, 1958, **18,** iii.
Escherichia coli, mutant of, requiring methionine and lysine. Back & Westaway, 1962, **27,** 41.
Escherichia coli mutants, resistance to mitomycin C. Greenberg, Mandell & Woody, 1961, **26,** 509.
Escherichia coli, mutational alteration of the tryptophan synthetase. Gibson, Gibson & Yanofsky, 1961, **24,** 301.
Escherichia coli, occurrence of the fertility factor F in wild strains of. Furness, 1957, **17,** xii.
Escherichia coli, oxidative activities during inhibition by streptomycin. Hancock, 1961, **25,** 429.
Escherichia coli, penicillin induced lysis in. Boman & Eriksson, 1963, **31,** 339.
Escherichia coli, penicillinase and ampicillin resistance in. Smith, 1963, **30,** 299.
Escherichia coli precursor of methionine. Rowbury, 1962, **28,** v.
Escherichia coli, presence of the transmissible agent F in non-recombining strains of. Furness & Rowley, 1957, **17,** 550.
Escherichia coli, protection of lyophilized cells against oxygen. Lion & Bergmann, 1961, **25,** 291.
Escherichia coli, radiation-induced mutation and inactivation in. Bridges, 1963, **31,** 405.
Escherichia coli, radiosensitivity in. Greenberg & Woody-Karrer, 1963, **33,** 283.
Escherichia coli, regulation of flavin synthesis. Wilson & Pardee, 1962, **28,** 283.
Escherichia coli, repression of methionine synthesis. Rowbury & Woods, 1961, **24,** 129.
Escherichia coli, role of folic acid in the synthesis of methionine by: effect of cobalamin in the growth medium. Kisliuk & Woods, 1958, **18,** xv.
Escherichia coli, site of zygote formation in. Bernstein, 1958, **18,** viii.
Escherichia coli, size of organisms and optical density. Bernheim, 1963, **30,** 53.
Escherichia coli, spontaneous mutation in spheroplasts. Ryan, Okada & Nagata, 1963, **30,** 193.
Escherichia coli, spontaneous mutation to proflavine resistance in. Thornley & Yudkin, 1959, **20,** 365.
Escherichia coli, stimulation by X-radiation of enzyme induction and growth in. Laser & Thornley, 1957, **17,** viii.
Escherichia coli strain B, action of chloramphenicol on protein and nucleic acid synthesis by. Harrington, 1958, **18,** 767.
Escherichia coli strain B, growth and survival after irradiation. Alper & Gillies, 1960, **22,** 113.
Escherichia coli strain B, radiosensitive and radioresistant mutants. Hill & Simson, 1961, **24,** 1.
Escherichia coli strain B, 'restoration' after irradiation: dependence on suboptimal growth conditions. Alper & Gillies, 1958, **18,** 461.
Escherichia coli strain B, the rigid layer of its cell wall. Weidle, Frank & Martin, 1960, **22,** 158.
Escherichia coli strain B, transfer of motility and tyrosine requirement by recombination with *E. coli* strain K12. Furness, 1958, **18,** 782.
Escherichia coli strain 26-26, accumulation of nucleotides. Lilly, Clarke & Meadow, 1963, **32,** 103.
Escherichia coli, streptomycin dependence. Spotts, 1962, **28,** 347.
Escherichia coli, suppression of methionine synthesis in. Wijesundera & Woods, 1960, **22,** 229.
Escherichia coli, survival on drying and rehydration. Record, Taylor & Miller, 1962, **28,** 585.
Escherichia coli, synthesis of vitamin B_6 by some mutant strains of. Morris, 1959, **20,** 597.
Escherichia coli, the stability of reversions from auxotrophy in. Hill, 1963, **30,** 289.
Escherichia coli, training and reversion in. Thornley & Yudkin, 1959, **20,** 355.
Escherichia coli, transformation of proflavine resistance in. Sinai & Yudkin, 1959, **20,** 400.
Escherichia coli, utilization of L-glutamic and 2-oxoglutaric acid as source of carbon. Halpern & Umbarger, 1961, **26,** 175.
Escherichia coli, vitamin B_6 and glycine in the synthesis of methionine by. Wijesundera, Cross & Woods, 1960, **22,** 787.
Esterase systems as an aid to taxonomy. Norris, 1962, **28,** vii.
Ethanol and acetate oxidation by *Euglena gracilis*. Wilson & Danforth, 1958, **18,** 535.
L-Ethionine, effect on growth of brewers' yeast. Maw, 1961, **25,** 441.
S-Ethyl-L-cysteine, effect on growth of brewers' yeast. Maw, 1961, **25,** 441.
N-Ethylmaleimide, effect on radiation sensitivity of bacteria. Bridges, 1961, **26,** 467.
Euglena gracilis, bleaching agent for. Aaronson & Bensky, 1962, **27,** 75.

Euglena gracilis, decline in cellular content during logarithmic growth. Beutow & Levedahl, 1962, **28,** 579.
Euglena gracilis, endogenous metabolism. Danforth & Wilson, 1961, **24,** 95.
Euglena gracilis, extent of acetate and ethanol oxidation by. Wilson & Danforth, 1958, **18,** 535.
Excystment of *Schizopyrenus russelli*, role of *Aerobacter* sp., *Escherichia coli* and certain amino acids. Singh, Mathew & Anand, 1958, **19,** 104.
Exosporium, specific reaction of *Bacillus megaterium*. Tomcsik & Baumann-Grace, 1959, **21,** 666.
Exudate of pea root, effects on antagonism of micro-organisms towards *Fusarium oxysporum*. Buxton, 1960, **22,** 678.

F agent, the presence of the transmissible, in non-recombining strains of *Escherichia coli*. Furness & Rowley, 1957, **17,** 550.
Family, new, Simonsiellaceae. Steed, 1962, **29,** 615.
Farmer's lung disease, mycological examination of dust from mouldy hay. Gregory & Lacey, 1963, **30,** 75.
Fatty acid requirement by *Pityrosporum ovale*. Shifrine & Marr, 1963, **32,** 263.
Fatty acids for mycoplasmas. Razin & Rottem, 1963, **33,** 459.
Faults and fallacies in microbiology. The fourth Marjory Stephenson Memorial Lecture. Wilson, 1959, **21,** 1.
Fermentation, submerged, development of the culture of *Streptomyces rimosus* in. Doskočil *et al.*, 1958, **18,** 302.
Fertility factor F in wild strains of *Escherichia coli*, occurrence of. Furness, 1957, **17,** xii.
Film. Flagella of spirilla. Pijper, 1957, **16,** xi.
*Film. The action of antibiotics on bacteria. Hughes, 1959, **21,** ix.
*Film. The swarming of *Proteus vulgaris*. Hughes, 1957, **16,** xi.
Fimbriae and adhesive properties in Klebsiella strains. Duguid, 1959, **21,** 271.
Fimbriae and haemagglutinating activity in *Proteus hauseri*. Shedden, 1962, **28,** 1.
Fimbriae, structure by negative staining technique in electron microscope. Thornley & Horne, 1962, **28,** 51.
Fimbriative properties of coli-aerogenes bacteria. List & James, 1963, **31,** ii.
Finnock, disease due to *Vibrio anguillarum*. Smith, 1961, **24,** 247.
Flagella, bacterial, effect on shape by formaldehyde. Leifson, 1961, **25,** 131.
Flagella, bacterial, purification by ion exchange chromatography. Martinez, 1963, **33,** 115.
Flagella, complex phases in Salmonella. Douglas & Edwards, 1962, **29,** 367.
Flagella, development and growth in motile Gram-positive cocci. Hale & Bisset, 1958, **18,** 688.
Flagella, distribution of, in dividing bacteria. Bisset & Pease, 1957, **16,** 382.
Flagella, effects on motility of removal and regeneration. Stocker & Campbell, 1959, **20,** 670.
Flagella, electron microscope study of vibrio. Follett & Gordon, 1963, **32,** 235.
Flagella, inhibitors on formation by *Salmonella typhimurium*. Kerridge, 1960, **23,** 519.
Flagella, isolation from *Crithidia* (*Strigomonas*) *oncopelti*. Chesters, 1963, **31,** xxiv.
Flagella, mutants in Salmonella. Iino, 1962, **27,** 167.
Flagella, synthesis of, by amino acid requiring mutants of *Salmonella typhimurium*. Kerridge, 1959, **21,** 168.
Flagellar pattern and growth of *Bacillus* spp. Bisset & Hale, 1960, **22,** 536.
Flagellar synthesis in *Salmonella typhimurium*. Kerridge, 1963, **33,** 63.
Flagellate, *Ochromonas malhamensis*, influence of vitamin B_{12} on growth rate and cell composition. Ford & Goulden, 1959, **20,** 267.
Flagellate, osmotrophic, a bacterial endosymbiote in an. Newton, 1963, **32,** vi.
Flagellate, parasitic, ribonucleoprotein-containing structures in the cytoplasm of a. Newton, 1957, **17,** iii.
Flagellate, parasitic, *Strigomonas* (*Herpetomonas*) *oncopelti*, nutritional requirements and biosynthetic capabilities of. Newton, 1957, **17,** 708.
Flagellate, transformation of *Naegleria gruberi*, cytological and ecological observations. Chang, 1958, **18,** 579.
Flagellates, toxic marine; their occurrence and physiological effects on animals. Ballantine & Abbott, 1957, **16,** 274.
Flagellation to non-flagellation in *Salmonella typhimurium*. Quadling & Stocker, 1962, **28,** 257.
Flagellin, incorporation of ^{14}C labelled methionine. Kerridge, 1963, **31,** xxiv.
Flatfish, occurrence and distribution of bacterial types on. Liston, 1957, **16,** 205.
Flavin synthesis, regulation by *Escherichia coli*. Wilson & Pardee, 1962, **28,** 283.
Flavobacteria, studies on marine. Hayes, 1963, **30,** 1.
Flavobacterium aquatile, nutrition of. Weeks & Beck, 1960, **23,** 217.
Flavobacterium, pectolytic, from soil. Dorey, 1959, **20,** 91.
Flavobacterium peregrinum, the metabolism of 2:4-D and MCPA by a strain of. Steenson & Walker, 1957, **16,** 146.
Flavobacterium, some properties of a pectolytic soil. Dorey, 1957, **16,** x.
Flavobacterium sp., decomposition of dichlorophenoxybutyrate by. MacRae, Alexander & Rovira, 1963, **32,** 69.
Flavobacterium, taxonomy. Floodgate & Hayes, 1963, **30,** 237.
Flavoprotein photoreceptor in phycomyces. Carlile, 1962, **28,** 161.
Flocculation of suspended matter by *Paramecium caudatum*. Curds, 1963, **33,** 357.
Flora, bacterial, of the skin of North Sea cod. Georgala, 1958, **18,** 84.
Flora, intestinal yeast, of horses, sheep, goats and swine. van Uden, Carmo Sousa & Farinha, 1958, **19,** 435.
Flora, oral, classification of the filamentous bacteria form. Davis & Baird-Parker, 1959, **21,** 612.
Fluorescence, immuno, in identification of *Haemophilus vaginalis*. Redmond & Kotcher, 1963, **33,** 89.
Fluorescent antibodies, studies on the antigens of *Paramecium aurelia* with the aid of. Beale & Kacser, 1957, **17,** 68.
Fluorescent antibodies, studies on the identification of rumen bacteria with. Hobson & Mann, 1957, **16,** 463.
Fluorescent antibody studies with herpes simplex virus in unfixed preparations of trypsinized tissue cultures. O'Dea & Dineen, 1957, **17,** 19.

5-Fluoro-uracil, effects on Rous sarcoma infection *in vitro*. Fairman, 1959, **20,** ii.
Folic acid, influence on serine synthesis in Tetrahymena. Dewey & Kidder, 1960, **22,** 72.
Foot-and-mouth disease in culture, multiplication of the virus of. Cartwright, Pay & Henderson, 1957, **16,** 730.
Foot-and-mouth disease, virus, applications of detergents. Cartwright & Thorne, 1959, **20,** 61.
Formaldehyde, effect on shape of bacterial flagella. Leifson, 1961, **25,** 131.
Formation of incomplete forms of fowl plague virus. Rott & Scholtissek, 1963, **33,** 303.
Formation of mixtures of antibiotics by Actinomycetes from soil. Vaněk, Doležilová & Řeháček 1958, **18,** 649.
Forms, involution, of the bifid bacteria. Sundman & Björksten, 1958, **19,** 491.
Freeze-drying over a ten-year period, damage and survival of bacteria. Harrison & Pelczar, 1963, **30,** 395.
Frog brain, fixation of tetanus toxin by. van Heyningen & Woodman, 1963, **31,** 389.
Frogs, action of tetanus toxin in. Rowson, 1961, **25,** 315.
Fuligo septica, cultivating, fruiting and germination. Scholes, 1962, **29,** 137.
Fumarate permeases of *Mycobacterium smegmatis*. Ellard & Clarke, 1959, **21,** 338.
Fungi, air-spora of. Lacey, 1962, **29,** 485.
Fungi, cells, [^{14}C] glucose metabolism in. Moses, 1959, **20,** 184.
Fungi, choline sulphate in. Harada & Spencer, 1960, **22,** 520.
Fungi, dry liberation of spores by raindrops. Hirst & Stedman, 1963, **33,** 335.
Fungi grown in submerged culture, sulphydryl metabolism of. Robson & Stockley, 1962, **28,** 57.
Fungi in soil, effect of spore germination and development on plate counts of. Hack, 1957, **17,** 625.
Fungi in the air of hospital wards. Noble & Clayton, 1963, **32,** 397.
Fungi, Memnionella-Stachybotrys group, morphogenesis and nutrition in. McQuade, 1963, **30,** 429.
Fungi, replica plating technique for isolation of nutritionally exacting mutants of a filamentous fungus (*Aspergillus nidulans*). Roberts, 1959, **20,** 540.
Fungi, soil, metabolism of methoxylated aromatic compounds by. Henderson, 1957, **16,** 686.
Fungi, splash dispersal of fungus spores. Gregory, Guthrie & Bunce, 1959, **20,** 328.
Fungi, the membrane filter as an aid in the cultivation and identification of. Funder & Johannessen, 1957, **17,** 117.
Fungi, translocation of ^{137}caesium and ^{60}cobalt in. Grossbard & Stranks, 1959, **20,** iv.
Fungi, yeast-like, from soil, metabolism of aromatic compounds related to lignin. Henderson, 1961, **26,** 155.
Fungi, yeast-like, isolation from soil. Henderson, 1961, **26,** 149.
Fungistasis in Nigerian soils. Jackson, 1958, **18,** 248.
Fungistasis in soil. Lingappa & Lockwood, 1961, **26,** 473.
Fungistasis of soil. Jackson, 1958, **19,** 390.
Fungus, hop-wilt, genetic recombination in. Hastie, 1962, **27,** 373.
Fusarium caeruleum, toxicity of solanine and related alkaloids to. McKee, 1959, **20,** 686.
Fusarium roseum, xylanases of. Gascoigne & Gascoigne, 1960, **22,** 242.
Fusiformis nigrescens, growth promoting activity of compounds of the vitamin K group and analogues for a rumen strain of. Lev, 1959, **20,** 697.
Fusobacteria from human mouth. Baird-Parker, 1960, **22,** 458.

Galactomannan, microbial dissimilation of. Williams & Doetsch, 1960, **22,** 635.
Galactosamine produced from lactic acid bacteria. Blumenthal, Shiota, McCann & Disraely, 1961, **24,** 81.
D-Galactose metabolism in *Aspergillus nidulans*. Roberts, 1963, **31,** 285.
Galactose pathway enzymes in *Escherichia coli*. Jordan & Yarmolinsky, 1963, **30,** 357.
Gamma radiation, effect of chemical modifiers in *Escherichia coli*. Bridges, 1963, **31,** 405.
Ganglioside, fixation of tetanus toxin. van Heyningen & Miller, 1961, **24,** 107.
Ganglioside, fixation of tetanus toxin, strychnine and serotonin. van Heyningen, 1963, **31,** 375.
Ganglioside, tetanus toxin fixation and influenza virus inhibition by. Bernheimer & van Heyningen, 1961, **24,** 121.
Gas, differential effect of temperature on production, by a coliform. Hopton, 1958, **19,** 507.
Gas production, detection of, from glucose by heterofermentative lactic acid bacteria. Hayward, 1957, **16,** 9.
Gel diffusion precipitin tests, preliminary study of tobacco mosaic virus by. Kleczkowski, 1957, **16,** 405.
Gel diffusion studies on serotype and serotype transformation in Paramecium. Balbinder & Preer, 1959, **21,** 156.
Gelasinospora tetrasperma, the oxidases of, in relation to the endogenous respiration. Boulter, 1957, **16,** 305.
Gelatin liquefaction: a microtest. Thirst, 1957, **17,** 396.
Gelatinase, *Clostridium histolyticum*, serological evidence for. Mandl & Zaffuto, 1958, **18,** 13.
Gene, controlled resistance and sensitivity to caffeine and nicotine in saccharomyces. Lindegren, Lindegren & Desborough, 1959, **20,** 504.
Generation times, bacterial, an outline of the pattern of. Powell, 1958, **18,** 382.
Generation times of individual bacteria. Powell & Errington, 1963, **31,** 315.
Genes, temperature sensitive, affecting conidiation in Neurospora. Grigg, 1960, **22,** 667.
Genetic analysis of the development of serum resistance in an influenza virus strain. Edney, 1957, **17,** 25.
Genetic control of histidine enzymes in *Salmonella typhimurium*. Ames, Garry & Herzenberg, 1960, **22,** 369.
Genetic studies; arginine synthesis in *Neurospora crassa*. Newmeyer, 1957, **16,** 449.
Genetics, *see also* Symposium **10.**
Genetics, *am* locus of *Neurospora crassa*, glutamic dehydrogenase produced by interallele complementation at. Fincham, 1959, **21,** 600.
Genetics, analysis of carbohydrate ultilization in *Aspergillus nidulans*. Roberts, 1963, **31,** 45.
Genetics, apparent self-fertility in *Neurospora crassa*. Martin, 1959, **20,** 213.
Genetics, bacterial mutation in a stationary phase and the question of cell turnover. Ryan, 1959, **21,** 530.
Genetics, basis of actidione resistance in Neurospora. Hsu, 1963, **32,** 341.

Genetics, control of conidiation in a heterokaryon of *Neurospora crassa*. Grigg, 1958, **19,** 15.
Genetics, control of penicillin and chrysogenin production in *Penicillium chrysogenum*. Macdonald, Hutchinson & Gillett, 1963, **33,** 375.
Genetics, formation of methionine by a methionine-requiring mutant. Strauss & Minagawa, 1959, **20,** 237.
Genetics, gene modifying thiamine-requirement of *Neurospora crassa*. Eberhart & Tatum, 1959, **20,** 43.
Genetics, heterokaryotic compatibility in Streptomyces. Braendle, Gardiner & Szybalski, 1959, **20,** 442.
Genetics, inter-relationships of alleles in *Neurospora crassa*. Pateman, 1960, **23,** 393.
Genetics, lethal suppressive cytoplasms in aged clones of *Aspergillus glaucus*. Jinks, 1959, **21,** 397.
Genetics, method for obtaining unordered Neurospora tetrads. Strickland, 1960, **22,** 583.
Genetics, mutants of *Verticillium albo-atrum*. Buxton & Hastie, 1962, **28,** 625.
Genetics of colicinogenic factors E_2, I and V. de Zwaig, Anton & Puig, 1962, **29,** 473.
Genetics of cysteineless mutants of *Salmonella typhimurium*. Clowes, 1958, **18,** 154.
Genetics of methionineless mutants of *Salmonella typhimurium*. Smith, 1961, **24,** 335.
Genetics of *Neurospora crassa*, genes influencing conversion of citrulline to argininosuccinate. Newmayer, 1962, **28,** 215.
Genetics of parental flagella at cell division in *Salmonella typhimurium*. Quadling & Stocker, 1962, **28,** 257.
Genetics of penicillinase formation. Novick, 1963, **33,** 121.
Genetics of *Penicillium chrysogenum*. Macdonald, Hutchinson & Gillet, 1963, **33,** 385.
Genetics of Pneumococcus. Ravin & Iyer, 1961, **26,** 277.
Genetics of sulphate assimilation in *Aspergillus nidulans*. Nakamura, 1962, **27,** 221.
Genetics, phenotypic alterations in phage carrier state of *Shigella dysenteriae*. Li, Barksdale & Garmise, 1961, **24,** 355.
Genetics, ploidal inheritance in *Dictyostelium discoideum*. Sussman & Sussman, 1962, **28,** 417.
Genetics, preferential compatibility in *Streptomyces violaceoruber*. Bradley & Anderson, 1960, **23,** 231.
Genetics, recombination in *Actinomyces aureofaciens*. Alikhanian & Borisova, 1961, **26,** 19.
Genetics, recombination in hop-wilt fungus *Verticillium albo-atrum*. Hastie, 1962, **27,** 373.
Genetics, recombination in *Vibrio cholerae*. Bhaskaran, 1958, **19,** 71.
Genetics, reversion of transduced antigenic characters in *Salmonella typhimurium*. Spicer & Datta, 1959, **20,** 136.
Genetics, segregation of diploid strains in *Dictyostelium discoideum*. Sussman & Sussman, 1963, **30,** 349.
Genetics, selection for adaptability to new environments in *Aspergillus glaucus*. Jinks, 1959, **20,** 223.
Genetics, sexual polarity in Streptomyces. Sermonti & Casciano, 1963, **33,** 293.
Genetics, the 'lethal zygote' produced by crossing non-colicinogenic with colicinogenic bacteria. Ben-Gurion, 1963, **30,** 173.
Genetics, transduction in *Proteus mirabilis*. Coetzee, 1963, **33,** 1.
Genetics, transduction in *Salmonella typhimurium*. Hubáček, 1963, **33,** 205.
Genetics, transduction of Streptomycin resistance in *Proteus mirabilis*. Coetzee & Sacks, 1960, **23,** 445.
Genetics, transmission of *col I* in *Salmonella typhimurium*. Smith, Ozeki & Stocker, 1963, **33,** 231.
Gen.nov., *Waksmania*, a new genus of the Actinomycetales. Lechevalier & Lechevalier, 1957, **17,** 104.
Genus *Micrococcus*, taxonomy. Kocur & Martinec, 1962, **28,** vi.
Genus, new, of Actinomycetales: *Microellobosporia* gen. nov. Cross, Lechevalier & Lechevalier, 1963, **31,** 421.
Genus, new, *Thiodendron mucosum*. Lackey & Lackey, 1961, **26,** 29.
Genus *Spirillum*, description of a new species. Pretorius, 1963, **32,** 403.
Germination, changes occurring in the composition of *Aspergillus nidulans* conidia during. Shepherd, 1957, **16,** i.
Germination of Bacillus spores under alkaline conditions. Chislett & Kushner, 1961, **25,** 151.
Germination of *Botrytis cinerea* conidia. Hawker & Hendy, 1963, **33,** 43.
Germination of microcysts in *Myxococcus xanthus*, the formation and. Dworkin & Voelz, 1962, **28,** 81.
Germination, swelling of bacterial spores during outgrowth and. Hitchins, Gould & Hurst, 1963, **30,** 445.
Gluconobacter and acetobacter, carbohydrate metabolism and phylogenetic relationship. De Ley, 1961, **24,** 31.
Gluconobacter liquefaciens, classification of a strain of. Kimmitt & Williams, 1963, **31,** 448.
Glucose, detection of gas production from, by heterofermentative lactic acid bacteria. Hayward, 1957, **16,** 9.
Glucose, effect on the production of H_2S from cysteine by *Escherichia coli*. Anderson & Johansson, 1963, **30,** 485.
Glucose, [^{14}C] metabolism in fungal cells. Moses, 1959, **20,** 184.
Glucose metabolism in *Zygorrhynchus moelleri*. Bartlett & Moses, 1957, **16,** 550.
Glucose, stimulation by CO_2 of *Trichophyton mentagrophytes* metabolism. Chin & Knight, 1963, **30,** 121.
Glutamate in growth of *Salmonella typhimurium*. Maaløe & Richmond, 1962, **27,** 269.
Glutamic acid, breakdown and biosynthesis. Hoare, 1963, **32,** 157.
Glutamic acid producing Arthrobacter species. Veldkamp, 1963, **31,** viii.
L-Glutamic acid, source of carbon for *Escherichia coli*. Halpern & Umbarger, 1961, **26,** 175.
Glutamic dehydrogenase from *Neurospora crassa*. Nicholas & Mabey, 1960, **22,** 184.
Glutamic dehydrogenase produced by interallele complementation of *Neurospora crassa*. Fincham, 1959, **21,** 600.
Glutamine synthesis, basic triphenylmethane dyes and the inhibition of, by *Staphylococcus aureus*. Fry, 1957, **16,** 341.
Glyceride, hydrolysis in sheep rumen. Garton, Lough & Vioque, 1961, **25,** 215.
Glycerol, fermentation in sheep rumen. Garton, Lough & Vioque, 1961, **25,** 215.
Glycerol in the nutrition of *Mycoplasma mycoides*. Rodwell & Abbot, 1961, **25,** 201.

Glycine, autoradiographic studies of the differential incorporation by *Paramecium aurelia*. Butzel & van Wagtendonk, 1963, **30,** 503.
Glycine, effect on induction of L-phase. Michel & Hijmans, 1960, **23,** 35.
Glycine, influence on serine synthesis in Tetrahymena. Dewey & Kidder, 1960, **22,** 72.
Glycine in the synthesis of methionine by *Escherichia coli*. Wijesundera, Cross & Woods, 1960, **22,** 787.
Glycine metabolism and methionine. Bull & Woods, 1963, **31,** xxiv.
Glycine, serine and vitamin B_6, inter-relationships, in the growth of mutants of *Escherichia coli*. Morris & Woods, 1959, **20,** 576.
Glycyl-L-leucine, metabolism in *Escherichia coli*. Meisler & Simmonds, 1963, **31,** 109.
Gram-negative bacilli obtained from a strain of *Staphylococcus aureus* in the presence of benzylpenicillin. Briggs *et al.*, 1957, **16,** 614.
Gram-negative bacteria, composition and distribution of rough somatic antigens in some. Davies, 1957, **17,** vi.
Gram-positive variants by *Azotobacter chroococcum*, production of. Bisset *et al.*, 1957, **16,** 572.
Gram reaction, quantitative analysis of the. Wensinck & Boevé, 1957, **17,** 401.
Gram stain and nature of the cell wall. Salton, 1963, **30,** 223.
Gram stain, relation of phosphorus-containing compounds. Jones, Rizvi & Stacey, 1958, **18,** 597.
Gram staining of *Bacillus megaterium*. Scherrer, 1963, **31,** 135.
Griseofulvin and its analogues, chemical structures and antifungal effects. Rhodes, 1963, **33,** vi.
Group G streptococci, animal strains of, and their serological typing. Laughton & Davies, 1957, **17,** 750.
Growing cultures of an *Aerobacter* species determined by means of the continuous culture technique, oxygen requirement of. Pirt, 1957, **16,** 59.
Growth, anaerobic, as a factor influencing radiosensitivity. Hodgkins & Alper, 1963, **30,** 307.
Growth and B_{12} vitamins of the flagellate *Ochromonas malhamensis*. Ford, 1958, **19,** 161.
Growth and flagellar development in motile Gram-positive cocci. Hale & Bisset, 1958, **18,** 688.
Growth and metabolism in plankton algae, relationships between. Fogg, 1957, **16,** 294.
Growth and nutrition of *Crithidia fasciculata*. Kidder & Dutta, 1958, **18,** 621.
Growth and oxygen consumption in micro-organisms. Whitaker & Elsden, 1963, **31,** xxii.
Growth and survival after irradiation of *Escherichia coli* strain B. Alper & Gillies, 1960, **22,** 113.
Growth and toxin production of *Corynebacterium diphtheriae* in submerged culture. Edwards, 1960, **22,** 698.
Growth, bacterial, a new kinetic model. Perrett, 1960, **22,** 589.
Growth, bacterial, determination of division rates *in vivo*. Meynell, 1959, **21,** v.
Growth, balanced, dependency on cell size and composition on medium and temperature in *Salmonella typhimurium*. Schaechter, Maaløe & Kjeldgaard, 1958, **19,** 592.
Growth, balanced, of *Salmonella typhimurium*, transition between physiological states during. Kjeldgaard, Maaløe & Schaechter, 1958, **19,** 607.
Growth, brewers' yeast, inhibition by L-ethionine. Maw, 1961, **25,** 441.
Growth, bulk, of animal cells in continuous suspension culture. Cooper, Wilson & Burt, 1959, **21,** 702.
Growth, cell and nuclear divisions in some bacteria. Schaechter, Williamson, Hood & Koch, 1962, **29,** 421.
Growth, conditions, suboptimal, 'restoration' of *Escherichia coli* strain B after irradiation. Alper & Gillies, 1958, **18,** 461.
Growth, cytology and ecology of the amoeba stage of *Naegleria gruberi*. Chang, 1958, **18,** 565.
Growth effect of asparagine on Pediococcus. Garvie, Gregory & Mabbitt, 1961, **24,** 25.
Growth, effect of rate and aeration on the respiratory system of a pseudomonad in continuous culture. Rosenberger & Kogut, 1958, **18,** ii.
Growth factor for *Trypanosoma cruzi*. Boné & Parent, 1963, **31,** 261.
Growth factors, iron-containing, and antibiotics. Burnham, 1963, **32,** 117.
Growth, heterotrophic, of *Chlorella pyrenoidosa*. Samejima & Myers, 1958, **18,** 107.
Growth idiosyncrasies of some *Bordetella pertussis* strains, and intracerebral virulence of these strains in mice. Brown, 1959, **20,** 532.
Growth, inhibition of *Tetrahymena piriformis* by certain steroids. Connor, 1959, **21,** 180.
Growth, inhibitors and their antagonists as mutagens and antimutagens in *Escherichia coli*. Greer, 1958, **18,** 543.
Growth, kinetics of bacterial, relationship between population density and specific growth rate of continuous cultures. Contois, 1959, **21,** 40.
Growth, measurement of generation time of individual bacteria. Powell & Errington, 1963, **31,** 315.
Growth, medium of a mutant of *Escherichia coli*, effect of cobalamin in. Kisliuk & Woods, 1958, **18,** xv.
Growth, molar, yields of bacteria and yeasts. Bauchop, 1958, **18,** vii.
Growth of aberrant forms of *Mycobacterium phlei*. Juhasz, 1962, **28,** 9.
Growth of *Acanthamoeba* sp. in a chemically defined medium. Adam, 1959, **21,** 519.
Growth of *Actinomyces israelii* in a chemically defined medium. Keir & Porteous, 1962, **28,** 193.
Growth of *Actinomyces israelii* in simplified medium. Christie & Porteous, 1962, **28,** 443.
Growth of almost bacteria-free *Entodinium caudatum*. Coleman, 1962, **28,** 271.
Growth of a red-pigmented marine blue-green alga, *Phormidium persicinum*. Pintner & Provasoli, 1958, **18,** 190.
Growth of *Bacillus anthracis* in the guinea pig and on the formation of virulence-determining factors, effect of metabolite analogues on. Tempest & Smith, 1957, **17,** 739.
Growth of *Bacillus circulans* in highly alkaline conditions. Chislett & Kushner, 1961, **24,** 187.
Growth of *Bacillus larvae*. Bailey & Lee, 1962, **29,** 711.
Growth of *Bacillus* spp. and flagellar pattern. Bisset & Hale, 1960, **22,** 536.

Growth of bacteria in animals estimated by phage. Meynell, 1959, **21,** 421.
Growth of bacterial spores, swelling during germination. Hitchins & Gould, 1962, **28,** iii.
Growth of *Bordetella pertussis*, factors affecting. Rowatt, 1957, **17,** 279.
Growth of *Bordetella pertussis*: review. Rowatt, 1957, **17,** 297.
Growth of *Brucella abortus*, effect of erythritol. Williams, Keppie & Smith, 1963, **31,** xxiii.
Growth of *Brucella abortus* strain 19 in aerated dialysed media. Sterne, 1958, **18,** 747.
Growth of contaminants and mutants in continuous culture. Powell, 1958, **18,** 259.
Growth of *Desulphovibrio desulphuricans*, effect of sodium chloride on. Littlewood & Postgate, 1957, **17,** 378.
Growth of elements in Proteus L-form. Weibull & Lundin, 1962, **27,** 241.
Growth of *Escherichia coli* with L-glutamic and 2-oxoglutaric acid as carbon sources. Halpern & Umbarger, 1961, **26,** 175.
Growth of *Euglena gracilis*, decline in cellular content. Buetow & Levedahl, 1962, **28,** 579.
Growth of fungal cultures, size of inoculum on. Meyrath, 1963, **31,** v.
Growth of D-galactosamine-metabolizing lactic acid bacteria. Blumenthal, Shiota, McCann & Disraely, 1961, **24,** 81.
Growth of herpes virus in HeLa cells. Stoker & Ross, 1958, **19,** 250.
Growth of *Kloeckera brevis*, mesoinositol in. Dawson, White & Freinkel, 1962, **27,** 331.
Growth of lactic acid bacteria in soft agar. Whittenbury, 1963, **32,** 375.
Growth of *Lactobacillus* spp., vitamin requirements and biochemical characters. Rogosa, Franklin & Perry, 1961, **25,** 473.
Growth of Leptospira in defined media. Vogel & Hutner, 1961, **26,** 223.
Growth of microbiology. The fifth Marjory Stephenson Memorial Lecture. Knight, 1962, **27,** 357.
Growth of micro-organisms in relation to energy supply. Bauchop & Elsden, 1960, **23,** 457.
Growth of micro-organisms, influence of certain derivatives of vitamin B_{12}. Ford, 1959, **21,** 693.
Growth of mixed populations of *Chilomonas paramecium* and *Tetrahymena pyriformis*. Mučibabić, 1957, **16,** 561.
Growth of mutant strain of *Escherichia coli*. Back & Westaway, 1962, **27,** 41.
Growth of *Mycobacterium lepraemurium*. Garbutt, Rees & Barr, 1962, **27,** 259.
Growth of *Mycobacterium lepraemurium* in cell-free medium. Hart & Valentine, 1963, **32,** 43.
Growth of Mycoplasma. Leach, 1962 **27,** 345.
Growth of Mycoplasma, effects of RNA and DNA. Razin & Knight, 1960, **22,** 504.
Growth of Mycoplasma in liquid media, measurement of. Butler & Knight, 1960, **22,** 478.
Growth of *Mycoplasma laidlawii*, requirements of nucleic acid precursor. Razin, 1962, **28,** 243.
Growth of Mycoplasma, partially defined medium for. Razin & Knight, 1960, **22,** 492.
Growth of myxamoebae of *Didymium nigripes* in axenic culture. Kerr, 1963, **32,** 409.
Growth of *Nocardia opaca*, effect of metal deficiencies. Webley, 1960, **23,** 87.
Growth of *Penicillium* spp. Basu & Bhattacharyya, 1962, **27,** 61.
Growth of polio virus, relations of hydrogen bonding. Cooper, 1962, **28,** i.
Growth of *Prymnesium parvum* with B_{12} vitamins. Rahat & Reich, 1963, **31,** 195.
Growth of Rhizobium influenced by calcium and magnesium. Vincent, 1962, **28,** 653.
Growth of *Rhodopseudomonas spheroides*, a requirement for sodium in. Sistrom, 1960, **22,** 778.
Growth of *Salmonella typhimurium* in special media. Richmond & Maaløe, 1962, **27,** 285.
Growth of *Salmonella typhimurium* with proline or glutamate. Maaløe & Richmond, 1962, **27,** 269.
Growth of some *Bacillus megaterium* strains, hereditary aberrancy. Ivánovics & Nagy, 1958, **19,** 407.
Growth of the fungus *Zygorrhynchus moelleri*, metabolic significance of the citric acid cycle in. Moses, 1957, **16,** 534.
Growth of the thermophilic actinomycete *Micromonospora vulgaris*, defined medium. Webley, 1958, **19,** 402.
Growth of *Trichophyton mentagrophytes* and *T. rubrum* in increased carbon dioxide tensions. Chin & Knight, 1957, **16,** 642.
Growth of *Trichophyton rubrum* effected by steroids. Chattaway, Townsley & Barlow, 1962, **28,** 437.
Growth of two varieties of *Ophiobolus graminis*, effect of. Turner, 1957, **16,** 531.
Growth, one-step curves for inclusion blennorrhoea virus. Furness & Fraser, 1962, **27,** 299.
Growth processes in cell ensembles. Zahlan, 1961, **25,** 1.
Growth-promoting activity of compounds of the vitamin K group analogues for a rumen strain of *Fusiformis nigrescens*. Lev, 1959, **20,** 697.
Growth rate and aeration on respiratory and cytochrome system of a fluorescent pseudomonad grown in continuous culture. Rosenberger & Kogut, 1958, **19,** 228.
Growth-rate, effect on the anatomy of *Escherichia coli*. Perret, 1958, **18,** vii.
Growth rate, influence of vitamin B_{12} and cell composition in the flagellate *Ochromonas malhamensis*. Ford & Goulden, 1959, **20,** 267.
Growth rate of *Bacillus cereus* between divisions. Collins & Richmond, 1962, **28,** 15.
Growth, reduction in oxidative activities in presence of streptomycin. Hancock, 1961, **25,** 421.
Growth, requirement of iron for pathogenic Leptospira. Faine, 1959, **20,** 246.
Growth requirements and inhibitors, steroid, of Mycoplasma. Butler & Knight, 1960, **22,** 483.
Growth, requirements in *Haemophilus influenzae*. Holt, 1962, **27,** 317.
Growth requirements of Wills strain of *Actinomyces israelii*. Christie & Porteous, 1962, **28,** 455.
Growth, stationary phase, of *Aerobacter aerogenes*. Strange, Dark & Ness, 1961, **25,** 61.
Growth, steroid, requirement of *Mycoplasma mycoides*. Rodwell, 1963, **32,** 91.
Growth stimulators for *Microbacterium* sp., 'iron transport' compounds. Demain & Hendlin, 1959, **21,** 72.
Growth, syntrophic, of *Lactobacillus plantarum* and *Streptococcus faecalis*. Krieg & Pelczar, 1961, **25,** 77.

Growth, unbalanced, and cell death in Neurospora. Strauss, 1958, **18,** 658.

Haemagglutination and electron microscopy, assay of influenza virus particles by. Tyrrell & Valentine, 1957, **16,** 668.
Haemagglutination in *Proteus hauseri*, fimbriae and. Shedden, 1962, **28,** 1.
Haemagglutination, inhibitor in edible bird-nest. Biddle & Belyavin, 1963, **31,** 31.
Haemagglutination model of specific receptor adsorption. Belyavin, 1963, **32,** 15.
Haemagglutinin from influenza virus inhibited by muco-proteins. Gottschalk & Fazekas de St Groth, 1960, **22,** 690.
Haematin-independent mutant of *Haemophilus influenzae*. Butler, 1962, **29,** 189.
Haemolytic action of *Bacillus* spp. Williams, 1957, **16,** 16.
Haemophilus influenzae, a haematin-independent mutant. Butler, 1962, **29,** 189.
Haemophilus influenzae, defined medium for. Butler, 1962, **27,** 51.
Haemophilus influenzae, growth-factor requirements. Holt, 1962, **27,** 317.
Haemophilus influenzae, transformability of. Stuy, 1962, **29,** 537.
Haemophilus parainfluenzae, defined medium for. Butler, 1962, **27,** 51.
Haemophilus pertussis, intracerebral infection of mice with, and passive protection by hyperimmune rabbit sera. Brown, 1958, **18,** 48.
Haemophilus pertussis, minimal amino acid requirements of. Jebb & Tomlinson, 1957, **17,** 59.
Haemophilus vaginalis, cultural and serological studies. Redmond & Kotcher, 1963, **33,** 77.
Haemophilus vaginalis identification. Redmond & Kotcher, 1963, **33,** 89.
Halobacterium salinarium, structural transformations and lysis of. Mohr & Larsen, 1963, **31,** 267.
Halophilism, freezing points of bacterial cells in relation to. Christian & Ingram, 1959, **20,** 27.
Hansenula wingei, yeast, conjugation in. Brock, 1961, **26,** 487.
Harposporium anguillulae, biology. Aschner & Kohn, 1958, **19,** 182.
Hartmanella rhysodes, nutritional studies on the free-living soil amoeba. Band, 1959, **21,** 80.
Hay, changes during moulding. Gregory, Lacey, Festenstein & Skinner, 1963, **33,** 147.
Hay, mouldy, thermophilic and mesophilic actinomycetes in. Corbaz, Gregory & Lacey, 1963, **32,** 449.
Heat, cations and pH effect on vaccinia virus. Kaplan, 1963, **31,** 313.
Heat effect on phage-typing staphylococci. Asheshov & Jevons, 1963, **31,** 97.
HeLa cell cultures, dose-response curves of toxic and infective actions of adenovirus in. Pereira & Kelly, 1957, **17,** 517.
HeLa cell monolayers, growth of inclusion blennorrhoea in. Furness & Fraser, 1962, **27,** 299.
HeLa cell monolayers, replication of lymphogranuloma venereum virus. Furness & Csonka, 1963, **31,** 161.
HeLa cells, early stages of infection with herpes simplex virus. Watkins, 1960, **22,** 57.
HeLa cells, growth of herpes virus. Stoker & Ross, 1958, **19,** 250.
HeLa cells, infected with herpes virus, electron microscope. Stoker, Smith & Ross, 1958, **19,** 244.
Heptaene, mode of action of antifungal. Henis & Grossowicz, 1960, **23,** 345.
Herpes simplex virus, fluorescent antibody studies with, in unfixed preparations of trypsinized tissue cultures. O'Dea & Dineen, 1957, **17,** 19.
Herpes virus, from solitary HeLa cells. Wildy, Stoker & Ross, 1959, **20,** 105.
Heterokaryons in *Penicillium chrysogenum*. Macdonald, Hutchinson & Gillett, 1963, **33,** 375.
Heterokaryotics, compatibility in Streptomyces. Braendle, Gardiner & Szybalski, 1959, **20,** 442.
Heterotrophs, survey of micro-organisms from soil for ability to form nitrite and nitrate. Eylar & Schmidt, 1959, **20,** 473.
Heterozygotes in *Streptomyces coelicolor*. Hopwood, 1963, **30,** 249.
Hexose constituents of some shigella polysaccharide hydrolysates. Simmons, 1957, **17,** 650.
Hippurate hydrolysis in Klebsiella-Cloaca classification. Thirst, 1957, **17,** 390.
L-Histidine, adaptive degradation by *Paracolobactrum aerogenoides*. Tristram, 1960, **23,** 425.
Histidine biosynthesis in *Salmonella typhimurium*, genetic control of enzymes. Ames, Garry & Herzenberg, 1960, **22,** 369.
Histidine-requiring Salmonella mutants, complementation mapping. Hartman, Hartman & Šerman, 1960, **22,** 354.
Histidine-requiring Salmonella mutants, structure mapping by transduction. Hartman, Loper & Šerman, 1960, **22,** 323.
Histoplasma, in culture, fine structure of yeastlike cells of. Edwards, Hazen & Edwards, 1959, **20,** 496.
[^{35}S]Homocysteine, isolation from Neurospora. Leinweber & Liverman, 1961, **26,** 529.
Homogentisic acid, oxidation by cell-free extracts of a vibrio. Chapman & Dagley, 1962, **28,** 251.
Homotypic non-exclusion by vesicular stomatitis virus in chick cell culture. Cooper, 1958, **19,** 350.
Honey bee, habitat of 'Bacterium eurydice', Bailey, 1963, **31,** 147.
Host relations of *Venturia inaequalis* and *V. pirina*, significance of polyphenolic metabolites of apple and pear in. Kirkham, 1957, **17,** 491.
Humidity, relative, and the killing of bacteria. Bateman, Stevens, Mercer & Carstensen, 1962, **29,** 207.
Hyaluronidase formation in cultures of *Staphylococcus aureus*, preferential suppression of. Rogers, 1957, **16,** 22.
Hydrogen peroxide, sensitization of bacterial spores to. Gould & Hitchins, 1963, **33,** 413.
Hydrogen sulphide, effect of glucose on production by *Escherichia coli* from cysteine. Anderson & Johansson, 1963, **30,** 485.
Hydrogen sulphide formation by pantothenate-deficient yeast. Wainwright, 1962, **28,** v.
Hydrogen sulphide production by *Clostridium perfringens*. Fuchs & Bonde, 1957, **16,** 330.
Hydrogenase activity in *Azotobacter* spp. and in *Clostridium pasteurianum*. Nicholas, Fisher, Redmond & Wright, 1960, **22,** 191.
Hydrogenase, synthesis, by *Hydrogenomonas facilis*. Linday & Syrett, 1958, **19,** 223.

Hydrogenomonas facilis, induced synthesis of hydrogenase by. Linday & Syrett, 1958, **19,** 223.
Hydroxymethylcytosine-containing bacteriophages. Kay & Fildes, 1962, **27,** 143.
Hyphomicrobia, observations on origin. Bisset, Pease & Hale, 1961, **24,** 427.
Hyphomycetes, aquatic, physiology and nutrition of. Thornton, 1963, **33,** 23.
Hyphomycetes, isolation from soil. Henderson, 1961, **26,** 149.
Hyphomycetes, metabolism of aromatic compounds related to lignin. Henderson, 1961, **26,** 155.
Hypothesis of independent action to fatal infections in mice given *Salmonella typhimurium* by mouth. Meynell, 1957, **16,** 396.

Identification of *Haemophilus vaginalis*. Redmond & Kotcher, 1963, **33,** 89.
Imidazole compounds accumulated by purine mutants of *Neurospora crassa*. Bernstein, 1961, **25,** 41.
Immunological studies of the immobilization antigens of *Paramecium aurelia* variety 2. Finger, 1957, **16,** 350.
Immunology of *Bacillus subtilis* penicillinase. Kushner, 1960, **23,** 381.
Inactivation, heat, of vaccinia virus. Kaplan, 1958, **18,** 58.
Inactivation of foot-and-mouth disease virus. Brown, Cartwright & Stewart, 1963, **31,** 179.
Inactivation of nucleic acid preparations from tobacco mosaic virus. Bawden & Pirie, 1959, **21,** 438.
Inactivation, thermal, of a 'marine' bacteriophage. Spencer, 1957, **16,** vi.
Induced defective and healthy lysogenic strains of *Escherichia coli*, formation of the vegetative pool by. Whitfield & Appleyard, 1957, **17,** 453.
Induction of forward mutants in the *pyr*-3 region of Neurospora. Reissig, 1963, **30,** 317.
Induction of galactose pathway enzymes in *Escherichia coli*. Jordan & Yarmolinsky, 1963, **30,** 357.
Infected guinea pigs with *Bacillus anthracis*, uptake of amino acids during the terminal bacteraemia in. Smith & Tempest, 1957, **17,** 731.
Infection, by tobacco mosaic virus and its nucleic acid. Kassanis, 1959, **20,** 704.
Infection by vesicular stomatitis virus, osmotic barrier for inorganic phosphate in chick embryo cells and its stability during the latent and release periods of. Cooper, 1957, **17,** 353.
Infection, effects of 5-fluoro-uracil on Rous sarcoma virus *in vitro*. Fairman, 1959, **20,** ii.
Infection, intracerebrally, of mice with *Haemophilus pertussis* and passive protection by hyperimmune rabbit sera. Brown, 1958, **18,** 48.
Infection of clover root hairs by nodule bacteria studied by a simple glass slide technique. Fåhraeus, 1957, **16,** 374.
Infection of HeLa cells with herpes simplex virus. Watkins, 1960, **22,** 57.
Infection of mice intracranially with *Bordetella pertussis*. Berenbaum, Ungar & Stevens, 1960, **22,** 313.
Infection, pulmonary, of mice with TE55 strain of Trachoma virus. Watkins & Mackenzie, 1963, **30,** 43.
Infection, root-hair, by *Plasmodiophora brassicae*, solution-culture technique for obtaining. Macfarlane, 1958, **18,** 720.
Infection with foot-and-mouth disease virus, interferon in. Philipson & Dinter, 1963, **32,** 277.
Infections, fatal, in mice given *Salmonella typhimurium* by mouth. Meynell, 1957, **16,** 396.
Infections, fatal, in partially resistant hosts and their application to mice challenged with *Salmonella paratyphi-B* or *S. typhimurium* by intraperitoneal injection. Meynell & Stocker, 1957, **16,** 38.
Infections, 'shortened latency' as a result of, by vesicular stomatitis virus in chick cell culture. Cooper, 1958, **19,** 340.
Infections, with influenza virus of de-embryonated egg, biochemistry of cells. Mills, 1958, **19,** 473.
Infective factor controlling sex compatibility and gene recombination in *Escherichia coli*. Bernstein, 1957, **16,** iii.
Infectivity of nucleic acid preparations from tobacco mosaic virus. Bawden & Pirie, 1959, **21,** 438.
Infectivity of purified and partially purified preparations of vaccinia and cowpox viruses. Kaplan & Valentine, 1959, **20,** 612.
Infectivity of *Salmonella typhimurium* by *colI*. Stocker, Smith & Ozeki, 1963, **30,** 201.
Influenza, structure of viruses of the Newcastle disease (Myxovirus group). Valentine & Isaacs, 1957, **16,** 680.
Influenza virus filaments and spheres, structure of. Valentine & Isaacs, 1957, **16,** 195.
Influenza virus filaments, staining of. Lindenmann, 1957, **16,** 759.
Influenza virus particles by haemagglutination and electron microscopy, assay of. Tyrrell & Valentine, 1957, **16,** 668.
Influenza virus strain, genetic analysis of the development of serum resistance in an. Edney, 1957, **17,** 25.
Infrared spectra of some acetic acid bacteria. Scopes, 1962, **28,** 69.
Inheritance, ploidal, in *Dictyostelium discoideum*. Sussman & Sussman, 1963, **30,** 349.
Inhibition by *Staphylococcus aureus* type 71. Barrow, 1963, **32,** 255.
Inhibition, effect of inoculum size in agar media using staphylococci and streptomycin. Cooper, Linton & Sehgal, 1958, **18,** 670.
Inhibition of enzyme by antibody. Ada, Lind & Laver, 1963, **32,** 225.
Inhibition of enzyme formation following infection of *Escherichia coli* with phage T2r$^+$. Levin & Burton, 1961, **25,** 307.
Inhibition of glutamine synthesis by *Staphylococcus aureus*. Fry, 1957, **16,** 341.
Inhibition of phage by streptomycin. Brock, Mosser & Peacher, 1963, **33,** 9.
Inhibition of small inocula on the surface of nutrient agar. Taylor, 1957, **16,** ix.
Inhibition of sporulation in *Venturia inaequalis*. Kirkham & Flood, 1963, **32,** 123.
Inhibitor, Francis, in normal animal sera, neutralizing cytopathogenic bovine orphan virus. Turner, Kipps, Polson & van den Ende, 1961, **26,** 415.
Inhibitor, haemagglutination, in edible bird-nest. Biddle & Belyavin, 1963, **31,** 31.
Inhibitor, of virus infection from leaves of raspberry. Cadman, 1959, **20,** 113.
Inhibitors, growth, and their antagonists as mutagens and antimutagens in *Escherichia coli*. Greer, 1958, **18,** 543.

Inhibitors of protein and nucleic acid synthesis in *Aspergillus nidulans*. Shepherd, 1958, **18,** iv.
Inhibitors, streptomycin, investigation with aid of a streptomycin-dependent *Vibrio comma*. Olitzki & Godinger, 1959, **20,** 54.
Inhibitory effect of low temperature on early stages of zygospore production in *Rhizopus sexualis*. Hawker, Hepden & Perkins, 1957, **17,** 758.
Inocula, small, inhibition of, on the surface of nutrient agar. Taylor, 1957, **16,** ix.
Inoculation of selected micro-organisms into partially-sterilized soils. Brown, 1958, **18,** 239.
Inoculum size and carbon metabolism in Aspergillus. Meyrath & McIntosh, 1963, **33,** 47.
Inoculum size and nitrogen metabolism in *Aspergillus oryzae*. McIntosh & Meyrath, 1963, **33,** 57.
Inoculum size, effect on inhibition zones in agar with staphylococci and streptomycin. Cooper, Linton & Sehgal, 1958, **18,** 670.
Inoculum size in *Aspergillus oryzae*, effects of. McIntosh & Meyrath, 1963, **33,** viii.
Inorganic polyphosphate in mycobacteria, metabolism of. Winder & Denneny, 1957, **17,** 573.
Interferon in infection with foot-and-mouth disease virus. Philipson & Dinter, 1963, **32,** 277.
Interferon, the specificity of. Gifford, 1963, **33,** 437.
Intestines of earthworms, micro-organisms in. Parle, 1963, **31,** 1.
Intestines, yeast flora of horses, sheep, goats and swine. van Uden, Carmo Sousa & Farinha, 1958, **19,** 435.
Ions, ferrous and cobaltous, effect on formation of toxin and porphyrin by *Corynebacterium diphtheriae*. Clarke, 1958, **18,** 708.
Ions, inorganic, effect on respiration in *Pasteurella tularensis* and *Escherichia coli*. Miller & Avi-Dor, 1958, **18,** 221.
Iron as a growth requirement for pathogenic Leptospira. Faine, 1959, **20,** 246.
Iron bacteria, sheath-forming. Mulder, 1963, **31,** xviii.
Iron-containing growth factors and antibiotics. Burnham, 1963, **32,** 117.
Iron-deficient *Nocardia opaca*, metabolism of. Webley, Duff & Anderson, 1962, **29,** 179.
Iron-dependent inactivation of cucumber mosaic virus by polyphenols. Pierpoint & Harrison, 1963, **32,** 429.
Iron, isolation and character of iron-oxidizing bacterium. Beck & Elsden, 1958, **19,** i.
Iron, molybdenum and copper, effects of, on some enzymes in *Neurospora crassa*. Nicholas & Commissiong, 1957, **17,** 699.
'Iron transport' compounds as growth stimulators for *Microbacterium* sp. Demain & Hendlin, 1959, **21,** 72.
Iron uptake by *Corynebacterium diphtheriae* growing in submerged culture. Edwards & Seamer, 1960, **22,** 705.
Iron, zinc and manganese, deficiencies in growth of *Nocardia opaca*. Webley, 1960, **23,** 87.
Irradiation, chronic, on soil microflora. Skou, 1962, **28,** 521.
Irradiation of *Escherichia coli* strain B, growth and survival. Alper & Gillies, 1960, **22,** 113.
Irradiation, ultraviolet, of *Escherichia coli* containing 5-bromouracil in its DNA. Greer, 1960, **22,** 618.
Isocitratase, formation in Athiorhodaceae. Kornberg & Lascelles, 1960, **23,** 511.
Isolating streptomyces, method for. Giolitti & Craveri, 1957, **17,** 649.
Isolation and composition of staphylococcal α-toxin. Bernheimer & Schwartz, 1963, **30,** 455.
Isolation and cultural characters of *Streptococcus pluton* and further observations on *Bacterium eurydice*. Bailey, 1957, **17,** 39.
Isolation and estimation of poly-β-hydroxybutyrate inclusions of *Bacillus* spp. Williamson & Wilkinson, 1958, **19,** 198.
Isolation and some characters of an iron-oxidizing bacterium. Beck & Elsden, 1958, **19,** i.
Isolation of azotobacter bacteriophages. Duff & Wyss, 1961, **24,** 273.
Isolation of glycerol-fermenting and lipolytic bacteria from sheep rumen. Hobson & Mann, 1961, **25,** 227.
Isolation of heterotrophic salt-marsh bacteria. Gray, 1963, **31,** 483.
Isolation of Lac^+ mutants from a Lac^- strain of *Escherichia coli*, by the replica plating technique. Banič, 1958, **18,** 586.
Isolation of micro-organisms from the ocean. Kriss, Mishustina & Zemtsova, 1962, **29,** 221.
Isolation of nutritionally exacting mutants of a filamentous fungus (*Aspergillus nidulans*), replica plating technique. Roberts, 1959, **20,** 540.
Isolation of proteolytic bacteria from sheep rumen. Blackburn & Hobson, 1960, **22,** 282.
Isolation of proteolytic bacteria from sheep rumen, further studies on. Blackburn & Hobson, 1962, **29,** 69.
Isolation of *Rhodotorula nitens* sp.nov. from the atmosphere. Mackenzie & Auret, 1963, **31,** 171.
Isolation of yeasts from soil. di Menna, 1957, **17,** 678.

Kala-azar, mitotic cycle of parasite. Chakraborty & Das Gupta, 1962, **28,** 541.
Kaolin, adsorption of a tryptophan-dependent bacteriophage. Fildes & Kay, 1963, **30,** 183.
Kefir grain, studies on. La Rivière, 1963, **31,** v.
Keto-acid metabolism, submerged culture, *Corynebacterium diphtheriae*. Edwards, 1960, **23,** 201.
Keto and amino acids, formation, by *Mycobacterium butyricum* growing in a chemically defined medium. Wright, 1959, **20,** 554.
3-Ketoglycosides prepared from disaccharides. Bernaerts & De Ley, 1960, **22,** 129.
3-Ketoglycosides, structure when formed from disaccharides by certain bacteria. Bernaerts & De Ley, 1960, **22,** 137.
Killing of bacteria in relative humidity. Bateman, Stevens, Mercer & Carstensen, 1962, **29,** 207.
Kinetics of a growing bacterial population. Perret, 1960, **22,** 589.
Kinetics of F-curing by acridine orange in *Escherichia coli*. Stouthamer & De Haan, 1963, **31,** xii.
Kinetics of the mating process in *Escherichia coli*. Hayes, 1957, **16,** 97.
Klebsiella-Cloaca classification, hippurate hydrolysis in. Thirst, 1957, **17,** 390.
Klebsiella group, classification. Cowan, Steel, Shaw & Duguid, 1960, **23,** 601.
Klebsiella pneumoniae, bacterial populations and drug resistance. Hughes, 1961, **25,** 157.
Klebsiella strains, electron microscope observations on the structure of fimbriae. Thornley & Horne, 1962, **28,** 51.

Klebsiella strains, fimbriae and adhesive properties in. Duguid, 1959, **21,** 271.
Kloeckera brevis, mesoinositol in growth of. Dawson, White & Freinkel, 1962, **27,** 331.
Kluyver, Albert Jan; obituary notice. van Niel, 1957, **16,** 499.
Krassilnikoviae: a new class of micro-organisms in sea and ocean depths. Kriss & Mitzkevich, 1959, **20,** 1.
Krassilnikoviae, distribution in sea and ocean. Kriss & Mitskevich, 1960, **23,** 441.
Krebs-2 ascites tumour cells, intracellular sites of synthesis of encephalomyocarditis in. Bellett & Burness, 1963, **30,** 131.
Krebs cycle and growth of *Salmonella typhimurium*. Richmond & Maaløe, 1962, **27,** 285.
Krebs cycle intermediates, oxidation by *Corynebacterium erythrogenes* 142. Tucker, 1959, **20,** vii.
Krebs cycle, role of, in conjugation in *Escherichia coli* K-12. Fisher, 1957, **16,** 120.

L-forms, electron microscopy of, induced by penicillin in *Proteus vulgaris*. Pease, 1957, **17,** 64.
L-forms, lysis, by various agents. Razin & Argaman, 1963, **30,** 155.
L-forms, morphogenesis. Razin & Oliver, 1961, **24,** 225.
L-forms of Corynebacterium and *Streptobacillus moniliformis*. Pease, 1962, **29,** 91.
L-forms of group D streptococci antigen. Hijmans, 1962, **28,** 177.
L-forms of Proteus L-19. Weibull & Lundin, 1962, **27,** 241.
L forms of *Staphylococcus aureus*. Williams, 1963, **33,** 325.
L-phase, effect of amino-acids on induction by penicillin. Michel & Hijmans, 1960, **23,** 35.
Labyrinthula minuta sp.nov. Watson & Raper, 1957, **17,** 368.
Lactate catabolism in acetic acid bacteria. De Ley & Schell, 1962, **29,** 589.
Lactic acid bacteria, heterofermentative, detection of gas production from glucose by. Hayward, 1957, **16,** 9.
Lactic acid bacteria in soft agar. Whittenbury, 1963, **32,** 375.
Lactobacillaceae, catalases in. Delwiche, 1963, **31,** vii.
Lactobacilli, induction of malic enzyme and oxalacetate decarboxylase. Nathan, 1961, **25,** 415.
Lactobacilli, infrared absorption spectra. Goulden & Sharpe, 1958, **19,** 76.
Lactobacilli, occurrence of teichoic acids. Baddiley & Davison, 1961, **24,** 295.
Lactobacillus acidophilus from chick duodenum, nutrition of. Ford & Rogosa, 1961, **25,** 249.
Lactobacillus bacteriophages, characterization of. de Klerk, Coetzee & Theron, 1963, **32,** 61.
Lactobacillus bifidus, dextran-fermenting organism from the rumen, closely resembling. Clarke, 1959, **20** 549.
Lactobacillus bifidus, globular involution forms. Sundman & Björksten, 1958, **19,** 491.
Lactobacillus bifidus, morphology and relationships. Sundman, Björksten & Gyllenberg, 1959, **21,** 371.
Lactobacillus bifidus, utilization of raffinose by. Lloyd, 1957, **16,** ii.
Lactobacillus bulgaricus and *L. casei*, cultivation with D-galactose. Blumenthal, Shiota, McCann & Disraely, 1961, **24,** 81.
Lactobacillus casei, secondary colony formation. de Klerk & Coetzee, 1962, **29,** 291.
Lactobacillus casei, serological classification of. Glastonbury & Knox, 1963, **31,** 73.
Lactobacillus casei, S-R variation in. de Klerk & Coetzee, 1962, **26,** 155.
Lactobacillus casei, strains, isolation of group specific products from. Knox, 1963, **31,** 59.
Lactobacillus casei, studies on the effect of linoleic acid on. Kodicek, 1958, **18,** xiii.
Lactobacillus, conditions for nitrate reduction. Rogosa, 1961, **24,** 401.
Lactobacillus helveticus. Sharpe & Wheater, 1957, **16,** 676.
Lactobacillus plantarum, syntrophic growth. Krieg & Pelczar, 1961, **25,** 77.
Lactobacillus species from human vagina. Rogosa, 1960, **23,** 197.
Lactobacillus spp., vitamin requirements and biochemical characters. Rogosa, Franklin & Perry, 1961, **25,** 473.
Lactose-fermentation controlling factors in coliform and paracolon groups. Lowe, 1960, **23,** 127.
Lambda particles in *Paramecium aurelia*. van Wagtendonk & Tanguay, 1963, **33,** 395.
Lambs, development in rumen population. Eadie, 1962, **29,** 563.
Lamellae, photosynthetic, of *Anacystis montana*. Echlin, 1963, **32,** iv.
Legumes, tropical, characters of Rhizobium strains. Bisset, 1959, **20,** 89.
Leguminosae, nodule bacteria associated with in South-Western Australia. Lange, 1961, **26,** 351.
Leishmania donovani mitotic cycle. Chakraborty & Das Gupta, 1962, **28,** 541.
Leptospira, growth in defined medium. Vogel & Hutner, 1961, **26,** 223.
Leptospira, pathogenic, iron as a growth requirement for. Faine, 1959, **20,** 246.
Leptospira spp., pathogenic, catalase activity. Faine, 1960, **22,** 1.
Leptospires, preservation by drying. Annear, 1962, **27,** 341.
Leptotrichia spp. classification by chemical composition. Davis & Baird-Parker, 1959, **21,** 612.
Leptotrichia spp., morphology. Baird-Parker & Davis, 1958, **19,** 446.
Leuconostoc citrovorum, what is? Garvie, 1957, **17,** ii.
Leuconostoc mesenteroides and *L. dextranicum*, dextran-producing organisms, nature of the capsular polysaccharides of. Bailey & Oxford, 1959, **20,** 258.
Leuconostoc mesenteroides P60, serine synthesis by. Cross, 1960, **23,** 105.
Leuconostoc mesenteroides P60, synthesis of citrovorum factor. Cross, 1960, **23,** 115.
Life cycle of *Myxococcus fulvus*. Loebeck & Ordal, 1957, **16,** 76.
Light, effect on developmental cycle of *Nostoc muscorum*. Lazaroff & Vishniac, 1961, **25,** 365.
Light, effect on nucleic acid synthesis in *Blastocladiella emersonii*. Cantino & Turian, 1959, **21,** 721.
Lignin, aromatic compounds related to, utilization by hyphomycetes. Henderson, 1961, **26,** 149.
Lignin, autoxidized, complex formation with nitrogen compounds. Sørensen, 1962, **27,** 21.

Lignin, decomposition by soil bacteria. Sørensen, 1962, **27,** 21.
Lignin, metabolism of aromatic compounds related to. Henderson, 1961, **26,** 155.
Lipids, effect on citric acid production by *Aspergillus niger*. Millis, Trumpy & Palmer, 1963, **30,** 365.
Lipids, role in protein synthesis. Hunter & Godson, 1962, **29,** 65.
Listeria monocytogenes, bacteriophages from. Sword & Pickett, 1961, **25,** 241.
Low temperature on early stages of zygospore production in *Rhizopus sexualis*, inhibitory effect of. Hawker, Hepden & Perkins, 1957, **17,** 758.
Lyophilization and O_2 effect in *E. coli*. Lion, 1963, **32,** 321.
Lysine in growth of *Escherichia coli* mutant. Back & Westaway, 1962, **27,** 41.
Lysis, bacteriophage, on solid medium. Mayr-Harting, 1958, **18,** x.
Lysis by agents of microbial origin. Welsch, 1958, **18,** 491.
Lysis by physical and chemical methods. Pethica, 1958, **18,** 473.
Lysis by virulent phage and by penicillin, biochemical parallels between. Weidel & Primosigh, 1958, **18,** 513.
Lysis, enzymic, of group A streptococci. Maxted & Gooder, 1958, **18,** xiii.
Lysis, examination of Brucella cultures by phage, for. Morgan, 1963, **30,** 437.
Lysis in *Eschericia coli* penicillin induced. Boman & Eriksson, 1963, **31,** 339.
Lysis, mechanism of, by phage studied with defective lysogenic bacteria. Jacob & Fuerst, 1958, **18,** 518.
Lysis, mechanism of, in *Prymnesium parvum*. Shilo & Shilo, 1962, **29,** 645.
Lysis, nascent phage, of streptococci, active agent in. Maxted, 1957, **16,** 585.
Lysis of Gram-negative bacteria by serum. Rowley & Wardlaw, 1958, **18,** 529.
Lysis of *Halobacterium salinarium*. Mohr & Larsen, 1963, **31,** 267.
Lysis of micro-organisms by lysozyme and related enzymes. Salton, 1958, **18,** 481.
Lysis of mycoplasma, bacterial protoplasts, spheroplasts and L-forms. Razin & Argaman, 1963, **30,** 155.
Lysis of *Myxococcus xanthus*. Mason & Powelson, 1958, **19,** 65.
Lysis of protoplasts of *Micrococcus lysodeikticus* by alcohols. Gilby & Few, 1960, **23,** 27.
Lysis of protoplasts of *Micrococcus lysodeikticus* by ionic detergents. Gilby & Few, 1960, **23,** 19.
Lysis of *Vibrio costicolus* by osmotic shock. Christian & Ingram, 1959, **20,** 32.
Lysis, osmotic of Mycoplasma. Razin, 1963, **33,** 471.
Lysis resulting from metabolic disturbance. McQuillen, 1958, **18,** 498.
Lysogenesis and temperate phage in *Salmonella typhimurium*. Boyd & Bidwell, 1961, **26,** 443.
Lysogenic actinomycetes and actinophages in nature. Welsch, 1957, **17,** x.
Lysogenic strains of *Escherichia coli*, formation of the vegetative pool by induced defective and healthy. Whitfield & Appleyard, 1957, **17,** 453.
Lysogenic system, *Salmonella typhimurium* phage P 22, radiobiological analysis of. Moseley, 1963, **33,** xi.
Lysogenicity and immunity to bacillus phage W. McCloy, 1958, **18,** 198.
Lysogenization, changes in the phage typing patterns of staphylococci following. Rountree, 1959, **20,** 620.
Lysogeny and conversion in mitis and mitis-like *Corynebacterium diphtheriae*. Groman & Memmer, 1958, **19,** 634.
Lysogeny, conversion by the A phages of *Salmonella typhimurium*. Stocker, 1958, **18,** ix.
Lysogeny, establishment with lambda phage in *Escherichia coli*. Fry, 1959, **21,** 676.
Lysogeny in *Escherichia coli*. Fry & Gros, 1958, **18,** x.
Lysogeny in *Escherichia coli*. Papavassiliou, 1961, **25,** 409.
Lysogeny in *Proteus rettgeri*. Coetzee, 1963, **31,** 219.
Lysogeny in staphylococci. Gorrill, 1957, **17,** 254.
Lysogeny, metabolic activities of *Escherichia coli* during establishment. Fry & Gros, 1959, **21,** 685.
Lysogeny of *Escherichia coli* by λ phage. Fry, 1963, **31,** 297.
Lysozyme, bacterial. Richmond, 1957, **16,** iv.
Lysozyme, formation of, by a strain of *Bacillus subtilis*. Richmond, 1958, **18,** xii.
Lysozyme, lysis of micro-organisms by. Salton, 1958, **18,** 481.
Lysozyme, sensitization of bacterial spores to. Gould & Hitchins, 1963, **33,** 413.
Lytic enzymes, cell-wall, at sporulation and spore germination in *Bacillus* species. Strange & Dark, 1957, **17,** 525.

Macrophages, the bactericidal activities of mouse. Rowley, 1959, **21,** vi.
Magnesium ammonium phosphate hexahydrate in microbial cultures. Beavon & Heatley, 1963, **31,** 167.
Magnesium, influence of growth of Rhizobium. Vincent, 1962, **28,** 653.
Magnesium ions in growth of Salmonella phage. Tucker, 1961, **26,** 313.
Mallomonas akrokomos and *M. insignis*. Harris, 1958, **19,** 55.
Mallomonas, a taxonomic study. Harris & Bradley, 1960, **22,** 750.
Mallomonas insignis and *M. akrokomos*. Harris, 1958, **19,** 55.
Manganese-deficient *Nocardia opaca*, metabolism of. Webley, Duff & Anderson, 1962, **29,** 179.
Manganese, zinc and iron, deficiencies in growth of *Nocardia opaca*. Webley, 1960, **23,** 87.
Measurement of generation times of individual bacteria. Powell & Errington, 1963, **31,** 315.
Measurement of liberation of penicillinase from *Bacillus subtilis*. Pollock, 1961, **26,** 239.
Mechanism of action for nitrite reductase from *Neurospora crassa*. Nicholas, 1958, **18,** iv.
Mechanism of liberation of penicillinase from *Bacillus subtilis*. Pollock, 1961, **26,** 267.
Mechanism of 'vegetative hybridization' in Streptomyces. Bradley, 1958, **18,** 591.
Media, aerated dialysed, growth of *Brucella abortus* strain 19. Sterne, 1958, **18,** 747.
Media, agar, effect of inoculum size on inhibition zones using staphylococci and streptomycin. Cooper, Linton & Sehgal, 1958, **18,** 670.

Media, chemically defined for *Desulfovibrio desulfuricans*. Macpherson & Miller, 1963, **31,** 365.
Media, chemically defined, formation of keto and amino acids by *Mycobacterium butyricum* growing in. Wright, 1959, **20,** 554.
Media, chemically defined, requirements for Wills strain of *Actinomyces israelii*. Christie & Porteous, 1962, **28,** 455.
Media, defined, for cellulose produced by *Acetobacter acetigenum*. Dudman, 1959, **21,** 327.
Media, defined, for *Haemophilus influenzae* and *Haemophilus parainfluenzae*. Butler, 1962, **27,** 51.
Media, defined, for Leptospira. Vogel & Hutner, 1961, **26,** 223.
Media, defined, for the growth of thermophilic actinomycete *Micromonospora vulgaris*. Webley, 1958, **19,** 402.
Media, dependency on cell size and composition during balanced growth in *Salmonella typhimurium*, on temperature and. Schaechter, Maaløe & Kjeldgaard, 1958, **19,** 592.
Media, effect of, on the cultivation of *Mycobacterium balnei* at 37°. Tolhurst, 1958, **18,** 295.
Media for salt-marsh bacteria. Gray, 1963, **31,** 483.
Media, liquid, measurement of growth of mycoplasma in. Butler & Knight, 1960, **22,** 478.
Media, non-protein, cultivation of mycobacteria rocked in. Aoyagi & Mizuno, 1959, **20,** 173.
Media, selective for some *Pasteurella* spp. Morris, 1958, **19,** 305.
Media, semi-solid agar, for rapid drug sensitivity tests on cultures of *Mycobacterium tuberculosis*. Knox & Woodroffe, 1957, **16,** 647.
Media, solid, bacteriophage lysis on. Mayr-Harting, 1958, **18,** x.
Media, substitution of Teepol for bile salts. Jameson & Emberley, 1958, **18,** 238.
Medium, cell-free for *Mycobacterium lepraemurium*. Hart & Valentine, 1963, **32,** 43.
Medium, chemically defined for *Actinomyces israelii*. Christie & Porteous, 1962, **28,** 443.
Medium, chemically defined, growth of *Acanthamoeba* sp. in. Adam, 1959, **21,** 519.
Medium, for growth of Mycoplasma. Razin & Knight, 1960, **22,** 492.
Medium, growth of an *Escherichia coli* mutant, amino acid-amino sugar-lipid complexes accumulating in. Meadow, 1958, **18,** iii.
Medium, influence on group D antigen in streptococci. Medrek & Barnes, 1962, **28,** 701.
Medium, nutrient agar, inhibition of small inocula on. Taylor, 1957, **16,** ix.
Medium, partially defined soluble, for *Physarum polycephalum*. Daniel & Rusch, 1961, **25,** 47.
Medium, selective action of selenite broth. Smith, 1959, **21,** 61.
Medium, silica gel, viable counting of *Mycobacterium tuberculosis* in. Selkon & Mitchison, 1957, **16,** 229.
Medium without blood for growth of *Pasteurella tularensis*. Hood, 1961, **25,** 45.
Megacin, a bacteriocin formed by *Bacillus megaterium*. Holland, 1962, **29,** 603.
Megacin, mode of action. Ivánovics, Alföldi & Nagy, 1959, **21,** 51.
Melanin biosynthesis by *Streptomyces lavendulae*. Mencher & Heim, 1962, **28,** 665.
Melibiose, a new yeast fermenting. Santa Maria, 1962, **28,** 375.
Membrane, cytoplasmic, in bacteria. Hughes, 1962, **29,** 39.
Membrane filter as an aid in the cultivation and identification of fungi. Funder & Johannessen, 1957, **17,** 117.
Membrane filter, direct method for studies on planktonic bacteria. Jannasch, 1958, **18,** 609.
Memnionella, morphogenesis and nutrition. McQuade, 1963, **30,** 429.
β-Mercaptoethylamine, effect on X-ray sensitivity of *Escherichia coli*. Cromroy & Adler, 1962, **28,** 431.
Mesoinositol in growth of *Kloeckera brevis*. Dawson, White & Freinkel, 1962, **27,** 331.
Metabolic disturbance, lysis resulting from. McQuillen, 1958, **18,** 498.
Metabolic significance of the citric acid cycle in the growth of the fungus *Zygorrhynchus moelleri*. Moses, 1957, **16,** 534.
Metabolism, a comparison of the uridine pyrophosphoglycosyl, of capsulated and non-capsulated pneumococci. Smith, Mills & Harper, 1957, **16,** 426.
Metabolism, amino acid, formation of enzymes involved in pyrimidine synthesis in *Escherichia coli*. Sheinin, 1958, **19,** 365.
Metabolism and growth in plankton algae, relationships between. Fogg, 1957, **16,** 294.
Metabolism, carbohydrate, of *Paramecium aurelia*, variety 4, stock 47.8 (sensitive). Vloedman *et al.*, 1957, **16,** 628.
Metabolism, carbohydrate, of *Staphylococcus aureus*. Strasters & Winkler, 1963, **33,** 213.
Metabolism, endogenous, in *Sarcina lutea*. Dawes & Holmes, 1957, **17,** viii.
Metabolism, endogenous, of *Euglena gracilis*. Danforth & Wilson, 1961, **24,** 95.
Metabolism, [^{14}C] glucose, in fungal cells. Moses, 1959, **20,** 184.
Metabolism, glucose, in *Zygorrhynchus moelleri*. Bartlett & Moses, 1957, **16,** 550.
Metabolism, glucose, stimulation by CO_2. Chin & Knight, 1963, **30,** 121.
Metabolism, nitrogen, of rumen proteolytic bacteria. Abou Akkada & Blackburn, 1963, **31,** 461.
Metabolism of *Aspergillus oryzae*, size of inoculum. McIntosh & Meyrath, 1963, **31,** vi.
Metabolism of D-galactose in *Aspergillus nidulans*. Roberts, 1963, **31,** 285.
Metabolism of DNA in *Escherichia coli* infected with bacteriophage T5. Crawford, 1958, **19,** iii.
Metabolism of glycyl-L-leucine in *Escherichia coli*. Meisler & Simmonds, 1963, **31,** 109.
Metabolism of methoxylated aromatic compounds by soil fungi. Henderson, 1957, **16,** 686.
Metabolism of *Mycoplasma laidlawii*. Razin & Cohen, 1963, **30,** 141.
Metabolism of nitro-aromatic compounds. Cain, 1958, **19,** 1.
Metabolism of *Thiobacillus thioparus*, *T. denitrificans* and *T. thiocyanoxidans*. Woolley, Jones & Happold, 1962, **29,** 311.
Metabolism of *Trichophyton mentagrophytes* in increased CO_2. Chin & Knight, 1963, **30,** 113.
Metabolism of *Trichophyton rubrum*, action of 11-deoxycorticosterone on. Chattaway, Townsley & Barlow, 1963, **30,** 261.

Metabolism, patterns in Acetobacter. Cooksey & Rainbow, 1962, **27,** 135.
Metabolism, poly-β-hydroxybutyrate, in *Bacillus cereus* and *Bacillus megaterium*. Macrae & Wilkinson, 1958, **19,** 210.
Metabolism, sulphydryl, of fungi grown in submerged culture. Robson & Stockley, 1962, **28,** 57.
Metabolism, transport and morphogenesis: which drives which? Mitchell, 1962, **29,** 25.
Metabolism, uridine pyrophosphoglycosyl, study of enzymes in extracts of a non-capsulated strain of pneumococcus concerned with. Smith *et al.*, 1959, **20,** 654.
Metabolite analogues on growth of *Bacillus anthracis* in the guinea pig and on the formation of virulence-determining factors. Tempest & Smith, 1957, **17,** 739.
Metabolites, antibiotics which act as analogues of. McQuillen, 1963, **33,** v.
Metallo-enzymes in nitrite reduction in Neurospora. Medina & Nicholas, 1957, **17,** v.
Methanogenesis in bovine rumen; dissimilation of acetate. Oppermann, Nelson & Brown, 1961, **25,** 103.
Methionine, formation, by a methionine-requiring mutant. Strauss & Minagawa, 1959, **20,** 237.
Methionine, gene control of biosynthesis in *Neurospora crassa*. Tokuno, Strauss & Tsuda, 1962, **28,** 481.
Methionine in growth of *Escherichia coli* mutant. Back & Westaway, 1962, **27,** 41.
Methionine in the metabolism of *Prymnesium parvum*. Rahat & Reich, 1963, **31,** 203.
Methionine inhibition in *Schizosaccharomyces pombe* revertants. Clarke, 1963, **31,** 353.
Methionine, ^{14}C labelled, incorporation into bacterial flagellin. Kerridge, 1963, **31,** xxiv.
Methionine, morphological response of *Trichophyton mentagrophytes*. Klein, 1963, **31,** 91.
Methionine, precursor in *Escherichia coli*. Rowbury, 1962, **28,** v.
Methionine, role of folic acid in the synthesis of, by *Escherichia coli*. Kisliuk & Woods, 1958, **18,** xv.
Methionine synthesis by *Escherichia coli*, relating to glycine metabolism. Bull & Woods, 1963, **31,** xxiv.
Methionine synthesis in *Escherichia coli* suppressed by growth with methionine. Wijesundera & Woods, 1960, **22,** 229.
Methionine, synthesis of, by cell-free extracts of *Escherichia coli*. Helleiner, Kisliuk & Woods, 1958, **18,** xv.
Methionine, synthesis, repression in *Escherichia coli*. Rowbury & Woods, 1961, **24,** 129.
Methionine synthesis with vitamin B_6 and glycine by *Escherichia coli*. Wijesundera, Cross & Woods, 1960, **22,** 786.
Method for viable counts of bacteria fermenting various carbohydrates. Kistner, 1960, **23,** 565.
Method of counting rumen ciliate protozoa, development and testing of. Boyne, Eadie & Raitt, 1957, **17,** 414.
Method, photometric, for following changes in length of bacteria. Powell & Stoward, 1962, **27,** 489.
Method, staining, silver-plating, cytology of *Pseudomonas* spp. as revealed by. Rhodes, 1958, **18,** 639.
Methods, counting slide for total counts of bacterial spores. Cook & Lund, 1962, **29,** 97.
Methods, demonstrating fungistasis in soil. Lingappa & Lockwood, 1961, **26,** 473.
Methods, electrical counting of micro-organisms. Curby, Swanton & Lind, 1963, **32,** 33.
Methods, enumeration of rumen micro-organisms. Warner, 1962, **28,** 119.
Methods for obtaining uniform inocula of *Actinomyces israelii*. Christie & Porteous, 1960, **23,** 261.
Methods in computer taxonomy. Beers & Lockhart, 1962, **28,** 633.
Methods, isodensity, ultracentrifugation. Trautman & Breese, 1962, **27,** 231.
Methods, membrane filter, for studies on planktonic bacteria. Jannasch, 1958, **18,** 609.
Methods, microculture technique for early growth of mycobacteria. Jebb & Tomlinson, 1960, **22,** 93.
Methods, negative staining for electron microscope observation on fimbriae. Thornley & Horne, 1962, **28,** 51.
Methods of disrupting spores of *Bacillus cereus*. Berger & Marr, 1960, **22,** 147.
Methods of producing anaerobic conditions with chromous salts. Marshall, 1960, **22,** 645.
Methods, purification of anthrax toxin. Smith & Stanley, 1962, **29,** 517.
Methods, purification of bacterial flagella by ion exchange chromatography. Martinez, 1963, **33,** 115.
Methods, purification of pox viruses by density gradient centrifugation. Zwartouw, Westwood & Appleyard, 1962, **29,** 523.
Methods, rapid calculation of geometric mean titres. Perkins, 1958, **19,** 540.
Methods, serological, agar gel diffusion in identification of streptomycetes. Cross & Spooner, 1963, **33,** 275.
Methods, single-dilution for titration of trachoma virus. Watkins, 1961, **26,** 427.
Methods, solution-culture, for obtaining root-hair, or primary, infection by *Plasmodiorphora brassicae*. Macfarlane, 1958, **18,** 720.
Methoxylated aromatic compounds by soil fungi, metabolism of. Henderson, 1957, **16,** 686.
S-Methylcysteine, effect on methionine biosynthesis in *Neurospora crassa*. Tokuno, Strauss & Tsuda, 1962, **28,** 481.
O-Methylthreonine, bleaching agent for *Euglena gracilis*. Aaronson & Bensky, 1962, **27,** 75.
Metschnikowiella zobellii and *M. krissii*, two new pathogenic yeasts from sea water. van Uden & Castelo-Branco, 1961, **26,** 141.
Mice, pulmonary infection with trachoma strain TE 55. Watkins & Mackenzie, 1963, **30,** 43.
Mice, toxic proteins from *Vibrio cholerae* and water vibrios lethal for. Jenkin & Rowley, 1959, **21,** 191.
Microbacterium sp., 'iron transport' compounds as growth stimulators for. Demain & Hendlin, 1959, **21,** 72.
Microbiology, growth of. The fifth Marjory Stephenson Memorial Lecture. Knight, 1962, **27,** 357.
Microbiology of moulding of hay. Gregory, Lacey, Festenstein & Skinner, 1963, **33,** 147.
Micrococci, classification by physiological and biochemical tests. Baird-Parker, 1963, **30,** 409.
Micrococci, violet-pigmented, classification of. Kocur & Martinec, 1963, **32,** 185.
Micrococci, violet-pigmented, yellow mutants. Rosypal, Kocur & Hoďák, 1963, **32,** 189.
Micrococcus denitrificans, formation of dissimilatory nitrate reductase. Chang & Lascelles, 1963, **31,** xv.

Micrococcus denitrificans, utilization of nitrate. Chang & Morris, 1962, **29,** 301.
Micrococcus lysodeikticus, lysis of protoplasts by alcohols. Gilby & Few, 1960, **23,** 27.
Micrococcus lysodeikticus, lysis of protoplasts by ionic detergents. Gilby & Few, 1960, **23,** 19.
Micrococcus lysodeikticus, osmotic properties of protoplasts of. Gilby & Few, 1959, **20,** 321.
Micrococcus, taxonomic study of genus. Kocur & Martinec, 1962, **28,** vi.
Microcultures, form and structure, of *Escherichia coli*. Hoffman & Frank, 1961, **25,** 353.
Microcysts, the formation and germination of, in *Myxococcus xanthus*. Dworkin & Voelz, 1962, **28,** 81.
Microellobosporia flavea, microscopic observation of structure. Rancourt & Lechevalier, 1963, **31,** 495.
Microellobosporia gen.nov., a new genus of Actinomycetales. Cross, Lechevalier & Lechevalier, 1963, **31,** 421.
Micromonospora vulgaris, defined medium for the growth of the thermophilic actinomycete. Webley, 1958, **19,** 402.
Micro-organisms, ammonium alginate wool as a filter for collecting, from large volumes of air. Hammond, 1958, **19,** 267.
Micro-organisms, cuticle decomposition by, in the phyllosphere. Ruinen, 1963, **32,** iv.
Micro-organisms, dried, interactions between factors affecting viability. Scott, 1958, **19,** ii.
Micro-organisms in earthworm casts. Parle, 1963, **31,** 13.
Micro-organisms in the intestines of earthworms. Parle, 1963, **31,** 1.
Micro-organisms, soil, decomposition of dichloropropionate by. Macgregor, 1963, **30,** 497.
Micropolyspora, a new genus of Actinomycetales. Lechevalier, Solotorovsky & McDurmont, 1961, **26,** 11.
Microscope, electron, HeLa cells infected with herpes virus. Stoker, Smith & Ross, 1958, **19,** 244.
Microscope, electron, negative staining process. Bradley, 1962, **29,** 503.
Microscope, electron, observations on *Sphaleromantis tetragona*. Harris, 1963, **33,** 345.
Microscope, electron, observations on the structure of Klebsiella fimbriae with negative staining. Thornley & Horne, 1962, **28,** 51.
Microscope, electron, structure of bacteriophage ϕR. Kay & Bradley, 1962, **27,** 195.
Microscope, electron, structure of the particles of tobacco rattle virus. Harrison & Nixon, 1959, **21,** 582.
Microscope, electron, study of germination in Botrytis. Hawker & Hendy, 1963, **33,** 43.
Microscope, electron, study of nuclei in *Sorangium* spp. Imshenetsky & Alferov, 1962, **27,** 391.
Microscope, electron, study of root-hair infection by rhizobium. Sahlman & Fåhraeus, 1963, **33,** 425.
Microscope, electron, study of sporulation and protein crystal formation in *Bacillus cereus*. Norris & Watson, 1960, **22,** 744.
Microscope, electron, study of structural changes in Rhizopus spores. Hawker & Abbott, 1963, **32,** 295.
Microscope, electron, surface structures of *Streptomyces violaceoruber*. Hopwood & Glauert, 1961, **26,** 325.
Microscope, electron, vibrio flagella. Follett & Gordon, 1963, **32,** 235.
Microscope, light, observations on *Sphaleromantis tetragona*. Harris, 1963, **33,** 345.
Microscope, phase contrast observations on *Streptomyces coelicolor*. Hopwood, 1960, **22,** 295.
Microscopy, electron, of characteristic particle of foot-and-mouth disease. Bradish, Henderson & Kirkham, 1960, **22,** 379.
Microscopy, electron of membrane prepared from *Candida utilis*. Mendoza & Villanueva, 1963, **32,** i.
Microscopy, electron, of sporangial structure of *Microellobosporia flavea*. Rancourt & Lechevalier, 1963, **31,** 495.
Microscopy, fluorescence, of lymphogranuloma venereum virus in HeLa cell monolayers. Furness & Csonka, 1963, **31,** 161.
Microscopy, fluorescence, replication of inclusion blennorrhoea virus. Furness, Henderson, Csonka & Fraser, 1962, **28,** 571.
Microsporum canis, amino acid metabolism. Chattaway, Toothill & Barlow, 1962, **28,** 721.
Microsporum canis, carbohydrate metabolism in. Chattaway, Thompson & Barlow, 1960, **22,** 649.
Microtest for gelatin liquefaction. Thirst, 1957, **17,** 396.
Mineral nutrition of *Rhizopus stolonifer*. Fothergill & Yeoman, 1957, **17,** 631.
Mitochondrion of *Blastocladiella emersonii*. Cantino, Lovett, Leak & Lythgoe, 1963, **31,** 393.
Mitomycin C, resistance of *Escherichia coli* mutants to. Greenberg, Mandell & Woody, 1961, **26,** 509.
Mode of action of phenanthridines: the effect of ethidium bromide on cell division and nucleic acid synthesis. Newton, 1957, **17,** 718.
Mode of sporulation and relationships of monosporous actinomycetes, observations upon. Bisset, 1957, **17,** 562.
Models, use in bacterial classification. Lysenko & Sneath, 1959, **20,** 284.
Molluscum contagiosum, anti-viral effect of. Postlethwaite, 1963, **33,** x.
Molybdenum, copper and iron, effects of, on some enzymes in *Neurospora crassa*. Nicholas & Commissiong, 1957, **17,** 699.
Molybdenum deficiency on the catalase and peroxidase content of *Neurospora crassa*, effect of. Nicholas, 1957, **17,** 689.
Mononuclear cells, destruction of Staphylococci by. Shayegani & Kapral, 1962, **29,** 637.
Monosporous actinomycetes, observations upon the mode of sporulation and relationships of. Bisset, 1957, **17,** 562.
Morphogenesis and polymorphism of *Ankistrodesmus* spp. McMillan, 1957, **17,** 658.
Morphogenesis and transport, which drives which? Mitchell, 1962, **29,** 25.
Morphogenesis, bicarbonate-induced enzyme activity in Blastocladiella. Lovett & Cantino, 1961, **24,** 87.
Morphogenesis, dissociation from cell division in *Dictyostelium discoideum*. Sussman & Sussman, 1960, **23,** 287.
Morphogenesis in the memnionella-stachybotrys group of fungi. McQuade, 1963, **30,** 429.
Morphogenesis of mycoplasma and L-forms. Razin & Oliver, 1961, **24,** 225.

Morphogenesis, synergistic, by *Dictyostelium discoideum* mutants. Ennis & Sussman, 1958, **18,** 433.
Morphology and biochemistry of 'atypical' mycobacteria. Csillag, 1961, **24,** 261.
Morphology, cellular, of form 2 Mycobacteria in slide culture. Csillag, 1963, **30,** 21.
Morphology of *Actinomyces bovis*. Pine, Howell & Watson, 1960, **23,** 403.
Morphology of actinophage ϕ17. Bacq & Horne, 1963, **32,** 131.
Morphology, of *Bacillus cereus* bacteriophages. Dawson, Smillie & Norris, 1962, **29,** 517.
Morphology of bifid bacteria and some related genera. Sundman, Björksten & Gyllenberg, 1959, **21,** 371.
Morphology, of *Leptotrichia* spp. Baird-Parker & Davis, 1958, **19,** 446.
Morphology of *Mycobacterium phlei* altered by streptomycin. Juhasz, 1962, **28,** 9.
Morphology of new coliphages. Bradley, 1963, **31,** 435.
Morphology of *Nitrobacter winogradskyi*. Zavarzin & Legunkova, 1959, **21,** 186.
Morphology of *Nocardia opaca*, effect of metal deficiencies. Webley, 1960, **23,** 87.
Morphology of *Proteus hauseri*. Coetzee & Sacks, 1960, **23,** 209.
Morphology of *Saccharomyces pastorianus* induced by cycloheximide. Gundersen & Wadstein, 1962, **28,** 325.
Morphology of *Spirillum* spp. Bisset, Pease & Hale, 1961, **24,** 427.
Morphology, response of *Trichophyton mentagrophytes* to methionine. Klein, 1963, **31,** 91.
Motile bacteria, rare, the occurrence of, in some non-motile Salmonella strains. Quadling & Stocker, 1957, **17,** 424.
Motility and tyrosine requirement, transfer by recombination in coli strains. Furness, 1958, **18,** 782.
Motility, arginine-activated, in *Pseudomonas* sp. Shoesmith & Sherris, 1960, **22,** 10.
Motility, bacterial, measurement of. Shoesmith, 1960, **22,** 528.
Motility, effects of removal of flagella by non-lethal methods. Stocker & Campbell, 1959, **20,** 670.
Motility of a strain of *Pseudomonas* sp., the influence of oxygen and arginine on the. Sherris, Preston & Shoesmith, 1957, **16,** 86.
Motility, unilinear transmission of, and its material basis in Salmonella. Quadling, 1958, **18,** 227.
Mould, cellular, slime, with an acellular stalk: *Acytostelium leptosomum*. Raper & Quinlan, 1958, **18,** 16.
Mould, slime, clonal development of *Didymium nigripes*. Kerr & Sussman, 1958, **19,** 173.
Moulds in Ouchterlony gel plates, antigenic distinctions between. Feinberg & Grayson, 1958, **18,** i.
'Mouse-scrapie', biochemical investigations of the agent. Hunter, 1963, **31,** xv.
Mucopeptide of the cell wall, synthesis in *Staphylococcus aureus*. Park & Hancock, 1960, **22,** 249.
Mucopeptides of bacterial cell walls. Work, 1961, **25,** 167.
Mucoproteins inhibitory for influenza virus haemagglutinin. Gottschalk & Fazekas de St Groth, 1960, **22,** 690.
Multiplication, phage, and toxin production in *Corynebacterium diphtheriae*. Barksdale, 1958, **18,** x.
Mumps, structure of viruses of the Newcastle disease (Myxovirus) group. Valentine & Isaacs, 1957, **16,** 680.
Mutant, *Escherichia coli*, amino acid-amino sugar-lipid complexes accumulating in the growth medium of. Meadow, 1958, **18,** iii.
Mutant, haematin-independent of *Haemophilus influenzae*. Butler, 1962, **29,** 189.
Mutant of *Bacillus subtilis*, recovery of alkylated DNA. Strauss, 1963, **30,** 89.
Mutant of *Escherichia coli* requiring methionine and lysine. Back & Westaway, 1962, **27,** 41.
Mutant, qualitatively altered enzyme in a *Neurospora crassa*. Fincham, 1957, **16,** iv.
Mutant, star, of phage T2, properties of. Symonds, 1958, **18,** 330.
Mutants, acriflavine-resistant, of *Aspergillus nidulans*. Roper & Käfer, 1957, **16,** 660.
Mutants, carotenoid distribution in artificially induced mutants of *Chlorella pyrenoidosa*. Allen, Goodwin & Phagpolngarm, 1960, **23,** 93.
Mutants, celluloseless, of certain *Acetobacter* spp., comparative study of. Steel & Walker, 1957, **17,** 445.
Mutants, cysteineless, of *Salmonella typhimurium*. Clowes, 1958, **18,** 140, 154.
Mutants, cysteineless, of *Salmonella typhimurium* arising as a result of an apparent chromosomal deletion. Clowes, 1957, **17,** i.
Mutants, flagellar, in Salmonella. Iino, 1962, **27,** 167.
Mutants, growth of, in continuous culture. Powell, 1958, **18,** 259.
Mutants in a strain of *Rhizobium trifolii*. Gupta & Kleczkowska, 1962, **27,** 473.
Mutants, induction in the *pyr*-3 region of Neurospora. Reissig, 1963, **30,** 317.
Mutants, isolation of Lac^+ from a Lac^- strain of *Escherichia coli*, by the replica plating technique. Banič, 1958, **18,** 586.
Mutants, isolation of nutritionally exacting mutants of a filamentous fungus (*Aspergillus nidulans*), replica plating technique. Roberts, 1959, **20,** 540.
Mutants, methionineless, of *Salmonella typhimurium*. Smith, 1961, **24,** 335.
Mutants, methionine-requiring, formation of methionine by. Strauss & Minagawa, 1959, **20,** 237.
Mutants, *Neurospora crassa*, lacking argininosuccinase. Fincham & Boylen, 1957, **16,** 438.
Mutants of *Aerobacter aerogenes* blocked in inorganic polyphosphate. Harold & Harold, 1963, **31,** 241.
Mutants, of *Escherichia coli*, inter-relationships of serine, glycine and vitamin B_6 in the growth of. Morris & Woods, 1959, **20,** 576.
Mutants of *Escherichia coli*, resistance to Mitomycin C. Greenberg, Mandell & Woody, 1961, **26,** 509.
Mutants of *Klebsiella pneumoniae*, drug-resistant properties. Hughes, 1961, **25,** 157.
Mutants of *Salmonella typhimurium*, synthesis of flagella by amino acid requiring. Kerridge, 1959, **21,** 168.
Mutants of *Staphylococcus afermentans* with impaired respiration. Gause, 1962, **28,** iii.
Mutants of *Staphylococcus flavocyaneus*, yellow-pigmented. Rosypal, Kocur & Hoďák, 1963, **32,** 189.
Mutants of *Verticillium albo-atrum*. Buxton & Hastie, 1962, **28,** 625.
Mutants of yeast, biotin-deficient. Woodward & Rainbow, 1961, **25,** 141.

Mutants, poliovirus, with altered responses to cystine. Dubes & Chapin, 1958, **18,** 320.
Mutants, purine, of *Neurospora crassa*, accumulation of imidazole compounds. Bernstein, 1961, **25,** 41.
Mutants, radiosensitive and radioresistant, of *Escherichia coli* strain B. Hill & Simson, 1961, **24,** 1.
Mutants, recombination in *Vibrio cholerae*. Bhaskaran, 1960, **23,** 47.
Mutants, resistant, sensitivity of *Vibrio fetus* to streptomycin. Morgan, 1958, **19,** 517.
Mutants, spectrum in the *pyr*-3 region of Neurospora. Reissig, 1963, **30,** 327.
Mutants, synergistic morphogenesis by mixtures of *Dictyostelium discoideum*, wild-type and aggregateless. Ennis & Sussman, 1958, **18,** 433.
Mutants, synthesis of vitamin B_6 by some mutant strains of *Escherichia coli*. Morris, 1959, **20,** 597.
Mutants, three star, of coliphage T2. McFall & Stent, 1958, **18,** 346.
Mutants with impaired respiration in *Staphylococcus afermentans*. Gause, Kochetkova & Vladimirova, 1963, **30,** 29.
Mutation affecting tryptophan synthetase in *Escherichia coli*. Gibson, Gibson & Yanofsky, 1961, **24,** 301.
Mutation, bacterial, in a stationary phase. Ryan, 1959, **21,** 530.
Mutation in spheroplasts of *Escherichia coli*. Ryan, Okada & Nagata, 1963, **30,** 193.
Mutation of *Corynebacterium pyogenes* to *C. haemolyticum*. Barksdale *et al.*, 1957, **16,** 749.
Mutation, radiation-induced, in *Escherichia coli*, effect of modifiers. Bridges, 1963, **31,** 405.
Mutations, changes in the photosynthetic pigment system of *Rhodopseudomonas spheroides*. Griffiths, 1962, **27,** 427.
Mutations endowing Pneumococcus with resistance to erythromycin. Ravin & Iyer, 1961, **26,** 277.
Mutations, natural, effect of temperature in *Escherichia coli*. Ryan & Kiritani, 1959, **20,** 644.
Mutations of *Mycobacterium tuberculosis*, PAS resistance. Tsukamura, 1960, **23,** 203.
Mycobacteria, Adansonian classification of. Bojalil, Cerbon & Trujillo, 1962, **28,** 333.
Mycobacteria, Adansonian classification, physiological relationships. Cerbon & Bojalil, 1961, **25,** 7.
Mycobacteria, a microculture technique for observing early growth. Jebb & Tomlinson, 1960, **22,** 93.
Mycobacteria, 'atypical', morphological and biochemical features. Csillag, 1961, **24,** 261.
Mycobacteria, cultivation, rocked in non-protein medium containing a high concentration of Tween 80. Aoyagi & Mizuno, 1959, **20,** 173.
Mycobacteria, form 2, cellular morphology in slide culture. Csillag, 1963, **30,** 21.
Mycobacteria, isolation of bacteriophage by soil-enrichment. Coster & Schuitemaker, 1963, **31,** xi.
Mycobacteria, metabolism of inorganic polyphosphate in. Winder & Denneny, 1957, **17,** 573.
Mycobacteria, morphology of phage-immune variant. Mankiewicz, 1961, **24,** 63.
Mycobacteria, observations on catalase and peroxidase. Winder, 1959, **20,** v.
Mycobacteria, rapid antibacteria test. Aoyagi & Mizuno, 1959, **20,** 180.
Mycobacteria, spore formation and 'dimorphism'. Csillag, 1961, **26,** 97.
Mycobacterium balnei, effect of the medium on the cultivation of, at 37°. Tolhurst, 1958, **18,** 295.
Mycobacterium butyricum, formation of keto and amino acids, growing in a chemically defined medium. Wright, 1959, **20,** 554.
Mycobacterium, chemical composition and antigenic structure of cell walls of. Cummins, 1962, **28,** 35.
Mycobacterium, comparison of four species. Gordon & Mihm, 1959, **21,** 736.
Mycobacterium leprae, electron microscopy of. Rees, Valentine & Wong, 1960, **22,** 443.
Mycobacterium lepraemurium, electron microscopy of. Rees, Valentine & Wong, 1960, **22,** 443.
Mycobacterium lepraemurium, growth in cell-free medium. Hart & Valentine, 1963, **32,** 43.
Mycobacterium lepraemurium in cultures of rat fibroblasts. Garbutt, Rees & Barr, 1962, **27,** 259.
Mycobacterium phlei, aberrant forms produced by streptomycin. Juhasz, 1962, **28,** 9.
Mycobacterium phlei, bacteriophage, action of chromogenic acid-fast bacteria. Mankiewicz, 1961, **24,** 63.
Mycobacterium smegmatis, permeases of. Ellard & Clarke, 1959, **21,** 338.
Mycobacterium tuberculosis, effect of oxygen on growth of, in semi-solid agar. Knox, Lister & Thomas, 1957, **17,** ix.
Mycobacterium tuberculosis, production of virulence in an avirulent strain of, by certain non-ionic surface-active agents. Hart & Rees, 1957, **16,** vii.
Mycobacterium tuberculosis, semi-solid agar media for rapid drug sensitivity tests on cultures of. Knox & Woodroffe, 1957, **16,** 647.
Mycobacterium tuberculosis, the PAS resistance of mutations. Tsukamura, 1960, **23,** 203.
Mycobacterium tuberculosis, viable counting of, in a silica gel medium. Selkon & Mitchison, 1957, **16,** 229.
Mycological examination of dust from mouldy hay associated with farmer's lung disease. Gregory & Lacey, 1963, **30,** 75.
Mycoplasma, carotenoid pigments. Smith, 1963, **32,** 307.
Mycoplasma, chemical composition of cells. Razin, Argaman & Avigan, 1963, **33,** 477.
Mycoplasma, effects of RNA and DNA on growth. Razin & Knight, 1960, **22,** 504.
Mycoplasma laidlawii, fatty acid requirements of. Razin & Rottem, 1963, **33,** 459.
Mycoplasma laidlawii, nucleic acid precursor requirements. Razin, 1962, **28,** 243.
Mycoplasma laidlawii, nutrition and metabolism of. Razin & Cohen, 1963, **30,** 141.
Mycoplasma, lysis by various agents. Razin & Argaman, 1963, **30,** 155.
Mycoplasma measurement of growth in liquid media. Butler & Knight, 1960, **22,** 478.
Mycoplasma, morphogenesis. Razin & Oliver, 1961, **24,** 225.
Mycoplasma mycoides, nutrition of, function of glycerol, cholesterol and long-chain fatty acids. Rodwell & Abbot, 1961, **25,** 201.
Mycoplasma mycoides, specific polysaccharide. Buttery & Plackett, 1960, **23,** 357.
Mycoplasma mycoides, steroid growth-requirement. Rodwell, 1963, **32,** 91.
Mycoplasma, osmotic lysis of. Razin, 1963, **33,** 471.

Mycoplasma, osmotic requirements in growth. Leach, 1962, **27,** 345.
Mycoplasma, partially defined medium for growth. Razin & Knight, 1960, **22,** 492.
Mycoplasma, steroid growth requirements and inhibitors. Butler & Knight, 1960, **22,** 483.
Mycoplasma, survival of washed suspensions. Butler & Knight, 1960, **22,** 470.
Mycorrhiza, vesicular-arbuscular, under aseptic conditions. Mosse, 1962, **27,** 509.
Mycostasis in soils. Dobbs, Hinson & Bywater, 1957, **17,** xi.
Myrothecium verrucaria, cellulolytic preparations from micro-organisms of the rumen and. Halliwell, 1957, **17,** 166.
Myxobacteria, anaerobic and agar-decomposing. Veldkamp, 1961, **26,** 331.
Myxococcus fulvus, nuclear cycle of. Loebeck & Ordal, 1957, **16,** 76.
Myxococcus xanthus, lysis of. Mason & Powelson, 1958, **19,** 65.
Myxococcus xanthus, the formation and germination of microcysts in. Dworkin & Voelz, 1962, **28,** 81.
Myxovirus group, structure of viruses of the Newcastle disease–mumps–influenza. Valentine & Isaacs, 1957, **16,** 680.

Nadsonia elongata, cell wall of. Dyke, 1963, **31,** iv.
Nadsonia slovaca n.sp. isolated in Slovakia. Kocková-Kratochvílová & Svobodová-Poláková, 1959, **20,** 24.
Naegleria gruberi, cytology and ecology of the amoeba stage of. Chang, 1958, **18,** 565.
Naegleria gruberi, cytology and ecology of the flagellate transformation of. Chang, 1958, **18,** 579.
Nascent phage lysis of streptococci, active agent in. Maxted, 1957, **16,** 584.
Neisseriae, deoxyribonucleate preparations from. Catlin & Cunningham, 1961, **26,** 303.
Neuràminic acid in bacteria, relationship of colominic acid (poly *N*-acetylneuraminic acid). Barry, Abbott & Tsai, 1962, **29,** 335.
Neuraminidase, avian, viral and bacterial, inhibition by antibody. Ada, Lind & Laver, 1963, **32,** 225.
Neuraminidase from *Vibrio cholerae*. Ada, French & Lind, 1961, **24,** 409.
Neuraminidase in *Vibrio cholerae*, stimulation of production. French & Ada, 1959, **21,** 550.
Neuraminidase, properties of crystalline. Pye & Curtain, 1961, **24,** 423.
Neuraminidase, stimulation of production, in *Vibrio cholerae* by *N*-acetylmannosamine. Ada & French, 1959, **21,** 561.
Neurospora, cell death and 'unbalanced growth' in. Strauss, 1958, **18,** 658.
Neurospora crassa, accumulation of imidazole compounds by purine mutants. Bernstein, 1961, **25,** 41.
Neurospora crassa, amino acid effect on nutrition. Panicker, Shanmugasundarum & Acharya, 1962, **28,** 409.
Neurospora crassa, amino acid interrelationships in cysteine toxicity. Adiga, Sastry & Sarma, 1962, **29,** 149.
Neurospora crassa, apparent self-fertility. Martin, 1959, **20,** 213.
Neurospora crassa, arginine synthesis in: genetic studies. Newmeyer, 1957, **16,** 449.
Neurospora crassa, control of conidial differentiation in. Grigg, 1960, **22,** 662.
Neurospora crassa, effect of molybdenum deficiency on the catalase and peroxidase content of. Nicholas, 1957, **17,** 689.
Neurospora crassa, effects of molybdenum, copper and iron on some enzymes in. Nicholas & Commissiong, 1957, **17,** 699.
Neurospora crassa, effects of NADP-specific glutamic acid dehydrogenase in. Barratt, 1963, **33,** 33.
Neurospora crassa, gene interactions affecting methionine biosynthesis. Tokuno, Strauss & Tsuda, 1962, **28,** 481.
Neurospora crassa, gene modifying thiamine-requirement. Eberhart & Tatum, 1959, **20,** 43.
Neurospora crassa, genes influencing the conversion of citrulline. Newmeyer, 1962, **28,** 215.
Neurospora crassa, genetic control of conidiation in a heterokaryon of. Grigg, 1958, **19,** 15.
Neurospora crassa, glutamic dehydrogenase from. Nicholas & Mabey, 1960, **22,** 184.
Neurospora crassa, glutamic dehydrogenase produced by inter-allele complementation. Fincham, 1959, **21,** 600.
Neurospora crassa, inter-relationships of alleles at the *am* locus in. Pateman, 1960, **23,** 393.
Neurospora crassa, mechanism of action for nitrite reductase from. Nicholas, 1958, **18,** iv.
Neurospora crassa mutant, qualitatively altered enzyme in. Fincham, 1957, **16,** iv.
Neurospora crassa mutants lacking argininosuccinase. Fincham & Boylen, 1957, **16,** 438.
Neurospora crassa, sequential ascus collection in. Strickland & Thorpe, 1963, **33,** 409.
Neurospora crassa tyrosinase, activation and thermostability. Gest & Horowitz, 1958, **18,** 64.
Neurospora, genetic basis of actidione resistance in. Hsu, 1963, **32,** 341.
Neurospora, induction in *pyr*-3 region. Reissig, 1963, **30,** 317.
Neurospora, isolation of [^{35}S]homocysteine from. Leinweber & Liverman, 1961, **26,** 529.
Neurospora, metallo-enzymes in nitrite reduction in. Medina & Nicholas, 1957, **17,** v.
Neurospora, replica plating and ascus collection. Maling, 1960, **23,** 257.
Neurospora, spectrum of forward mutants in *pyr*-3 region. Reissig, 1963, **30,** 327.
Neurospora, temperature sensitive genes affecting conidiation in. Grigg, 1960, **22,** 667.
Neurospora tetrads, method for obtaining. Strickland, 1960, **22,** 583.
New class, Krassilnikoviae, from sea and ocean depths. Kriss & Mitzkevich, 1959, **20,** 1.
Newcastle disease–mumps–influenza (Myxovirus) group, structure of viruses of. Valentine & Isaacs, 1957, **16,** 680.
Nicotine, in saccharomyces, gene controlled resistance against sensitivity to. Lindegren, Lindegren & Desborough, 1959, **20,** 504.
Nicotinic acid, excretion by biotin-deficient *Saccharomyces cerevisiae*. Rose, 1960, **23,** 143.
Nicotinic acid precursors, effect of amino acid in uptake by *Neurospora crassa*. Panicker, Shanmugasundaram & Acharya, 1962, **28,** 409.
Nicotinic acid requiring mutants of *Salmonella typhimurium*, transduction studies. Watanabe, 1960, **22,** 102.

Nigrospora spores in Jamaican banana plantations. Meredith, 1961, **26,** 343.
Nitrate reductase, formation of dissimilatory, by *Micrococcus denitrificans* and *Staphylococcus aureus*. Chang & Lascelles, 1963, **31,** xv.
Nitrate reduction by strains of *Lactobacillus*. Rogosa, 1961, **24,** 401.
Nitrate, survey of heterotrophic micro-organisms from soil for ability to form. Eylar & Schmidt, 1959, **20,** 473.
Nitrate, utilization by *Micrococcus denitrificans*. Chang & Morris, 1962, **29,** 301.
Nitrite, influence of corn steep liquor on oxidation from ammonia by *Nitrosomonas europaea*. Gundersen, 1958, **19,** 190.
Nitrite reduction in Neurospora, metallo-enzymes in. Medina & Nicholas, 1957, **17,** v.
Nitro-aromatic compounds, microbial metabolism. Cain, 1958, **19,** 1.
Nitrobacter winogradskyi, the morphology of. Zavarzin & Legunkova, 1959, **21,** 186.
Nitrogen catabolism by Pseudomonas. Gaby, Logan & Whitaker, 1962, **28,** 379.
Nitrogen fixation by new species of *Nocardia*. Metcalfe & Brown, 1957, **17,** 567.
Nitrogen fixation by soybean root nodules, effect of oxygen. Bergersen, 1962, **29,** 113.
Nitrogen fixation in *Azotobacter* spp. and in *Clostridium pasteurianum*. Nicholas, Fisher, Redmond & Wright, 1960, **22,** 191.
Nitrogen ($^{15}N_2$), incorporation into various fractions of soybean root nodules. Bergersen, 1960, **22,** 671.
Nitrogen metabolism and inoculum size in *Aspergillus oryzae*. McIntosh & Meyrath, 1963, **33,** 57.
Nitrogen metabolism of rumen proteolytic bacteria. Abou Akkada & Blackburn, 1963, **31,** 461.
Nitrogen source, characteristics of blue-green algae with uric acid as. van Baalen & Marler, 1963, **32,** 457.
Nitro-reductase systems of *Nocardia* species. Villanueva, 1959, **20,** vi.
Nitrosomonas europaea, influence of corn steep liquor on the oxidation of ammonia to nitrite. Gundersen, 1958, **19,** 190.
Nocardia asteroides and *N. brasiliensis*, comparison. Gordon & Mihm, 1959, **20,** 129.
Nocardia, chemical composition and antigenic structure of cell walls of. Cummins, 1962, **28,** 35.
Nocardia corallina, decomposition of pyrimidines. Batt & Woods, 1961, **24,** 207.
Nocardia, nitrogen fixation by new species of. Metcalfe & Brown, 1957, **17,** 567.
Nocardia, nuclear morphogenesis during development. Adams, 1963, **33,** 429.
Nocardia opaca, effect of deficiency of iron, zinc and manganese on growth and morphology. Webley, 1960, **23,** 87.
Nocardia opaca, iron, zinc, and manganese-deficient. Webley, Duff & Anderson, 1962, **29,** 179.
Nocardia rubra, cytoplasmic inclusions of. Adams & McClung, 1962, **28,** 231.
Nocardia salivae, biochemical and morphological examination. Davis & Freer, 1960, **23,** 163.
Nocardia salivae, isolation and culture. Davis & Freer, 1960, **23,** 163.
Nocardia spp., nitro-reductase systems of. Villanueva, 1959, **20,** vi.
Nocardia, type species of. Gordon & Mihm, 1962, **27,** 1.
Nocardias, soil, influence of chemical structure on β-oxidation by. Webley, Duff & Farmer, 1958, **18,** 733.
Nodule bacteria, infection of clover root hairs by, studied by a simple glass slide technique. Fåhraeus, 1957, **16,** 374.
Nodule, bacteria, role of polygalacturonase in root hair invasion. Ljunggren & Fåhraeus, 1961, **26,** 521.
Nodules of soybean root, incorporation of $^{15}N_2$ into various fractions of. Bergersen, 1960, **22,** 671.
Nomogram, for calculation of geometric mean antibody titres. Perkins, 1958, **19,** 540.
Non-flagellation from flagellation in *Salmonella typhimurium*. Quadling & Stocker, 1962, **28,** 257.
Non-motile Salmonella strains, the occurrence of rare motile bacteria in. Quadling & Stocker, 1957, **17,** 424.
Nostoc muscorum, effect of light on development. Lazaroff & Vishniac, 1961, **25,** 365.
Nostoc muscorum, filament anastomosis in development cycle. Lazaroff & Vishniac, 1962, **28,** 203.
Nov.spec., *Candida muscorum*. di Menna, 1958, **18,** 269.
Nov.spec., *Labyrinthula minuta*. Watson & Raper, 1957, **17,** 368.
Nov.spec., *Rhodotorula graminis*. di Menna, 1958, **18,** 269.
Nov.spec., *Torulopsis ingeniosa*. di Menna, 1958, **19,** 581.
Nuclear and cell divisions, and growth in some bacteria. Schaechter, Williamson, Hood & Koch, 1962, **29,** 421.
Nuclear cycle of *Myxococcus fulvus*. Loebeck & Ordal, 1957, **16,** 76.
Nuclear fusion in *Spirillum* spp. Williams & Rittenberg, 1957, **17,** 274.
Nuclear morphogenesis during development of Nocardia. Adams, 1963, **33,** 429.
Nuclei, electron microscopic study in *Sorangium* spp. Imshenetsky & Alferov, 1962, **27,** 391.
Nucleic acid, comparison of the early stages of infection by tobacco mosaic virus and. Kassanis, 1959, **20,** 704.
Nucleic acid, effect of actidione and other antifungal agents on, and protein synthesis in *Saccharomyces carlsbergensis*. Kerridge, 1958, **19,** 497.
Nucleic acid from filamentous influenza virus. Ada & Perry, 1958, **19,** 40.
Nucleic acid, in bacteriophage ϕR. Kay, 1962, **27,** 201.
Nucleic acid, in viruses. Allison & Burke, 1962, **27,** 181.
Nucleic acid preparations from tobacco mosaic virus. Bawden & Pirie, 1959, **21,** 438.
Nucleic acid synthesis, action of chloramphenicol on, by *Escherichia coli* strain B. Harrington, 1958, **18,** 767.
Nucleic acid synthesis by *Shigella flexneri*, effect of chloramphenicol. Yee, Pan & Gezon, 1962, **27,** 521.
Nucleic acid synthesis in *Aspergillus nidulans*, inhibitors of. Shepherd, 1958, **18,** iv.
Nucleic acid synthesis in a trypanosomid flagellate, action of antrycide. Newton, 1958, **19,** ii.
Nucleic acid synthesis in *Blastocladiella emersonii*, effect of light on. Cantino & Turian, 1959, **21,** 721.
Nucleic acid synthesis in *Saccharomyces mandshuricus*, effect of actidione on. Kerridge, 1957, **16,** v.
Nucleic acid synthesis, the effect of ethidium bromide on cell division. Newton, 1957, **17,** 718.
Nucleic acids, effect of biotin deficiency on synthesis by *Saccharomyces cerevisiae*. Ahmad, Rose & Garg, 1961, **24,** 69.

Nucleic acids, effect of growth conditions on synthesis and *Saccharomyces cerevisiae*. Ahmad & Rose, 1962, **28,** 147.
Nucleic acids of *Aerobacter aerogenes*, isolation and composition of. Jones, Marsh & Rizvi, 1957, **17,** 586.
Nucleic acids, precursor requirements of *Mycoplasma laidlawii*. Razin, 1962, **28,** 243.
Nucleic acids, vulnerability in mutant Staphylococci with impaired respiration. Gause & Kochetkova, 1962, **29,** 317.
Nucleotide composition of RNA-viruses. Cocito, Laduron & De Somer, 1963, **32,** iii.
Nucleotides, accumulation by *Escherichia coli* strain 20–26. Lilly, Clarke & Meadow, 1963, **32,** 103.
Nutrition, control of cellular form in *Trigonopsis variabilis*. SentheShanmuganathan & Nickerson, 1962, **27,** 437.
Nutrition in the Memnionella-Stachybotrys group of fungi. McQuade, 1963, **30,** 429.
Nutrition of aquatic hyphomycetes. Thornton, 1963, **33,** 23.
Nutrition of Coryneform bacteria from soil and herbage. Grainger & Keddie, 1963, **31,** viii.
Nutrition of *Crithidia fasciculata*. Kidder & Dutta, 1958, **18,** 621.
Nutrition of cysteineless mutants of *Salmonella typhimurium*. Clowes, 1958, **18,** 140.
Nutrition of *Desulfovibrio desulfuricans*. Macpherson & Miller, 1963, **31,** 365.
Nutrition of *Flavobacterium aquatile*. Weeks & Beck, 1960, **23,** 217.
Nutrition of lactic acid bacteria isolated from the rumen. Ford, Perry & Briggs, 1958, **18,** 273.
Nutrition of *Lactobacillus acidophilus* from chick duodenum. Ford & Rogosa, 1961, **25,** 249.
Nutrition of marine phytoplankton, auxotrophy and organic compounds in the. Droop, 1957, **16,** 286.
Nutrition of *Mycoplasma laidlawii*. Razin & Cohen, 1963, **30,** 141.
Nutrition of *Mycoplasma mycoides*, function of glycerol, cholesterol and long-chain fatty acids. Rodwell & Abbott, 1961, **25,** 201.
Nutrition of *Paramecium caudatum*, protein factor. Lilly & Klosek, 1961, **24,** 327.
Nutrition of *Poteriochromonas stipitata*. Isenberg, 1962, **29,** 373.
Nutrition of *Pythium* spp. Fothergill & Hide, 1962, **29,** 325.
Nutrition of rumen *Streptococcus bovis* with dextran synthesis from sucrose. Oxford, 1958, **19,** 617.
Nutrition of *Venturia inaequalis* and *V. pirina*, studies of the significance of polyphenolic host metabolites in the. Kirkham, 1957, **17,** 120.
Nutrition, requirements of *Aspergillus niger* for citric acid production. Trumpy & Millis, 1963, **30,** 381.
Nutrition, studies of *Zygorrhynchus* spp. Fothergill & Jones, 1958, **19,** 298.
Nutrition, studies on the free-living soil amoeba, *Hartmanella rhysodes*. Band, 1959, **21,** 80.
*Nutrition, studies on thermophilic bacteria. Ford & Jayne-Williams, 1963, **31,** xix.
Nutritional requirements and biosynthetic capabilities of the parasitic flagellate *Strigomonas* (*Herpetomonas*) *oncopelti*. Newton, 1957, **17,** 708.
Nutritional requirements of *Clostridium perfringens*. Fuchs & Bonde, 1957, **16,** 317.
Nystatin, inhibition of yeast metabolism. Marini, Arnow & Lampen, 1961, **24,** 51.

Obituary notice: Oswald Theodore Avery, 1877–1955. MacLeod, 1957, **17,** 539.
Obituary notice: Jules Bordet, 1870–1961. Beumer, 1962, **29,** 1.
Obituary notice: Albert Jan Kluyver, 1888–1956. van Niel, 1957, **16,** 499.
Obituary notice: Johanna Westerdijk, 1883–1961. ten Houten, 1963, **32,** 1.
Ochromonas malhamensis, B_{12} vitamins and growth of. Ford, 1958, **19,** 161.
Ochromonas malhamensis, influence of vitamin B_{12} on growth rate and cell composition in the flagellate. Ford & Goulden, 1959, **20,** 267.
Ophiobolus graminis, effect of some amino acids on the growth of two varieties of. Turner, 1957, **16,** 531.
Optical activity of amino acids formed by reductive amination in *Bacillus subtilis*. Shah *et al.*, 1957, **17,** 620.
Organic compounds in the nutrition of marine phytoplankton. Droop, 1957, **16,** 286.
Organism, Eaton's primary atypical pneumonia, properties. Goodburn & Marmion, 1962, **29,** 271.
Organisms, filamentous-cluster (Krassilnikoviae) distribution in sea. Kriss & Mitskevich, 1960, **23,** 441.
Organisms, micro, isolated from the World Ocean, biochemical activity. Kriss, Mishustina & Zemtsova, 1962, **29,** 221.
Ornithine carbamoyl transferase by *Saccharomyces cerevisiae*, effect of biotin deficiency on the synthesis of. Dixon & Rose, 1963, **31,** vii.
Ornithine carbamoyl transferase synthesis by *Saccharomyces cerevisiae*. Dixon & Rose, 1963, **31,** vii.
Orthophosphate accumulation in *Tetrahymena pyriformis*, influence of hydrogen-ion concentration and 2:4-dinitrophenol. Conner, Goldberg & Kornacker, 1961, **24,** 239.
Osmosis, lysis of *Vibrio costicolus* by. Christian & Ingram, 1959, **20,** 32.
Osmosis of protoplasts of *Micrococcus lysodeikticus*. Gilby & Few, 1959, **20,** 321.
Osmotic barrier for inorganic phosphate in chick embryo cells and its stability during the latent and release periods of infection by vesicular stomatitis virus. Cooper, 1957, **17,** 353.
Osmotic behaviour of *Desulphovibrio desulphuricans*. Littlewood & Postgate, 1957, **16,** 596.
Osmotic properties of 'protoplasts' from *Staphylococcus aureus*. Mitchell & Moyle, 1957, **16,** 184.
Ostreogrycins—a family of synergistic antibiotics. Lester Smith, 1963, **33,** iii.
Ouchterlony gel plates, antigenic distinctions between moulds in. Feinberg & Grayson, 1958, **18,** i.
Oxaloacetic acid, enzymic conversion of the tartaric acids to. Shilo, 1957, **16,** 472.
Oxidase reaction as a taxonomic tool. Steel, 1961, **25,** 297.
Oxidases, amino acid, in aged suspensions of a *Proteus* sp., change in activity. Clarke, 1958, **18,** vi.
Oxidases of *Gelasinospora tetrasperma* in relation to the endogeneous respiration. Boulter, 1957, **16,** 305.

Oxidation, acetate and ethanol, by *Euglena gracilis*. Wilson & Danforth, 1958, **18,** 535.
Oxidation, bacterial, of 2:4-dichloro- and 4-chloro-2-methylphenoxyacetic acid, adaptive patterns in. Steenson & Walker, 1958, **18,** 692.
Oxidation, bacterial, of quinic acid, an aromatic intermediate. Rogoff, 1958, **19,** 330.
β-Oxidation by soil nocardias, influence of chemical structure on. Webley, Duff & Farmer, 1958, **18,** 733.
Oxidation of ammonia to nitrite by *Nitrosomonas europaea*, influence of corn steep liquor. Gundersen, 1958, **19,** 190.
Oxidation of aromatic compounds by the conidia of *Aspergillus nidulans*. Shepherd & Villanueva, 1959, **20,** vii.
Oxidation, methanol, in Pseudomonas strain M27. Anthony & Zatman, 1963, **31,** xxi.
Oxidation ponds, containing the genus *Spirillum*. Pretorius, 1963, **32,** 403.
Oxidative activity in *Saccharomyces cerevisae*. Strittmatter, 1957, **16,** 169.
2-Oxoglutaric acid, source of carbon for *Escherichia coli*. Halpern & Umbarger, 1961, **26,** 175.
4-Oxo-norleucine isolation from *Citrobacter freundii* polysaccharide. Barry, Chen & Roark, 1963, **33,** 95.
Oxygen and arginine on the motility of a strain of *Pseudomonas* sp., influence of. Sherris, Preston & Shoesmith, 1957, **16,** 86.
Oxygen consumption in micro-organisms. Whitaker & Elsden, 1963, **31,** xxii.
Oxygen, effect on denitrification. Jannash, 1960, **23,** 55.
Oxygen, effect on freeze-dried *Escherichia coli*. Lion & Bergmann, 1961, **24,** 191.
Oxygen, effect on growth of *Mycobacterium tuberculosis* in semi-solid agar. Knox, Lister & Thomas, 1957, **17,** ix.
Oxygen, effect on respiration and nitrogen fixation by soybean root nodules. Bergersen, 1962, **29,** 113.
Oxygen, polarographic estimation of, in semi-solid agar. Penikett, 1957, **17,** ix.
Oxygen, protection of freeze-dried *Escherichia coli* against effect of. Lion, 1963, **32,** 321.
Oxygen requirement of growing cultures of an *Aerobacter* species determined by means of the continuous culture technique. Pirt, 1957, **16,** 59.
Oxygen, substances which protected lyophilized *Escherichia coli* against lethal effects of. Lion & Bergmann, 1961, **25,** 291.
Oxytetracycline, sensitivity of trachoma virus to. Watkins, 1961, **26,** 427.

Paracolobactrum aerogenoides, adaptive degradation of L-histidine. Tristram, 1960, **23,** 425.
Paracolon group, factors controlling lactose-fermentation. Lowe, 1960, **23,** 127.
Paramecium aurelia, antigen studies by fluorescent antibodies. Beale & Mott, 1962, **28,** 617.
Paramecium aurelia, autoradiographic studies. Butzel & van Wagtendonk, 1963, **30,** 503.
Paramecium aurelia, composition of lambda in. van Wagtendonk & Tanguay, 1963, **33,** 395.
Paramecium aurelia, immunological assay of immobilizing antigens of. Bishop, 1963, **30,** 271.
Paramecium aurelia, mate-killer particles. Beale & Jurand, 1960, **23,** 243.
Paramecium aurelia, studies on the antigens of, with the aid of fluorescent antibodies. Beale & Kacser, 1957, **17,** 68.
Paramecium aurelia variety 2, immunological studies of the immobilization antigens of. Finger, 1957, **16,** 350.
Paramecium aurelia, variety 4, stock 47.8 (sensitive) carbohydrate metabolism of. Vloedman *et al.*, 1957, **16,** 628.
Paramecium bursaria, illegitimate mating in. Larison & Siegel, 1961, **26,** 499.
Paramecium caudatum, flocculation of suspended matter by. Curds, 1963, **33,** 357.
Paramecium caudatum, protein factor in nutrition. Lilly & Klosek, 1961, **24,** 327.
Paramecium, gel diffusion studies on serotype and serotype transformation in. Balbinder & Preer, 1959, **21,** 156.
Particle, characteristic, of foot-and-mouth disease, concentration and electron microscopy. Bradish, Henderson & Kirkham, 1960, **22,** 379.
Particles, mate-killer, in *Paramecium aurelia*. Beale & Jurand, 1960, **23,** 243.
Particles, with different lengths, separation and properties in tobacco rattle virus. Harrison & Nixon, 1959, **21,** 569.
PAS resistance of mutations of *Mycobacterium tuberculosis*. Tsukamura, 1960, **23,** 203.
Pasteurella pestis, bacteriocin-like material produced by. Ben-Gurion & Hertman, 1958, **19,** 289.
Pasteurella pestis, influence of environment on antigen production. Pirt, Thackeray & Harris-Smith, 1961, **25,** 119.
Pasteurella pseudotuberculosis, smooth and rough somatic antigens of. Davies, 1958, **18,** 118.
Pasteurella pseudotuberculosis somatic antigens, serological specificities. Crumpton, Davies & Hutchison, 1958, **18,** 129.
Pasteurella septica, antigens of. MacLennan & Rondle, 1957, **17,** vii.
Pasteurella septica, taxonomy. Talbot & Sneath, 1960, **22,** 303.
Pasteurella spp., selective media. Morris, 1958, **19,** 305.
Pasteurella tularensis, effect of inorganic ions on respiration in. Miller & Avi-Dor, 1958, **18,** 221.
Pasteurella tularensis, medium for growth. Hood, 1961, **26,** 45.
*Pathogenic significance of urease in *Corynebacterium renale*. Lister, 1957, **16,** ix.
Pathogenicity and cultural characters in *Venturia inaequalis* and *V. pirina*, relationships between. Kirkham, 1957, **16,** 360.
Pathogenicity, and serology of the genus *Chromobacterium*. Sneath & Buckland, 1959, **20,** 414.
Pathogenicity and taxonomy of '*Streptococcus bombycis*' for silkworm caterpillars. Lysenko, 1958, **18,** 774.
Pathogenicity of *Bacillus anthracis* lysogenic with mutants of phage W. Ivánovics, 1962, **28,** 87.
Pathogenicity of *Botrytis fabae*, *Uromyces fabae* and *Erysiphe graminis*, effects of ultraviolet radiation on. Buxton, Last & Nour, 1957, **16,** 764.
Pathogens, plant, chromatographic examination of the products of digestion of pectic materials by. Smith, 1958, **18,** 42.
Pathogens, plant, production of pectic enzymes. Smith, 1958, **18,** 33.

Pathogens related to *Bacillus cereus*, bacteriophages of. Norris, 1961, **26,** 167.
Pathway of glucose metabolism in *Zygorrhynchus moelleri*. Bartlett & Moses, 1957, **16,** 550.
Pectic enzymes by plant pathogenic and other bacteria, survey of production of. Smith, 1958, **18,** 33.
Pectolytic soil *Flabovacterium*, some properties of. Dorey, 1957, **16,** x.
Pediococci, culture and physiology. Günther & White, 1961, **26,** 185.
Pediococci, serology of. Günther & White, 1961, **26,** 199.
Pediococcus, Gram-positive. Garvie, Gregory & Mabbitt, 1961, **24,** 25.
Penicillin, biochemical parallels between lysis by virulent phage and lysis by. Weidel & Primosigh, 1958, **18,** 513.
Penicillin, electron microscopy of L-forms induced by, in *Proteus vulgaris*. Pease, 1957, **17,** 64.
Penicillin induced lysis in *Escherichia coli*. Boman & Eriksson, 1963, **31,** 339.
Penicillin, induction of L-phase in streptococci with amino acids. Michel & Hijmans, 1960, **23,** 35.
Penicillin production in *Penicillium chrysogenum*. Macdonald, Hutchinson & Gillet, 1963, **33,** 375.
Penicillin, relationship between Gram-negative rods and staphylococci grown in. Briggs, Crawford, Abraham & Gladstone, 1959, **21,** 205.
Penicillin-treated cultures of *Staphylococcus aureus*, Gram-negative rods in. Hilson & Elek, 1959, **21,** 208.
Penicillin-treated staphylococci, attempts to obtain Gram-negative rods from. Paine & Daniel, 1959, **21,** 203.
Penicillin yield of auxotrophs of *Penicillium chrysogenum*. Macdonald, Hutchinson & Gillett, 1963, **33,** 365.
Penicillinase, cell-bound, in protoplasts of *Bacillus cereus*. Sheinin, 1959, **21,** 124.
Penicillinase, cell-bound, location in *Bacillus subtilis*. Kushner & Pollock, 1961, **26,** 255.
Penicillinase formation in *Staphylococcus aureus*, mutations affecting. Novick, 1963, **33,** 121.
Penicillinase, immunological study of. Kushner, 1960, **23,** 381.
Penicillinase in Gram-negative bacteria. Percival, Brumfitt & de Louvois, 1963, **32,** 77.
Penicillinase, measurement of liberation from *Bacillus subtilis*. Pollock, 1961, **26,** 239.
Penicillinase, mechanism of liberation from *Bacillus subtilis*. Pollock, 1961, **26,** 267.
Penicillinase produced by Staphylococcus. Swallow & Sneath, 1962, **28,** 461.
Penicillinase-producing strain of *Staphylococcus aureus*, synergistic action of cephalosporin C and benzylpenicillin against. Crawford & Abraham, 1957, **16,** 604.
Penicillinase resistance in a strain of *Escherichia coli*. Smith, 1963, **30,** 299.
Penicillins, activities and penicillinase stability of different. Knox & Smith, 1962, **28,** 261.
Penicillins, structure and function in. Richmond & Collins, 1963, **33,** iv.
Penicillium chrysogenum, formation and segregation of heterozygous diploids in. Macdonald, Hutchinson & Gillett, 1963, **33,** 385.
Penicillium chrysogenum, heterokaryons in. Macdonald, Hutchinson & Gillett, 1963, **33,** 375.
Penicillium chrysogenum, isolation of auxotrophs. Macdonald, Hutchinson & Gillett, 1963, **33,** 365.
Penicillium cyaneo-fulvum, studies on a toxin-inactivating substance excreted by. Rose & Martin, 1959, **20,** 451.
Penicillium spp., growth and sporulation. Basu & Bhattacharyya, 1962, **27,** 61.
Pentose, physiological factors in the production of an iodophilic polysaccharide from, by a sheep rumen bacterium. Doetsch *et al.*, 1957, **16,** 156.
Permeability of the envelopes of *Staphylococcus aureus* to some salts, amino acids and non-electrolytes. Mitchell & Moyle, 1959, **20,** 434.
Permeability, selective, forming bacterial cell wall. Rogers, 1963, **32,** 19.
Permeases of *Mycobacterium smegmatis*. Ellard & Clarke, 1959, **21,** 338.
Peroxidase and catalase content of *Neurospora crassa*, effect of molybdenum deficiency on the. Nicholas, 1957, **17,** 689.
Peroxidase and catalase in mycobacteria, observations. Winder, 1959, **20,** v.
Peroxidase-thiocyanate inhibition of streptococci in raw milk. Reiter, Pickering, Oram & Pope, 1963, **33,** xii.
Pesticin biosynthesis. Hertman & Ben-Gurion, 1959, **21,** 135.
pH, cations and heat effect of vaccinia virus. Kaplan, 1963, **31,** 313.
pH influence on orthophosphate accumulation in *Tetrahymena pyriformis*. Conner, Goldberg & Kornacker, 1961, **24,** 239.
pH, influence on the antibacterial action of subtilin A. Sacks & Pence, 1958, **19,** 542.
pH value at surface of *Bacillus subtilis*. Weiss, 1963, **32,** 331.
Phaeodactylum tricornutum, observations on. Lewin, Lewin & Philpott, 1958, **18,** 418.
Phaeodactylum tricornutum, taxonomic position of. Lewin, 1958, **18,** 427.
Phage, *see under* Bacteriophage.
Phage, examination of Brucella cultures for lysis by. Morgan, 1963, **30,** 437.
Phage, inter-relationship between colicin sensitivity and resistance. Mukai, 1960, **23,** 539.
Phage λ, conjugal transfer of immunity in *Escherichia coli*. Fisher, 1962, **28,** 711.
Phage, lambda (λ_{22}), infection of *Escherichia coli* with. Fry, 1963, **31,** 297.
Phage lysin, group N streptococcal. Reiter & Oram, 1963, **32,** 29.
Phage, Pc, interference with multiplication by *Pseudomonas aeruginosa*. Mercer & Mills, 1960, **23,** 253.
Phage, staphylococcal, effect of heat on. Asheshov & Jevons, 1963, **31,** 97.
Phages, staphylococcal, serology of and sodium chloride tolerance. West & Kelly, 1962, **28,** 367.
Phages, transducing for *Bacillus subtilis*. Takahashi, 1963, **31,** 211.
Phagocytosis, fate of Staphylococci after. Shayegani & Kapral, 1962, **29,** 625.
Phagocytosis, influence of cortisone and some other substances. Buttle & Northover, 1959, **20,** iii.
Phases, flagellar, in Salmonella. Douglas & Edwards, 1962, **29,** 367.

Phenanthridines, mode of action of: the effect of ethidium bromide on cell division and nucleic acid synthesis. Newton, 1957, **17,** 718.
Phenol, use in preparation of infective preparations of the tobacco rattle virus. Harrison & Nixon, 1959, **21,** 591.
Phormidium persicinum, artificial cultivation of a red-pigmented marine blue-green alga. Pintner & Provasoli, 1958, **18,** 190.
Phosphate transfer in normal chick embryo cells and in cells infected with vesicular stomatitis virus. Cooper, 1957, **17,** 335.
Phospholipase A and lipid solvents, action on Murray Valley encaphalitis virus. Anderson & Ada, 1961, **25,** 451.
Phosphorus-containing compounds in relation to the Gram stain. Jones, Rizvi & Stacey, 1958, **18,** 597.
Phosphorus, influence on the development of *Streptomyces aureofaciens* and on its ability to produce chlortetracycline. Prokofieva-Belgovskaya & Popova, 1959, **20,** 462.
Photopigments of *Rhodopseudomonas spheroides* and synthesis of protein. Sistrom, 1962, **28,** 599.
Photopigments in *Rhodopseudomonas spheroides*, kinetics of synthesis. Sistrom, 1962, **28,** 607.
Photosynthesis, chromatophores in bacteria. Lascelles, 1962, **29,** 47.
Photosynthesis, mutational changes in pigment system of *Rhodopseudomonas spheroides*. Griffiths, 1962, **27,** 427.
Phycomyces, evidence for a flavoprotein photoreceptor in. Carlile, 1962, **28,** 161.
Phyllosphere, cuticle decomposition by micro-organisms in. Ruinen, 1963, **32,** iv.
Physarum polycephalum, pure culture on partially defined soluble medium. Daniel & Rusch, 1961, **25,** 47.
Physiology of aquatic hyphomycetes. Thornton, 1963, **33,** 23.
Physiology of pediococci. Günther & White, 1961, **26,** 185.
Phytoplankton, marine, auxotrophy and organic compounds in the nutrition of. Droop, 1957, **16,** 286.
Pigment, production, effects of blue-green algae extracts by *Serratia marcescens*. Davidson, 1959, **20,** 605.
Pigments, carotenoid, of mycoplasma. Smith, 1963, **32,** 307.
Pigments of Trichophyta. McCabe & Mier, 1960, **23,** 1.
Pithomyces chartarum, production of sporidesmin and sporidesmolides. Done, Mortimer, Taylor & Russell, 1961, **26,** 207.
Pithomyces chartarum, production of sporidesmin and sporidesmolides. Dingley, Done, Taylor & Russell, 1962, **29,** 127.
Pithomyces chartarum, spore surface in. Bertaud, Morice, Russell & Taylor, 1963, **32,** 385.
Pityrosporum ovale, fatty acid requirement of. Shifrine & Marr, 1963, **32,** 263.
Plankton around the British Isles. Rae, 1957, **16,** 265.
Plankton, measuring bacteria by means of a direct membrane filter. Jannasch, 1958, **18,** 609.
Planktonic bacteria. Collins, 1957, **16,** 268.
Plants, leguminous, reversible changes in strains of tobacco mosaic virus from. Bawden, 1958, **18,** 751.
Plasma, rabbit, clotting by group D streptococci. Wood, 1959, **21,** 385.
Plasmodiophora brassicae, solution-culture technique for obtaining root-hair, or primary, infection by. Macfarlane, 1958, **18,** 720.
Plating, replica in Neurospora. Maling, 1960, **23,** 257.
Platymonas, cell walls. Lewin, 1958, **19,** 87.
Pleuropneumonia, corynebacteria and related PPLO. Pease & Laughton, 1962, **27,** 383.
Pleuropneumonia-like organisms, lysis by various agents. Razin & Argaman, 1963, **30,** 155.
Pneumococcus, biosynthesis of a disaccharide from UDPG. Smith & Mills, 1963, **33,** 255.
Pneumococcus, mutations resistant to erythromycin. Ravin & Iyer, 1961, **26,** 277.
Pneumococcus, study of enzymes in extracts of a non-capsulated strain concerned with uridine pyrophosphoglycosyl metabolism. Smith *et al.*, 1959, **20,** 654.
Pneumococcus type I, uridine pyrophosphoglucose dehydrogenase in. Smith, Mills, Austrian & Bernheimer, 1960, **22,** 265.
Pneumococcus type II non-capsulated, cellular polysaccharide of. Smith *et al.*, 1957, **17,** 437.
Points, freezing, of bacterial cells in relation to halophilism. Christian & Ingram, 1959, **20,** 27.
Points, growing in normal and filamentous *Bacillus megaterium*. Pontieri & Schiano, 1958, **18,** 607.
Polarographic estimation of oxygen in semi-solid agar. Penikett, 1957, **17,** ix.
Polyamines, effect on development of bacteriophage ϕR. Tucker, 1963, **32,** 287.
Polyamines in bacterial cells. Bachrach & Cohen, 1961, **26,** 1.
Polyenic antibiotics by soil streptomycetes. Ball, Bessell & Mortimer, 1957, **17,** 96.
Polygalacturonase, role in root-hair invasion. Ljunggren & Fåhraeus, 1961, **26,** 521.
Poly-β-hydroxybutyrate inclusions in the classification of aerobic Gram-negative bacteria. Hayward, 1959, **21,** ii.
Poly-β-hydroxybutyrate inclusions of *Bacillus* species, isolation and estimation. Williamson & Wilkinson, 1958, **19,** 198.
Poly-β-hydroxybutyrate metabolism in *Bacillus cereus* and *B. megaterium*. Macrae & Wilkinson, 1958, **19,** 210.
Poly-β-hydroxybutyric acid, synthesis and breakdown by bacteria. Hayward, Forsyth & Roberts, 1959, **20,** 510.
Polymerase, ribonucleic acid, effects of antimicrobial agents on. Waring, 1963, **33,** x.
Polymetaphosphatase, purification and properties from *Corynebacterium xerosis*. Muhammed, Rodgers & Hughes, 1959, **20,** 482.
Polymorphism of *Ankistrodesmus* spp., morphogenesis and. McMillan, 1957, **17,** 658.
Polyol, derivatives of cytidine diphosphate in micro-organisms, occurrence. Clarke, Glover & Mathias, 1959, **20,** 156.
Polyphenol inactivation of cucumber mosaic virus. Pierpoint & Harrison, 1963, **32,** 429.
Polyphenolic host metabolites in the nutrition of *Venturia inaequalis* and *V. pirina*, studies of the significance of. Kirkham, 1957, **17,** 120.
Polyphenolic metabolites of apple and pear in the host relations of *Venturia inaequalis* and *V. pirina*. Kirkham, 1957, **17,** 491.

Polyphenoloxidase, in leaf extracts, relation to the instability of cucumber mosaic. Harrison & Pierpoint, 1963, **32,** 417.
Polysaccharide from *Citrobacter freundii*, isolation of *N*-acetylneuraminic acid and 4-oxo-norleucine. Barry, Chen & Roark, 1963, **33,** 95.
Polysaccharide hydrolysates, shigella, the hexose constituents of. Simmons, 1957, **17,** 650.
Polysaccharide, iodophilic, physiological factors in the production of, from pentose by a sheep rumen bacterium. Doetsch *et al.*, 1957, **16,** 156.
Polysaccharide, specific, from *Mycoplasma mycoides*. Buttery & Plackett, 1960, **23,** 357.
Polysaccharide synthesis, light-stimulated, in *Blastocladiella emersonii*. Goldstein & Cantino, 1962, **28,** 689.
Polysaccharides, capsular, of dextran-producing organisms *Leuconostoc mesenteroides*, *L. dextranicum* and *Streptococcus bovis*. Bailey & Oxford, 1959, **20,** 258.
Polysaccharides, extracellular, of Rhizobium. Humphrey & Vincent, 1959, **21,** 477.
Polythene used for tissue culture. Fulton, 1960, **22,** 416.
Polythionates in metabolism of thiosulphate by Thiobacilli. Jones & Happold, 1961, **26,** 361.
Population, growing bacterial, a new kinetic model of. Perret, 1960, **22,** 589.
Population, microbial factors influencing the rumen. Warner, 1962, **28,** 129.
Populations, mixed, of *Chilomonas paramecium* and *Tetrahymena pyriformis*, growth of. Mučibabić, 1957, **16,** 561.
Populations of *Klebsiella pneumoniae*, variations in drug resistance. Hughes, 1961, **25,** 157.
Porphyrin, effect of ferrous ions on the formation of toxin, by a strain of *Corynebacterium diphtheriae*. Clarke, 1958, **18,** 698.
Potassium and sodium in non-halophilic bacteria in relation to salt tolerance. Christian & Waltho, 1961, **25,** 97.
Potassium uptake by *Escherichia coli*. Wright & Wyatt, 1963, **33,** vii.
Potassium uptake by *Staphylococcus aureus*. Wright & Wyatt, 1963, **33,** vii.
Potato bouquet, beet ringspot and tomato black ring viruses, relationship between. Harrison, 1958, **18,** 450.
Potato tubers, bacteriostatic effect in. Jordana, 1958, **18,** xvi.
Poteriochromonas stipitata, nutritional requirements of. Isenberg, 1962, **29,** 373.
Precipitin tests, gel diffusion, preliminary study of tobacco mosaic virus by. Kleczkowski, 1957, **16,** 405.
Preservation of *Eperythrozoon coccoides*. Seamer, 1959, **21,** 344.
Preservation of Leptospires. Annear, 1962, **27,** 341.
Pressure, osmotic, turbidity changes in suspensions of Gram-positive bacteria in relation to. Kuczynski-Halmann, Avi-Dor & Mager, 1958, **18,** 364.
Pristiphora erichsonii, alkali resistance in a strain of *Bacillus cereus* pathogenic for the larch sawfly. Kushner & Lisson, 1959, **21,** 96.
Proflavine, influence on synthesis of foot-and-mouth disease virus. Brown & Stewart, 1960, **23,** 369.
Proflavine, origin of bacterial resistance to. Sinai & Yudkin, 1959, **20,** 373, 384, 400.
Proflavine, origin of bacterial resistance to. Thornley & Yudkin, 1959, **20,** 355, 365.
Proline in growth of *Salmonella typhimurium*. Maaløe & Richmond, 1962, **27,** 269.
Properties, biological and physical, of filamentous influenza virus. Ada, Perry & Abbot, 1958, **19,** 23.
Prophage substitution in *Salmonella typhimurium*. Boyd & Bidwell, 1962, **29,** 659.
Propionic acid produced by *Actinomyces propionicus* sp.nov. Buchanan & Pine, 1962, **28,** 305.
Protein and nucleic acid synthesis, action of chloramphenicol on, by *Escherichia coli* strain B. Harrington, 1958, **18,** 767.
Protein and nucleic acid synthesis in *Aspergillus nidulans*, inhibitors of. Shepherd, 1958, **18,** iv.
Protein and nucleic acid synthesis in *Saccharomyces mandshuricus*, effect of actidione on. Kerridge, 1957, **16,** v.
Protein and proteolytic activity in the sheep rumen after feeding. Blackburn & Hobson, 1960, **22,** 290.
Protein, copper, azurin found in Bordetella. Sutherland & Wilkinson, 1963, **30,** 105.
Protein crystal formation in *Bacillus cereus*, electron microscopy. Norris & Watson, 1960, **22,** 744.
Protein, homologous, effect of endotoxin on. Kováts, 1963, **31,** x.
Protein hypersensitivity, effect of endotoxin on. Kováts, 1963, **31,** x.
Protein synthesis and bacterial ribosomes. McQuillen, 1962, **29,** 53.
Protein synthesis and photopigments in *Rhodopseudomonas spheroides*. Sistrom, 1962, **28,** 599.
Protein synthesis in a species of thermophilic bacillus. Hancock, 1957, **17,** 480.
Protein synthesis in a thermophilic bacillus. Hancock, 1957, **16,** v.
Protein synthesis, light-stimulated, in *Blastocladiella emersonii*. Goldstein & Cantino, 1962, **28,** 689.
Proteinase, (δ-antigen) of *Clostridium histolyticum*, cysteine-inactivated. Oakley & Warrack, 1958, **18,** 9.
Proteins, lethal for mice from *Vibrio cholerae* and water vibrios. Jenkin & Rowley, 1959, **21,** 191.
Proteins, role of lipids in final stage of synthesis. Hunter & Godson, 1962, **29,** 65.
Proteolysis in sheep rumen. Blackburn & Hobson, 1960, **22,** 272.
Proteus hauseri bacteriophage, host-range of. Coetzee, 1963, **31,** 219.
Proteus hauseri, fimbriae and haemagglutinating activity in. Shedden, 1962, **28,** 1.
Proteus hauseri, morphological variants. Coetzee & Sacks, 1960, **23,** 209.
Proteus hauseri, sodium azide resistance in. Coetzee, de Klerk & Maré, 1963, **33,** 313.
Proteus hauseri, sucrose fermentation by. Coetzee, 1962, **29,** 455.
Proteus L-form, chemical and metabolic properties of various elements. Weibull & Beckman, 1961, **24,** 379.
Proteus L-form, growth of elements in culture. Weibull & Lundin, 1962, **27,** 241.
Proteus mirabilis, transduction of streptomycin resistance. Coetzee & Sacks, 1960, **23,** 445.
Proteus mirabilis, transduction of swarming. Coetzee, 1963, **33,** 1.
Proteus rettgeri bacteriophage, the host-range of. Coetzee, 1963, **31,** 219.

Proteus sp., change in activity of amino acid oxidases in aged suspensions of. Clarke, 1958, **18,** vi.
Proteus strains, inactivation and sensitivity to ampicillin. Ayliffe, 1963, **30,** 339.
Proteus vulgaris, decarboxylation of neutral amino acids in. Ekladius, King & Sutton, 1957, **17,** 602.
Proteus vulgaris, distribution of flagella in. Bisset & Pease, 1957, **16,** 382.
Proteus vulgaris, electron microscopy of L-forms induced by penicillin in. Pease, 1957, **17,** 64.
Proteus vulgaris, pyruvate accumulation and development of thiamine deficiency in cultures of. Jackson, 1957, **16,** 711.
Proteus vulgaris, reconsideration of the swarming of. Hughes, 1957, **17,** 49.
Protoplasts from *Staphylococcus aureus*, autolytic release and osmotic properties of. Mitchell & Moyle, 1957, **16,** 184.
Protoplasts, lysis by alcohols. Gilby & Few, 1960, **23,** 27.
Protoplasts, lysis by ionic detergents. Gilby & Few, 1960, **23,** 19.
Protoplasts, lysis by various agents. Razin & Argaman, 1963, **30,** 155.
Protoplasts, of *Micrococcus lysodeikticus*, osmotic properties. Gilby & Few, 1959, **20,** 321.
Protoplasts, the localization of the cell-bound penicillinase of *Bacillus cereus* in. Sheinin, 1959, **21,** 124.
Protozoa as pharmacological tools: the antihistamines. Sanders & Nathan, 1959, **21,** 264.
Protozoa, cultivation of rumen oligotrich. Clarke, 1963, **33,** 401.
Protozoa, relationships in rumen. Eadie, 1962, **29,** 579.
Protozoa, rumen ciliate, development and testing of a method of counting. Boyne, Eadie & Raitt, 1957, **17,** 414.
Protozoa, sheep rumen oligotrich, cultivation of. Coleman, 1960, **22,** 555.
Protozoa, some aspects and their way of life. Robertson, 1963, **33,** 177.
Prymnesium parvum and vitamins B_{12}. Rahat & Reich, 1963, **31,** 195.
Prymnesium parvum cultures, toxicity of extracellular phase. Yariv & Hestrin, 1961, **24,** 165.
Prymnesium parvum, lysis by weak electrolytes. Shilo & Shilo, 1962, **29,** 645.
Prymnesium parvum, methionine in the metabolism of. Rahat & Reich, 1963, **31,** 203.
Pseudomonad, fluorescent, influence of growth rate and aeration on the respiratory and cytochrome system, grown in continuous culture. Rosenberger & Kogut, 1958, **19,** 228.
Pseudomonad, grown in continuous culture, influence of growth rate and aeration. Rosenberger & Kogut, 1958, **18,** ii.
Pseudomonad, marine, proposed classification. Brown, 1960, **23,** 471.
Pseudomonads, aerobic breakdown of uric acid by. Bachrach, 1957, **17,** 1.
Pseudomonads, identification by breakdown of arginine. Sherris, Shoesmith, Parker & Breckon, 1959, **21,** 389.
Pseudomonads, utilization of the tartaric acids by. Shilo & Stanier, 1957, **16,** 482.
Pseudomonas aeruginosa, induction and repression of an enzyme in. Brammar & Clarke, 1963, **32,** iii.
Pseudomonas aeruginosa, amidase produced by. Kelly & Clarke, 1962, **27,** 305.
Pseudomonas aeruginosa, an outline of the pattern of generation times. Powell, 1958, **18,** 382.
Pseudomonas aeruginosa, evidence for occurrence of permeases for tricarboxylic acid cycle intermediates. Clarke & Meadow, 1959, **20,** 144.
Pseudomonas aeruginosa, in terference of Pc phage multiplication. Mercer & Mills, 1960, **23,** 253.
Pseudomonas aeruginosa, pyocyanine biosynthesis by. Grossowicz, Hayat & Halpern, 1957, **16,** 576.
Pseudomonas aeruginosa, quantitative aspects of the Gaby & Hadley test. Bell & Meyrath, 1963, **31,** ix.
Pseudomonas aeruginosa, size of organisms and optical density. Bernheim, 1963, **30,** 53.
Pseudomonas aeruginosa, some general properties of a psychrophilic pseudomonad: the effects of temperature on some of these properties and the utilization of glucose by this organism and. Brown, 1957, **17,** 640.
Pseudomonas aeruginosa, transduction-like process within a single strain of. Loutit, 1958, **18,** 315.
Pseudomonas and *Acetomonas*, differentiation. Shimwell, Carr & Rhodes, 1960, **23,** 283.
Pseudomonas, catabolism of nitrogenous compounds. Gaby, Logan & Whitaker, 1962, **28,** 379.
Pseudomonas, classification. Lysenko, 1961, **25,** 379.
Pseudomonas, classification of. Park, 1962, **27,** 121.
Pseudomonas fluorescens, electronic computation. Rhodes, 1961, **25,** 331.
Pseudomonas fluorescens, the characterization of. Rhodes, 1959, **21,** 221.
Pseudomonas maltophilia, an Alcaligenes-like species. Hugh & Ryschenkow, 1961, **26,** 123.
Pseudomonas odorans, taxonomy of the species. Málek, Radochová & Lysenko, 1963, **33,** 349.
Pseudomonas pyocyanea, effect of cold diluent on viable count of. Gorrill & McNeil, 1960, **22,** 437.
Pseudomonas repression of tartrate dehydratases in. Rosenberger & Shilo, 1963, **31,** 413.
Pseudomonas strain M27, methanol oxidation in. Anthony & Zatman, 1963, **31,** xxi.
Pseudomonas sp., influence of oxygen and arginine on the motility of a strain of. Sherris, Preston & Shoesmith, 1957, **16,** 86.
Pseudomonas sp., mechanism of arginine-activated motility. Shoesmith & Sherris, 1960, **22,** 10.
Pseudomonas spp., cytology of, as revealed by silver-plating staining method. Rhodes, 1958, **18,** 639.
Pseudomonas spp. on flatfish. Liston, 1957, **16,** 205.
Psittacosis-lymphogranuloma organisms, cell-wall constituents of. Perkins & Allison, 1963, **30,** 469.
Psychotria, leaf-nodule symbiosis of. Centifanto & Silver, 1963, **32,** v.
Psychrophilic pseudomonad, general properties of: the effects of temperature on some of these properties and the utilization of glucose by this organism and *Pseudomonas aeruginosa*. Brown, 1957, **17,** 640.
Puccinia helianthi, transamination reactions in uredospores of. Smith, 1963, **30,** 35.
Purification and concentration of viruses and virus soluble antigens on calcium phosphate. Taverne, Marshall & Fulton, 1958, **19,** 451.
Purification of bacterial flagella by ion exchange chromatography. Martinez, 1963, **33,** 115.

Purine ribosides, autoradiographic studies of the differential incorporation by *Paramecium aurelia*. Butzel & van Wagtendonk, 1963, **30,** 503.
Pyocyanine biosynthesis by *Pseudomonas aeruginosa*. Grossowicz, Hayat & Halpern, 1957, **16,** 576.
Pyrimidine ribosides, autoradiographic studies of the differential incorporation by *Paramecium aurelia*. Butzel & van Wagtendonk, 1963, **30,** 503.
Pyrimidines, decomposition by *Nocardia corallina*. Batt & Woods, 1961, **24,** 207.
Pyruvate accumulation and development of thiamine deficiency in cultures of *Proteus vulgaris*. Jackson, 1957, **16,** 711.
Pyruvate catabolism in acetic acid bacteria. De Ley & Schell, 1962, **29,** 589.
Pythium debaryanum, fine structure of young hyphae. Hawker & Abbott, 1963, **31,** 491.
Pythium spp., comparative nutrition. Fothergill & Hide, 1962, **29,** 325.

Quaternary ammonium compounds, anti-microbial activity. Cox & D'Arcy, 1959, **20,** i.
Quaternary ammonium compounds, effect on citric acid and sterol synthesis in *Aspergillus niger*. Raman & Shanmugasundaram, 1963, **31,** 23.
Quinic acid, an aromatic intermediate in the bacterial oxidation. Rogoff, 1958, **19,** 330.

Radiation, effect of *N*-ethylmaleimide on sensitivity of bacteria. Bridges, 1961, **26,** 467.
Radiation, ultraviolet, on the pathogenicity of *Botrytis fabae*, *Uromyces fabae* and *Erysiphe graminis*, effects of. Buxton, Last & Nour, 1957, **16,** 764.
Radiosensitivity, anaerobic growth as a factor influencing. Hodgkins & Alper, 1963, **30,** 307.
Radiosensitivity in *Escherichia coli*. Greenberg & Woody-Karrer, 1963, **33,** 283.
Raffinose, the utilization of, by *Lactobacillus bifidus*. Lloyd, 1957, **16,** ii.
Raffinose, yeast unable to assimilate. Santa Maria, 1962, **28,** 375.
Ramycin: a new antibiotic. van Dijck & De Somer, 1958, **18,** 377.
Raspberry leaves, properties of an inhibitor of virus infection from. Cadman, 1959, **20,** 113.
Recombination, gene, in *Escherichia coli*; a new infective factor controlling sex compatibility. Bernstein, 1957, **16,** iii.
Recombination, genetic, in *Streptomyces coelicolor*. Hopwood, 1957, **16,** ii.
Recombination, genetic, in *Verticillium albo-atrum*. Hastie, 1962, **27,** 373.
Recombination in *Actinomyces aureofaciens*. Alikhanian & Borisova, 1961, **26,** 19.
Recombination in mutant stocks of *Vibrio cholerae*. Bhaskaran, 1960, **23,** 47.
Recombination in *Vibrio cholerae*. Bhaskaran, 1958, **19,** 71.
Reductase, nitrite, from *Neurospora crassa*, mechanism of action for. Nicholas, 1958, **18,** vi.
Regeneration of flagella, after removal by non-lethal methods. Stocker & Campbell, 1959, **20,** 670.
Rehydration of dried micro-organisms, influence on viability of. Leach & Scott, 1959, **21,** 295.
Reiter treponeme, antigenic structure of. de Bruijn, 1963, **31,** iii.
Requirements, mineral, of marine bacteria. Tyler, Bielling & Pratt, 1960, **23,** 153.
Resistance, bacterial, to proflavine. Sinai & Yudkin, 1959, **20,** 373, 384, 400.
Resistance, bacterial, to proflavine. Thornley & Yudkin, 1959, **20,** 355, 365.
Resistance, gene controlled, against sensitivity to caffeine and nicotine in saccharomyces. Lindegren, Lindegren & Desborough, 1959, **20,** 504.
Resistance of Gram-negative bacteria to penicillins. Percival, Brumfitt & de Louvois, 1963, **32,** 77.
Resistance, sodium azide, in *Proteus hauseri*. Coetzee, de Klerk & Maré, 1963, **33,** 313.
Respiration, endogenous, the oxidases of *Gelasinospora tetrasperma* in relation to. Boulter, 1957, **16,** 305.
Respiration, impaired, mutants in *Staphylococcus afermentans* with. Gause, Kochetkova & Vladimirova, 1963, **30,** 29.
Respiration inhibitors of sporulation in *Venturia inaequalis*. Kirkham & Flood, 1963, **32,** 123.
Respiration of *Aspergillus oryzae*, influence of media. Meyrath & McIntosh, 1963, **33,** viii.
Respiration, vulnerability of nucleic acids in Staphylococci with impaired. Gause & Kochetkova, 1962, **29,** 317.
'Restoration' of *Escherichia coli* strain B after irradiation: its dependence on suboptimal growth conditions. Alper & Gillies, 1958, **18,** 461.
Review: the growth of *Bordetella pertussis*. Rowatt, 1957, **17,** 297.
Rhizobia, clover root infection by. Fåhraeus, 1957, **16,** 374.
Rhizobium and leguminous plants, effect of root secretions on. Lie, 1963, **32,** v.
Rhizobium, electron microscope study of root-hair infection by. Sahlman & Fåhraeus, 1963, **33,** 425.
Rhizobium, extracellular of polysaccharides. Humphrey & Vincent, 1959, **21,** 477.
Rhizobium, from tropical legumes. Bisset, 1959, **20,** 89.
Rhizobium, influence of calcium and magnesium on growth. Vincent, 1962, **28,** 653.
Rhizobium leguminosarum, the effect of infection with bacteriophage on the electrokinetic potential of. Kleczkowski & Kleczkowski, 1959, **21,** 308.
Rhizobium trifolii, calcium in cell walls of. Humphrey & Vincent, 1962, **29,** 537.
Rhizobium trifolii, fine structure and chemical composition. Vincent, Humphrey & North, 1962, **29,** 551.
Rhizobium trifolii, mutations in. Gupta & Kleczkowska, 1962, **27,** 473.
Rhizopus sexualis, inhibitory effect of low temperature on early stages of zygospore production in. Hawker, Hepden & Perkins, 1957, **17,** 758.
Rhizopus sexualis, zygospore formation. Hepden & Hawker, 1961, **24,** 155.
Rhizopus spores, structural changes in. Hawker & Abbott, 1963, **32,** 295.
Rhizopus stolonifer, mineral nutrition of. Fothergill & Yeoman, 1957, **17,** 631.
Rhizopus, structure of vegetative hyphae of. Hawker & Abbott, 1963, **30,** 401.
Rhizosphere micro-organisms, effects of pea root exudate on antagonism towards *Fusarium oxysporum*. Buxton, 1960, **22,** 678.

Rhizospheres, classification of bacteria from. Brisbane & Rovira, 1961, **26,** 379.
Rhizospheres, streptomycin-resistant bacteria in. Brown, 1961, **24,** 369.
Rhodopseudomonas spheroides, adaptive formation of bacteriochlorophyll. Lascelles, 1959, **20,** iii.
Rhodopseudomonas spheroides, carbohydrate metabolism in. Szymona & Doudoroff, 1960, **22,** 167.
Rhodopseudomonas spheroides, enzymes concerned in bacteriochlorophyll formation. Lascelles, 1960, **23,** 487.
Rhodopseudomonas spheroides, formation of photopigments and synthesis of protein. Sistrom, 1962, **28,** 599.
Rhodopseudomonas spheroides, kinetics of photopigment synthesis. Sistrom, 1962, **28,** 607.
Rhodopseudomonas spheroides, mutational changes in photosynthetic pigment system. Griffiths, 1962, **27,** 427.
Rhodopseudomonas spheroides, protein and bacteriochlorophyll synthesis. Bull & Lascelles, 1962, **28,** iv.
Rhodopseudomonas spheroides, requirement for sodium in growth. Sistrom, 1960, **22,** 778.
Rhodotorula graminis, new species of yeast from New Zealand. di Menna, 1958, **18,** 269.
Rhodotorula nitens sp.nov. isolated from the atmosphere. Mackenzie & Auret, 1963, **31,** 171.
Riboflavin by *Eremothecium ashbyi*, the physiology of. Kapralek, 1962, **29,** 403.
Riboflavin production by *Debaryomyces subglobosus*. Anderson & Harris, 1963, **33,** 137.
Riboflavin, properties of an *Eremothecium ashbyi* strain-producing. Stárka, 1957, **17,** iv.
Ribonucleic acid decline during growth of *Euglena gracilis*. Buetow & Levedahl, 1962, **28,** 579.
Ribonucleic acid effects on growth of Mycoplasma. Razin & Knight, 1960, **22,** 504.
Ribonucleic acid from foot-and-mouth disease virus inactivation. Brown, Cartwright & Stewart, 1963, **31,** 179.
Ribonucleic acid in chick cell cultures of vesicular stomatitis virus. Turco, 1959, **21,** 510.
Ribonucleic acid of chloramphenicol-treated *Shigella flexneri*. Yee & Gezon, 1963, **32,** 299.
Ribonucleic acid synthesis and degradation during antibiotic treatment. Brock & Brock, 1961, **26,** 393.
Ribonucleoprotein, effect of drugs and inorganic ions. Dagley, White, Wild & Sykes, 1962, **29,** 59.
Ribonucleoprotein-containing structures in the cytoplasm of a parasitic flagellate. Newton, 1957, **17,** iii.
Ribosomes and protein synthesis. McQuillen, 1962, **29,** 53.
Ribulose 1:5-diphosphate carboxylase, formation of by growing cultures of Athiorhodaceae. Lascelles, 1960, **23,** 499.
Rickettsiae, cell-wall constituents of. Perkins & Allison, 1963, **30,** 469.
Rift Valley fever virus, interference between active and ultraviolet-irradiated. Naudé & Polson, 1957, **16,** 491.
Rods, Gram-negative, biochemical reactions. Steel & Midgley, 1962, **29,** 171.
Root-hair infection, electron microscope study by rhizobium. Sahlman & Fåhraeus, 1963, **33,** 425.
Root hairs, role of polygalacturonase in invasion by nodule bacteria. Ljunggren & Fåhraeus, 1961, **26,** 521.
Root nodule bacteria, vitamin requirements of. Graham, 1963, **30,** 245.
Root nodules of soybean, effect of oxygen on respiration and fixation. Bergersen, 1962, **29,** 113.
Root nodules, soybean, bacteroids of. Bergersen, 1958, **19,** 312.
Root nodules, soybean, cytology of bacterial component. Bergersen & Briggs, 1958, **19,** 482.
Root secretions, effect on symbiosis of rhizobium and leguminous plants. Lie, 1963, **32,** v.
Rous sarcoma virus, effects of 5-fluoro-uracil on infection *in vitro*. Fairman, 1959, **20,** ii.
Rubidium uptake by *Escherichia coli*. Wright & Wyatt, 1963, **33,** vii.
Rubidium uptake by *Staphylococcus aureus*. Wright & Wyatt, 1963, **33,** vii.
RuDP carboxylase in Thiorhodaceae. Hurlbert & Lascelles, 1963, **33,** 445.
Rumen bacteria, airborne dissemination of. Mann, 1963, **33,** ix.
Rumen bacteria, studies on the identification of, with fluorescent antibodies. Hobson & Mann, 1957, **16,** 463.
Rumen bacterium, physiological factors in production of an iodophilic polysaccharide from a sheep. Doetsch *et al.*, 1957, **16,** 156.
Rumen, bovine; methanogenesis; dissimilation of acetate. Oppermann, Nelson & Brown, 1961, **25,** 103.
Rumen, bovine, yeasts from. Clarke & di Menna, 1961, **25,** 113.
Rumen, calf, properties of a Gram-negative coccus from. Hobson, Mann & Oxford, 1958, **18,** i.
Rumen, cellulolytic preparations from micro-organisms of, and from *Myrothecium verrucaria*. Halliwell, 1957, **17,** 166.
Rumen, ciliate protozoa inter-relationship. Eadie, 1962, **29,** 579.
Rumen cultivation of oligotrich protozoa. Clarke, 1963, **33,** 401.
Rumen, dextran-fermenting organism closely resembling *Lactobacillus bifidus*. Clarke, 1959, **20,** 549.
Rumen, enumeration of micro-organisms. Warner, 1962, **28,** 119.
Rumen, factors influencing microbial population. Warner, 1962, **28,** 129.
Rumen, growth-promoting activity of compounds of the vitamin K group and analogues for a strain of *Fusiformis nigrescens*. Lev, 1959, **20,** 697.
Rumen, isolation and properties of a sulphate-reducing bacterium from. Coleman, 1959, **21,** i.
Rumen micro-organisms, cellulolysis by. Halliwell, 1957, **17,** 153.
Rumen, nutrition of lactic acid bacteria isolated from. Ford, Perry & Briggs, 1958, **18,** 273.
Rumen, nutrition of *Streptococcus bovis* in relation to dextran synthesis. Oxford, 1958, **19,** 617.
Rumen, occurrence and properties of a large Gram-negative coccus. Hobson, Mann & Oxford, 1958, **19,** 462.
Rumen of cattle, cellulolytic activity of bacteria from. Halliwell & Bryant, 1963, **32,** 441.
Rumen of sheep, glyceride hydrolysis and glycerol fermentation in. Garton, Lough & Vioque, 1961, **25,** 215.
Rumen of sheep, glycerol-fermenting and lipolytic bacteria from. Hobson & Mann, 1961, **25,** 227.
Rumen of sheep, improved method for viable bacterial counts. Kistner, 1960, **23,** 565.

Rumen oligotrich protozoa, cultivation of. Coleman, 1960, **22,** 555.
Rumen populations in lambs and calves. Eadie, 1962, **29,** 563.
Rumen proteolytic bacteria, nitrogen metabolism of. Abou Akkada & Blackburn, 1963, **31,** 461.
Rumen, selenomonads, serological tests. Hobson, Mann & Smith, 1962, **29,** 265.
Rumen, sheep, isolation of proteolytic bacteria. Blackburn & Hobson, 1962, **29,** 69.
Rumen, sheep, isolation of proteolytic bacteria from. Blackburn & Hobson, 1960, **22,** 282.
Rumen, sheep, protein and proteolytic activity after feeding. Blackburn & Hobson, 1960, **22,** 290.
Rumen, sheep, proteolysis in. Blackburn & Hobson, 1960, **22,** 272.
Rumen, sheep, sulphate-reducing bacterium from. Coleman, 1960, **22,** 423.
Ryan strain filamentous influenza virus, nucleic acid. Ada & Perry, 1958, **19,** 40.
Ryan strain filamentous influenza virus, properties. Ada, Perry & Abbot, 1958, **19,** 23.

Saccharomyces carlsbergensis, effect of actidione and other antifungal agents on nucleic acid and protein synthesis. Kerridge, 1958, **19,** 497.
Saccharomyces carlsbergensis 4228, observations on assay of vitamin B_6 with. Morris, Hughes & Mulder, 1959, **20,** 566.
Saccharomyces cerevisiae, adaptive variation in the level of oxidative activity in. Strittmatter, 1957, **16,** 169.
Saccharomyces cerevisiae, effect of biotin on synthesis by. Ahmad, Rose & Garg, 1961, **24,** 69.
Saccharomyces cerevisiae, excretion of nicotinic acid by biotin-deficient. Rose, 1960, **23,** 143.
Saccharomyces cerevisiae, growth requirements of biotin-deficient. Ahmad & Rose, 1962, **28,** 147.
Saccharomyces cerevisiae, molar growth yields of. Bauchop, 1958, **18,** vii.
Saccharomyces cerevisiae, osmotic behaviour as affected by biotin deficiency. Rose, 1963, **31,** 151.
Saccharomyces, gene controlled resistance against sensitivity to caffeine and nicotine in. Lindegren, Lindegren & Desborough, 1959, **20,** 504.
Saccharomyces hienipiensis, a new melibiose-fermenting yeast, unable to assimilate raffinose. Santa Maria, 1962, **28,** 375.
Saccharomyces mandshuricus, effect of actidione on protein and nucleic acid synthesis in. Kerridge, 1957, **16,** v.
Saccharomyces pastorianus, morphology induced by cycloheximide. Gundersen & Wadstein, 1962, **28,** 325.
Salmonella, complex flagellar phases in. Douglas & Edwards, 1962, **29,** 367.
Salmonella enteriditis as a genetic donor in intraspecific and interspecific crosses initiated by colicine factors. Meynell, 1962, **28,** 103.
Salmonella, flagellar mutants in. Iino, 1962, **27,** 167.
Salmonella mutants, histidine-requiring, structure mapping by transduction. Hartman, Loper & Šerman, 1960, **22,** 323.
Salmonella, new type of flagella variation. Taylor, Lee, Edwards & Ramsey, 1960, **23,** 583.
Salmonella paratyphi-B, aetiology of fatal infections in partially resistant hosts and their application to mice challenged with, by intraperitoneal injection. Meynell & Stocker, 1957, **16,** 38.
Salmonella phage, role of magnesium ions. Tucker, 1961, **26,** 313.
Salmonella strains, non-motile, occurrence of rare motile bacteria in. Quadling & Stocker, 1957, **17,** 424.
Salmonella typhi, analysis of the Vi-phage typing scheme for. Bernstein & Wilson, 1963, **32,** 349.
Salmonella typhimurium, aetiology of fatal infections in partially resistant hosts and their application to mice challenged with, by intraperitoneal injection. Meynell & Stocker, 1957, **16,** 38.
Salmonella typhimurium, applicability of the hypothesis of independent action to fatal infections in mice given. Meynell, 1957, **16,** 396.
Salmonella typhimurium, cysteineless mutants of, arising as a result of an apparent chromosomal deletion. Clowes, 1957, **17,** i.
Salmonella typhimurium, dependency on medium and temperature of cell size and chemical composition during balanced growth. Schaechter, Maaløe & Kjeldgaard, 1958, **19,** 592.
Salmonella typhimurium, distribution of flagella in. Bisset & Pease, 1957, **16,** 382.
Salmonella typhimurium, environmentally induced transition from the flagellated to the non-flagellated state. Quadling & Stocker, 1962, **28,** 257.
Salmonella typhimurium, flagellar synthesis in. Kerridge, 1963, **33,** 63.
Salmonella typhimurium, genetic control of histidine enzymes. Ames, Garry & Herzenberg, 1960, **22,** 369.
Salmonella typhimurium, genetics of methionineless mutants. Smith, 1961, **24,** 335.
Salmonella typhimurium grown in special medium. Richmond & Maaløe, 1962, **27,** 285.
Salmonella typhimurium, growth with proline or glutamate. Maaløe & Richmond, 1962, **27,** 269.
Salmonella typhimurium, inhibitors for flagella formation. Kerridge, 1960, **23,** 519.
Salmonella typhimurium, initial events in transduction. Hubáček, 1963, **33,** 205.
Salmonella typhimurium, investigation of the genetics of cysteineless mutants by transduction. Clowes, 1958, **18,** 154.
Salmonella typhimurium, lysogenic conversion by the A phages of. Stocker, 1958, **18,** ix.
Salmonella typhimurium newly infected by the *coll.* Stocker, Smith & Ozeki, 1963, **30,** 201.
Salmonella typhimurium, nutritional studies of cysteineless mutants of. Clowes, 1958, **18,** 140.
Salmonella typhimurium phage P22, radiobiological analysis of a lysogenic system. Moseley, 1963, **33,** xi.
Salmonella typhimurium, Q1(A) strains. Boyd & Bidwell, 1959, **21,** 635.
Salmonella typhimurium, reversion of transduced antigenic characters. Spicer & Datta, 1959, **20,** 136.
Salmonella typhimurium, superinfection of lysogenic strains. Boyd & Bidwell, 1962, **29,** 659.
Salmonella typhimurium, synthesis of flagella by amino acid-requiring mutants. Kerridge, 1959, **21,** 168.
Salmonella typhimurium, transduction of streptomycin resistance. Watanabe & Watanabe, 1959, **21,** 16.

Salmonella typhimurium, transduction of streptomycin sensitivity into resistant mutants. Watanabe & Watanabe, 1959, **21,** 30.
Salmonella typhimurium, transfer to *colE1* and *colE2* with *colI*. Smith, Ozeki & Stocker, 1963, **33,** 231.
Salmonella typhimurium, transition between different physiological states during balanced growth. Kjeldgaard, Maaløe & Schaechter, 1958, **19,** 607.
Salmonella typhimurium, transmission of colicinogeny between strains. Ozeki, Stocker & Smith, 1962, **28,** 671.
Salmonella typhimurium, type A phages. Boyd & Bidwell, 1961, **26,** 443.
Salmonella typhimurium, type A phages of: identification by a standardized cross-immunity test. Boyd & Bidwell, 1957, **16,** 217.
Salmonella, unilinear transmission of motility and its material basis in. Quadling, 1958, **18,** 227.
Salt tolerance of non-halophilic bacteria. Christian & Waltho, 1961, **25,** 97.
Sarcina lutea, endogenous metabolism in. Dawes & Holmes, 1957, **17,** viii.
Satellites in tobacco necrosis virus. Kassanis, 1962, **27,** 477.
Schizopyrenus russelli, *Aerobacter* sp., *Escherichia coli* and certain amino acids in excystment. Singh, Mathew & Anand, 1958, **19,** 104.
Schizosaccharomyces pombe, methionine inhibition of revertants in. Clarke, 1963, **31,** 353.
Scrapie, a transmissible disease of obscure etiology. Gordon, 1963, **31,** xiii.
Scrapie brain material inoculated in mice. Chandler, 1963, **31,** xiv.
Scrapie in goats. Pattison, 1963, **31,** xiv.
Sea water, two yeasts from. van Uden & Castelo-Branco, 1961, **26,** 141.
Segregation of diploid strains in *Dictyostelium discoideum*. Sussman & Sussman, 1963, **30,** 349.
Selenite broth, selective action. Smith, 1959, **21,** 61.
Selenomonads, rumen, serological relationships. Hobson, Mann & Smith, 1962, **29,** 265.
Self-fertility in *Neurospora crassa*. Martin, 1959, **20,** 213.
Sensitivity, radiation, of bacteria, effect of *N*-ethylmaleimide. Bridges, 1961, **26,** 467.
Sensitization of bacterial spores to lysozyme and hydrogen peroxide. Gould & Hitchins, 1963, **33,** 413.
Sera, normal animal, neutralization of cytopathogenic bovine orphan virus by Francis type inhibitor in. Turner, Kipps, Polson & van den Ende, 1961, **26,** 415.
Serine, glycine and vitamin B_6, inter-relationships, in the growth of mutants of *Escherichia coli*. Morris & Woods, 1959, **20,** 576.
Serine, synthesis by *Leuconostoc mesenteroides* P60. Cross, 1960, **23,** 105.
Serine synthesis in Tetrahymena from non-amino acid sources and compounds derived from serine. Dewey & Kidder, 1960, **22,** 79.
Serine synthesis in Tetrahymena, influence of folic acid, threonine, and glycine. Dewey & Kidder, 1960, **22,** 72.
Serological typing, animal strains of group G streptococci. Laughton & Davies, 1957, **17,** 750.
Serology, and pathogenicity of the genus *Chromobacterium*. Sneath & Buckland, 1959, **20,** 414.
Serology, changes in serological type and antibiotic resistance of Lancefield group D streptococci in chickens receiving dietary chlortetracycline. Elliott & Barnes, 1959, **20,** 426.
Serology, classification of varieties of *Lactobacillus casei*. Glastonbury & Knox, 1963, **31,** 73.
Serology, gel diffusion studies in Paramecium. Balbinder & Preer, 1959, **21,** 156.
Serology, grouping of *Streptococcus equinus*. Fuller & Newland, 1963, **31,** 431.
Serology, identification of streptomycetes by agar gel diffusion. Cross & Spooner, 1963, **33,** 275.
Serology of a specific *Clostridium histolyticum* gelatinase. Mandl & Zaffuto, 1958, **18,** 13.
Serology of factors I and II of anthrax toxin. Stanley, Sargeant & Smith, 1960, **22,** 219.
Serology of *Haemophilus vaginalis*. Redmond & Kotcher, 1963, **33,** 77.
Serology of *Lactobacillus casei* strains. Knox, 1963, **31,** 59.
Serology of lactobacillus phages. de Klerk, Coetzee & Theron, 1963, **32,** 61.
Serology of Pediococci. Günther & White, 1961, **26,** 199.
Serology of rumen selenomonads *in vitro* and *in vivo*. Hobson, Mann & Smith, 1962, **29,** 265.
Serology of staphylococcal phages and sodium chloride tolerance. West & Kelly, 1962, **28,** 367.
Serology of *Streptococcus equinus*. Smith & Shattock, 1962, **29,** 731.
Serology of *Streptococcus pyogenes*. Gooder, 1961, **25,** 347.
Serology of tobacco necrosis virus strains. Babos & Kassanis, 1963, **32,** 135.
Serology of trypanosomal antigens by immunofluorescence. Weitz, 1963, **32,** 145.
Serology, specificity of *Pasteurella pseudotuberculosis* somatic antigens. Crumpton, Davies & Hutchison, 1958, **18,** 129.
Serotonin fixation by ganglioside. van Heyningen, 1963, **31,** 375.
Serratia and *Aeromonas*, specificities of extracellular antigens. Liu, 1961, **24,** 145.
Serratia genus compared with *Aeromonas*. Stevenson, 1959, **21,** 366.
Serratia marcescens, an outline of the pattern of generation times. Powell, 1958, **18,** 382.
Serratia marcescens, deoxyribonucleic acid of. Jones & Walker, 1963, **31,** 187.
Serratia marcescens, effects of blue-green algae extracts on pigment production by. Davidson, 1959, **20,** 605.
Serum bactericidal titre, potentiation of, by clinical dextran. Wardlaw, 1957, **17,** xii.
Serum resistance, genetic analysis of the development of, in an influenza virus strain. Edney, 1957, **17,** 25.
Sex compatibility and gene recombination in *Escherichia coli*, a new infective factor controlling. Bernstein, 1957, **16,** iii.
Sexual polarity in *Streptomyces coelicolor*. Sermonti & Casciano, 1963, **33,** 293.
Shigella boydii 14, relationship to enterobacterium A 12. Carpenter, 1961, **26,** 535.
Shigella dysenteriae, phenotypic alterations associated with bacteriophage carrier state. Li, Barksdale & Garmise, 1961, **24,** 355.

Shigella flexneri, chloramphenicol-treated, ribonucleic acid of. Yee & Gezon, 1963, **32,** 299.
Shigella flexneri, effect of chloramphenicol. Yee, Pan & Gezon, 1962, **27,** 521.
Shigella polysaccharide hydrolysates, hexose constituents of. Simmons, 1957, **17,** 650.
Shikimic acid, microbial decomposition of. Rushton, 1959, **20,** v.
Sialyl-lactose stimulation of the production of neuraminidase in *Vibrio cholerae*. French & Ada, 1959, **21,** 550.
Sideramines and sideromycins. Burnham, 1963, **32,** 117.
Silage, bacteriological changes at controlled temperatures. Gibson *et al.*, 1958, **19,** 112.
Simonsiellaceae fam.nov., characterization of. Steed, 1962, **29,** 615.
Sinking rate of diatoms, some factors affecting. Marshall & Orr, 1957, **16,** 273.
Size of *Pseudomonas aeruginosa* and *Escherichia coli*. Bernheim, 1963, **30,** 53.
Slime mould, *Dictyostelium discoideum*, cultivation in liquid medium. Sussman, 1961, **25,** 375.
Smooth-rough variation in *Lactobacillus casei*. de Klerk & Coetzee, 1962, **27,** 155.
Sodium and cell volume changes in a sodium-rich yeast. Kotyk & Kleinzeller, 1959, **20,** 197.
Sodium and potassium in non-halophilic bacteria in relation to salt tolerance. Christian & Waltho, 1961, **25,** 97.
Sodium azide resistance in *Proteus hauseri*. Coetzee, de Klerk & Maré, 1963, **33,** 313.
Sodium chloride tolerance and serological group of staphylococcal phages. West & Kelly, 1962, **28,** 367.
Sodium, required in the growth of *Rhodopseudomonas spheroides*. Sistrom, 1960, **22,** 778.
Soil fungi, metabolism of methoxylated aromatic compounds by. Henderson, 1957, **16,** 686.
Soil fungistasis. Jackson, 1958, **19,** 390.
Soil, influence of chemical structure on β-oxidation by nocardias. Webley, Duff & Farmer, 1958, **18,** 733.
Soil, isolation of anaerobic cellulose-decomposing bacteria from. Skinner, 1960, **22,** 539.
Soil, isolation of hyphomycetes from. Henderson, 1961, **26,** 149.
Soil, isolation of yeasts from. di Menna, 1957, **17,** 678.
Soil, microflora under chronic irradiation. Skou, 1962, **28,** 521.
Soil micro-organisms, the decomposition of dichloropropionate by. Macgregor, 1963, **30,** 497.
Soil, mixed antibiotics from Actinomycetes freshly isolated from. Vaněk, Doležilová & Řeháček, 1958, **18,** 649.
Soil, pectolytic, *Flavobacterium*, some properties of. Dorey, 1957, **16,** x.
Soil, physiological characters of yeasts from. di Menna, 1959, **20,** 13.
Soil, properties of a pectolytic flavobacterium from. Dorey, 1959, **20,** 91.
Soil, survey of heterotrophic micro-organisms for ability to form nitrite and nitrate. Eylar & Schmidt, 1959, **20,** 473.
Soil, the effect of spore germination and development on plate counts of fungi in. Hack, 1957, **17,** 625.
Soils, antibiotic relationship of bacteria and fungi in. Stout, 1962, **27,** 209.
Soils, mycostasis in. Dobbs, Hinson & Bywater, 1957, **17,** xi.
Soils, Nigerian, fungistasis in. Jackson, 1958, **18,** 248.
Soils, partially-sterilized, inoculation of selected micro-organisms into. Brown, 1958, **18,** 239.
Solanine, toxicity of, and related alkaloids to *Fusarium caeruleum*. McKee, 1959, **20,** 686.
Solvents, lipid, action on Murray Valley encephalitis virus. Anderson & Ada, 1961, **25,** 451.
Sorangium, electron microscopic study of nuclei. Imshenetsky & Alferov, 1962, **27,** 391.
Sorption phenomena at mammalian cell surfaces. Weiss, 1963, **32,** 11.
Soybean, bacterial component of root nodules. Bergersen & Briggs, 1958, **19,** 482.
Soybean root nodules, bacterial component, changes in respiratory activity, cell dry weight and nucleic acid content with increasing nodule age. Bergersen, 1958, **19,** 312.
Soybean root nodules, bacterial component of, cytology and organization in the host tissue. Bergersen & Briggs, 1958, **19,** 482.
Soybean root nodules, incorporation of $^{15}N_2$ into various fractions of. Bergersen, 1960, **22,** 671.
Species, new, *Desulphovibrio orientis*. Adams & Postgate, 1959, **20,** 252.
Species, new, *Nadsonia slovaca*, isolated in Slovakia. Kocková-Kratochvílová & Svobodová-Poláková, 1959, **20,** 24.
Species, new, *Torulopsis ingeniosa*. di Menna, 1958, **19,** 581.
Species, provisional, *Acetobacter acidophilum*. Wiame, Harpigny & Dothey, 1959, **20,** 165.
Species, type, of genus *Nocardia*. Gordon & Mihm, 1962, **27,** 1.
Spectrum, infrared absorption, of *Bacillus megaterium*. Norris & Greenstreet, 1958, **19,** 566.
Spectrum, infrared absorption, of lactobacilli. Goulden & Sharpe, 1958, **19,** 76.
Spectrum of forward mutants in the *pyr*-3 region of neurospora. Reissig, 1963, **30,** 327.
Spermidine in the bacterial cell. Bachrach & Cohen, 1961, **26,** 1.
Sphaleromantis tetragona, observations on. Harris, 1963, **33,** 345.
Spheroplasts, lysis, by various agents. Razin & Argaman, 1963, **30,** 155.
Spheroplasts of *Aerobacter aerogenes*, preparation and properties. Gebicki & James, 1960, **23,** 9.
Spheroplasts of *Escherichia coli*, mutation in. Ryan, Okada & Nagata, 1963, **30,** 193.
Spirillum anulus, chromatin patterns in. Williams, 1959, **21,** 109.
Spirillum in oxidation ponds. Pretorius, 1963, **32,** 403.
Spirillum spp., morphological variation and origin of Hyphomicrobia. Bisset, Pease & Hale, 1961, **24,** 427.
Spirillum spp., nuclear fusion in. Williams & Rittenberg, 1957, **17,** 274.
Spora, air, of two rural sites. Lacey, 1962, **29,** 485.
Spora of a cowshed. Baruah, 1961, **25,** 483.
Spore germination and development on plate counts of fungi in soil. Hack, 1957, **17,** 625.
Spore germination of *Blastocladiella emersonii*. Cantino, Lovett, Leak & Lythgoe, 1963, **31,** 393.

Spore surface in *Pithomyces chartarum*. Bertaud, Morice, Russell & Taylor, 1963, **32,** 385.
Spores, *Bacillus circulans* and *Bacillus cereus*, germination under alkaline conditions. Chislett & Kushner, 1961, **25,** 151.
Spores, bacterial antigens. Norris, 1962, **28,** 393.
Spores, bacterial, sensitization to lysozyme and hydrogen peroxide. Gould & Hitchins, 1963, **33,** 413.
Spores, bacterial, the swelling during germination and outgrowth. Hitchins, Gould & Hurst, 1963, **30,** 445.
Spores, bacterial total counts. Cook & Lund, 1962, **29,** 97.
Spores, composition of spore wall of *Bacillus subtilis*. Salton & Marshall, 1959, **21,** 415.
Spores, formation in Mycobacteria. Csillag, 1961, **26,** 97.
Spores, freeze-dried, viability and heat resistance of. Marshall, Murrell & Scott, 1963, **31,** 451.
Spores, fungus, dry liberation by raindrops. Hirst & Stedman, 1963, **33,** 335.
Spores in sulphate-reducing bacteria. Adams & Postgate, 1961, **24,** 291.
Spores, living bacterial, water and solid content of, and vegetative cells as indicated by refractive index measurements. Ross & Billing, 1957, **16,** 418.
Spores of *Bacillus* species, cell-wall enzyme associated with. Strange & Dark, 1957, **16,** 236.
Spores of some species of the genus *Bacillus* using carbon replicas, an electron microscope study. Bradley & Williams, 1957, **17,** 75.
Spores, swelling during germination and outgrowth. Hitchins & Gould, 1962, **28,** iii.
Sporidesmin and sporidesmolides, production by *Pithomyces chartarum*. Done, Mortimer, Taylor & Russell, 1961, **26,** 207.
Sporidesmin and sporidesmolides, production by *Pithomyces chartarum* in culture. Dingley, Done, Taylor & Russell, 1962, **29,** 127.
Sporulation and relationships of monosporous actinomycetes, observations upon the mode of. Bisset, 1957, **17,** 562.
Sporulation and spore germination in *Bacillus* species, cell-wall lytic enzymes at. Strange & Dark, 1957, **17,** 525.
Sporulation of *Bacillus cereus*, electron microscopy. Norris & Watson, 1960, **22,** 744.
Sporulation of *Penicillium* spp. Basu & Bhattacharyya, 1962, **27,** 61.
Stability of virus haemagglutinins and cell receptors. Buckland & Tyrrell, 1963, **32,** 241.
Stachybotrys, morphogenesis and nutrition. McQuade, 1963, **30,** 429.
Staining, Gram, of disintegrated micro-organisms. Chelton & Jones, 1959, **21,** 652.
Staining, negative process. Bradley, 1962, **29,** 503.
Staining of influenza virus filaments. Lindenmann, 1957, **16,** 759.
Staphylococcal typing bacteriophage 42D, a pure preparation of. Huybers & Jennings, 1957, **17,** 112.
Staphylococci, Adansonian classification. Hill, 1959, **20,** 277.
Staphylococci, changes in phage-typing pattern. Rountree & Asheshov, 1961, **26,** 111.
Staphylococci, changes in phage typing patterns following lysogenization. Rountree, 1959, **20,** 620.
Staphylococci, classification by physiological and biochemical tests. Baird-Parker, 1963, **30,** 409.
Staphylococci, coagulase-positive, effect of temperature on staphylokinase production. Bungay, 1961, **24,** 393.
Staphylococci, effect of inoculum size on inhibition zones in agar with streptomycin. Cooper, Linton & Sehgal, 1958, **18,** 670.
Staphylococci, fate after phagocytosis. Shayegani & Kapral, 1962, **29,** 625.
Staphylococci grown in penicillin, relationship with Gram-negative rods. Briggs, Crawford, Abraham & Gladstone, 1959, **21,** 205.
Staphylococci, intracellular destruction by mononuclear cells. Shayegani & Kapral, 1962, **29,** 637.
Staphylococci, lysogenicity in. Karska, Kozak, Narbutowicz & Stolarska, 1960, **23,** 577.
Staphylococci, mutant, vulnerability of nucleic acids. Gause & Kochetkova, 1962, **29,** 317.
Staphylococci, phage-infected; appearance and function of virolysin. Ralston, Baer, Lieberman & Krueger, 1961, **24,** 313.
Staphylococci, phage-type 80, changes in typing pattern. Asheshov & Rippon, 1959, **20,** 634.
Staphylococci, studies on lysogeny in. Gorrill, 1957, **17,** 254.
Staphylococci, teichoic acid distribution in. Davison & Baddiley, 1963, **32,** 271.
Staphylococci treated with penicillin, attempts to obtain Gram-negative rods from. Paine & Daniel, 1959, **21,** 203.
Stapyhlococcus afermentans, mutants with impaired respiration. Gause, 1962, **28,** iii.
Staphylococcus afermentans, mutants with impaired respiration. Gause, Kochetkova & Vladimirova, 1963, **30,** 29.
Staphylococcus aureus, autolytic release and osmotic properties of 'protoplasts' from. Mitchell & Moyle, 1957, **16,** 184.
Staphylococcus aureus, bactericidal action of streptomycin on. Hancock, 1960, **23,** 179.
Staphylococcus aureus, basic triphenylmethane dyes and the inhibition of glutamine synthesis by. Fry, 1957, **16,** 341.
Staphylococcus aureus, carbohydrate metabolism of. Strasters & Winkler, 1963, **31,** xvi.
Staphylococcus aureus, carbohydrate metabolism of. Strasters & Winkler, 1963, **33,** 213.
Staphylococcus aureus, development of Gram-negative rods in penicillin-treated cultures. Hilson & Elek, 1959, **21,** 208.
Staphylococcus aureus, effect of growth on enzymes. Collins & Lascelles, 1962, **29,** 531.
Staphylococcus aureus, effect of streptogramin on. Vazquez, 1963, **31,** xvi.
Staphylococcus aureus, effect of streptogramin on. Vazquez, 1963, **33,** ix.
Staphylococcus aureus, formation of dissimilatory nitrate reductase. Chang & Lascelles, 1963, **31,** xv.
Staphylococcus aureus, Gram-negative bacilli obtained from a strain of, in the presence of benzylpenicillin. Briggs *et al.*, 1957, **16,** 614.
Staphylococcus aureus, inhibition of *Corynebacterium diphtheriae* and other Gram-positive organisms. Parker & Simmons, 1959, **21,** 457.

Staphylococcus aureus, L forms of. Williams, 1963, **33,** 325.
Staphylococcus aureus, microbial antagonism by. Barrow, 1963, **31,** 471.
Staphylococcus aureus, mutations affecting penicillinase formation. Novick, 1963, **33,** 121.
Staphylococcus aureus, permeability of envelopes to some salts, amino acids and non-electrolytes. Mitchell & Moyle, 1959, **20,** 434.
Staphylococcus aureus, preferential suppression of hyaluronidase formation in cultures of. Rogers, 1957, **16,** 22.
Staphylococcus aureus, release and analysis of the intracellular amino acids of. Hancock, 1958, **18,** v.
Staphylococcus aureus, requirements for acetate of a streptomycin-resistant strain. Gardner & Lascelles, 1962, **29,** 157.
Staphylococcus aureus, synergistic action of cephalosporin C and benzylpenicillin against a penicillinase-producing strain of. Crawford & Abraham, 1957, **16,** 604.
Staphylococcus aureus, synthesis of cell-wall mucopeptide and of other polymers. Park & Hancock, 1960, **22,** 249.
Staphylococcus aureus type 71, inhibition by. Barrow, 1963, **32,** 255.
Staphylococcus, effect of heat on ability to support growth of phage. Asheshov & Jevons, 1963, **31,** 97.
Staphylococcus flavocyaneus, yellow-pigmented mutants of. Rosypal, Kocur & Hodák, 1963, **32,** 189.
Staphylococcus, isolation and composition of α-toxin. Bernheimer & Schwartz, 1963, **30,** 455.
Staphylococcus, studies on penicillin production. Swallow & Sneath, 1962, **28,** 461.
Staphylokinase, effect of temperature on production. Bungay, 1961, **24,** 393.
Statistics of the cell division process. Koch & Schaechter, 1962, **29,** 435.
Stearic acid, essential growth factor for *Trypanosoma cruzi*. Boné & Parent, 1963, **31,** 261.
Marjory Stephenson Memorial Lecture: third. The concept of virus. Lwoff, 1957, **17,** 329.
Marjory Stephenson Memorial Lecture: fourth. Faults and fallacies in microbiology. Wilson, 1959, **21,** 1.
Marjory Stephenson Memorial Lecture: fifth. The growth of microbiology. Knight, 1962, **27,** 357.
Marjory Stephenson Memorial Lecture: sixth. Some aspects of the protozoa and their way of life. Robertson, 1963, **33,** 177.
Steroid growth requirements and inhibitors of mycoplasma. Butler & Knight, 1960, **22,** 483.
Steroids, effect on growth of *Trichophyton rubrum*. Chattaway, Townsley & Barlow, 1962, **28,** 437.
Steroids, growth requirement of *Mycoplasma mycoides*. Rodwell, 1963, **32,** 91.
Steroids, inhibition of growth of *Tetrahymena piriformis* by. Connor, 1959, **21,** 180.
Sterols, in *Aspergillus niger*, effect of quaternary ammonium compounds on synthesis. Raman & Shanmugasundaram, 1963, **31,** 23.
Sterols, influence on phosphates in *Tetrahymena pyriformis*. Conner, Kornacker & Goldberg, 1961, **26,** 437.
Storage, of dried bacteria, effect of residual water. Scott, 1958, **19,** 624.
Storage over a ten-year period, damage and survival of bacteria. Harrison & Pelczar, 1963, **30,** 395.
Streptobacillus moniliformis, in intermediate stage between Corynbacterium and its L-form. Pease, 1962, **29,** 91.
Streptococcal, group N, phage lysin. Reiter & Oram, 1963, **32,** 29.
Streptococci, active agent in nascent phage lysis of. Maxted, 1957, **16,** 585.
Streptococci, animal strains of group G, and their serological typing. Laughton & Davies, 1957, **17,** 750.
Streptococci, competence of transformable. Pakula & Walczak, 1963, **31,** 125.
Streptococci, faecal, influence of the growth medium on group D antigen. Medrek & Barnes, 1962, **28,** 701.
Streptococci, group A, enzymic lysis of. Maxted & Gooder, 1958, **18,** xiii.
Streptococci, group A, surfaces of matt and glossy variants of. Hill & James, 1963, **31,** ii.
Streptococci, group D, antigens in L-phase variant. Hijmans, 1962, **28,** 177.
*Streptococci, group D, coagulase activity. Wood, 1959, **20,** iv.
Streptococci, group D, the clotting of rabbit plasma by. Wood, 1959, **21,** 385.
Streptococci, Lancefield group D, in chickens receiving chlortetracycline, changes in. Elliott & Barnes, 1959, **20,** 426.
Streptococci, peroxidase-thiocyanate inhibition of, in raw milk. Reiter, Pickering, Oram & Pope, 1963, **33,** xii.
Streptococci, possessing group F antigen. Ottens & Winkler, 1962, **28,** 181.
Streptococci, unclassified group D, serological typing. Sharpe & Fewins, 1960, **23,** 621.
'*Streptococcus bombycis*', its taxonomy and pathogenicity for silkworm caterpillars. Lysenko, 1958, **18,** 774.
Streptococcus bovis, dextran-producing organism, the nature of the capsular polysaccharides of. Bailey & Oxford, 1959, **20,** 258.
Streptococcus bovis, metabolism of carbon dioxide. Wright, 1960, **22,** 713.
Streptococcus bovis, nutritional requirements in relation to dextran synthesis. Oxford, 1958, **19,** 617.
Streptococcus bovis, production of dextran from sucrose by rumen strains. Bailey & Oxford, 1958, **19,** 130.
Streptococcus equinus, serological grouping. Fuller & Newland, 1963, **31,** 431.
Streptococcus equinus, serology of. Smith & Shattock, 1962, **29,** 731.
Streptococcus faecalis, an outline of the pattern of generation times. Powell, 1958, **18,** 382.
Streptococcus faecalis, location of group D antigen in. Shattock & Smith, 1963, **31,** iv.
Streptococcus faecalis, molar growth yields of. Bauchop, 1958, **18,** vii.
Streptococcus faecalis, syntrophic growth. Krieg & Pelczar, 1961, **25,** 77.
Streptococcus faecalis, yields when grown in continuous culture. Rosenberger & Elsden, 1960, **22,** 726.
Streptococcus faecium, serological typing. Sharpe & Fewins, 1960, **23,** 621.
Streptococcus, group D, antigen and teichoic acid. Wicken, Elliott & Baddiley, 1963, **31,** 231.
Streptococcus, group D, location of group antigen. Jones & Shattock, 1960, **23,** 335.

Streptococcus β-haemolytic, induction of L-phase by amino acids and penicillin. Michel & Hijmans, 1960, **23,** 35.

Streptococcus pluton, classification of and its differentiation from associated enterococci. Bailey & Gibbs, 1962, **28,** 385.

Streptococcus pluton, isolation and cultural characteristics of. Bailey, 1957, **17,** 39.

Streptococcus pneumoniae, comparison of the uridine pyrophosphoglycosyl metabolism of capsulated and non-capsulated strains of. Smith, Mills & Harper, 1957, **16,** 426.

Streptococcus pneumoniae, cultivation of. Holt, 1962, **27,** 327.

Streptococcus pyogenes, a serum opacity reaction in. Gooder, 1961, **25,** 347.

Streptococcus pyogenes, the presence of amino acids, amino sugars and sugars in cell wall. Michel & Gooder, 1962, **29,** 199.

Streptococcus pyogenes type 4, precipitating antigen of. Hambly, 1958, **18,** 285.

Streptogramin, effect on *Staphylococcus aureus*. Vazquez, 1963, **33,** ix.

Streptomyces aureofaciens, influence of phosphorus on development and on its ability to produce chlortetracycline. Prokofieva-Belgovskaya & Popova, 1959, **20,** 462.

Streptomyces coelicolor, electron microscopy of. Hopwood & Glauert, 1958, **18,** vi.

Streptomyces coelicolor, genetic recombination in. Hopwood, 1957, **16,** ii.

Streptomyces coelicolor, heterozygous clones in. Sermonti & Spada-Sermonti, 1963, **30,** 249.

Streptomyces coelicolor, phase contrast observations. Hopwood, 1960, **22,** 295.

Streptomyces coelicolor, sexual polarity in. Sermonti & Casciano, 1963, **33,** 293.

Streptomyces, cytochemistry of. Giolitti, 1960, **23,** 83.

Streptomyces, heterokaryotic compatibility in. Braendle, Gardiner & Szybalski, 1959, **20,** 442.

Streptomyces, interpretation of morphological appearances. Davis, 1960, **22,** 740.

Streptomyces lavendulae, melanin biosynthesis. Mencher & Heim, 1962, **28,** 665.

Streptomyces, mechanism of 'vegetative hybridization' in. Bradley, 1958, **18,** 591.

Streptomyces, method for isolating. Giolitti & Craveri, 1957, **17,** 649.

Streptomyces rimosus in submerged fermentation, development of the culture of. Doskočil *et al.*, 1958, **18,** 302.

Streptomyces, the 'bulging factor', a fungistatic antibiotic produced by a strain of, with evidence of an active water-excreting mechanism in fungi. Links, Rombouts & Keulen, 1957, **17,** 596.

Streptomyces violaceoruber, preferential compatibility. Bradley & Anderson, 1960, **23,** 231.

Streptomyces violaceoruber, surface structures of. Hopwood & Glauert, 1961, **26,** 325.

Streptomycetes, identification by agar gel diffusion. Cross & Spooner, 1963, **33,** 275.

Streptomycetes, soil, production of polyenic antibiotics by. Ball, Bessell & Mortimer, 1957, **17,** 96.

Streptomycin, aberrant forms of *Mycobacterium phlei* produced by, and their multiplication on streptomycin-free media. Juhasz, 1962, **28,** 9.

Streptomycin, bactericidal action on *Staphylococcus aureus*. Hancock, 1960, **23,** 179.

Streptomycin, dependence of *Escherichia coli*. Spotts, 1962, **28,** 347.

Streptomycin, effect of inoculum size on inhibition zones in agar with staphylococci. Cooper, Linton & Sehgal, 1958, **18,** 670.

Streptomycin, inhibition of phage by. Brock, Mosser & Peacher, 1963, **33,** 9.

Streptomycin, inhibitors, investigation with aid of streptomycin-dependent *Vibrio comma*. Olitzki & Godinger, 1959, **20,** 54.

Streptomycin, reduction in oxidative activities in *Escherichia coli* and *Bacillus megaterium*. Hancock, 1961, **25,** 421.

Streptomycin resistance in *Salmonella typhimurium*, transduction of. Watanabe & Watanabe, 1959, **21,** 16.

Streptomycin-resistant bacteria in rhizosphere. Brown, 1961, **24,** 369.

Streptomycin-resistant mutants of *Salmonella typhimurium*, transduction studies. Watanabe, 1960, **22,** 102.

Streptomycin-resistant Staphylococci, requirement for acetate. Gardner & Lascelles, 1962, **29,** 157.

Streptomycin, sensitivity of *Vibrio fetus* to, and the emergence of resistant mutants. Morgan, 1958, **19,** 517.

Streptomycin sensitivity, transduced into resistant mutants of *Salmonella typhimurium*. Watanabe & Watanabe, 1959, **21,** 30.

Streptomycin, transduction of resistance in *Proteus mirabilis*. Coetzee & Sacks, 1960, **23,** 445.

^{14}C-Streptomycin uptake by *Bacillus megaterium*. Hancock, 1962, **28,** 503.

^{14}C-Streptomycin uptake by micro-organisms. Hancock, 1962, **28,** 493.

^{14}C-Streptomycin, uptake and its relation to sensitivity. Hancock, 1962, **28,** 493.

Strigomonas (*Herpetomonas*) *oncopelti*, nutritional requirements and biosynthetic capabilities of the parasitic flagellate. Newton, 1957, **17,** 708.

Structural changes in Rhizopus spores. Hawker & Abbott, 1963, **32,** 295.

Structure, and antifungal effects of griseofulvin and its analogues. Rhodes, 1963, **33,** vi.

Structure and replication of the trachoma agent in cell cultures. Armstrong, Valentine & Fildes, 1963, **30,** 59.

Structure in the actinomycins. Gale, 1963, **33,** i.

Structure of influenza virus filaments and spheres. Valentine & Isaacs, 1957, **16,** 195.

Structure of *Microellobosporia flavea*, microscopic observation. Rancourt & Lechevalier, 1963, **31,** 495.

*Structure of the Rous virus, observations on. Epstein, 1958, **18,** vii.

Structure of the 'sulphur granules' of *Actinomyces bovis*. Pine & Overman, 1963, **32,** 209.

Structure of vegetative hyphae of Rhizopus. Hawker & Abbott, 1963, **30,** 401.

Structure of viruses of the Newcastle disease–mumps–influenza (Myxovirus) group. Valentine & Isaacs, 1957, **16,** 680.

Struvite in microbial cultures. Beavon & Heatley, 1963, **31,** 167.
Strychnine, fixation by ganglioside. van Heyningen, 1963, **31,** 375.
Submerged culture, keto-acid metabolism of *Corynebacterium diphtheriae*. Edwards, 1960, **23,** 201.
Substrates, fermentable, conditions affecting utilization by lactic acid bacteria. Whittenbury, 1963, **32,** 375.
Subtilin A, influence of pH on the antibacterial action of. Sacks & Pence, 1958, **19,** 542.
Sucrose fermentation by *Proteus hauseri*. Coetzee, 1962, **29,** 455.
Sucrose, production of dextran from, by rumen strains of *Streptococcus bovis*. Bailey & Oxford, 1958, **19,** 130.
Sugar composition of cell wall. Roberts & Stewart, 1961, **24,** 253.
Sugars, in cell walls of *Streptococcus pyogenes*. Michel & Gooder, 1962, **29,** 199.
Sulphate, assimilation in *Aspergillus nidulans*. Nakamura, 1962, **27,** 221.
Sulphate, bacterium for sheep rumen reducing. Coleman, 1960, **22,** 423.
Sulphate-reducing bacteria, sporulation. Adams & Postgate, 1961, **24,** 291.
Sulphate-reducing vibrio, new. Adams & Postgate, 1959, **20,** 252.
Sulphonamide, biochemical mode of action. Woods, 1962, **29,** 687.
Sulphur amino acid uptake by yeast. Maw, 1963, **31,** 247.
'Sulphur granules' of *Actinomyces bovis*, structure and composition of. Pine & Overman, 1963, **32,** 209.
Sulphur, the availability of, for *Clostridium perfringens* and an examination of hydrogen sulphide production. Fuchs & Bonde, 1957, **16,** 330.
Sulphur, the examination of auxotrophs. Postgate, 1963, **30,** 481.
Sulphydryl metabolism of fungi grown in submerged culture. Robson & Stockley, 1962, **28,** 57.
Surface-active agents, non-ionic, production of virulence in an avirulent strain of *Mycobacterium tuberculosis* by. Hart & Rees, 1957, **16,** vii.
Surface, matt and glossy variants of group A streptococci. Hill & James, 1963, **31,** ii.
Surface pH of *Bacillus subtilis*. Weiss, 1963, **32,** 331.
Surface structure and serological typing of *Bacillus megaterium*. Baumann-Grace & Tomcsik, 1957, **17,** 227.
Survey, electro-taxonomic, of bacteria. Sneath & Cowan, 1958, **19,** 551.
Survival of starved bacteria. Postgate & Hunter, 1962, **29,** 233.
Survival of stored *Aerobacter aerogenes*. Strange, Dark & Ness, 1961, **25,** 61.
Survival of washed suspension of mycoplasma. Butler & Knight, 1960, **22,** 470.
Swarmers of *Bacillus cereus*. Bisset & Hale, 1963, **31,** 281.
Swarming in *Proteus mirabilis*. Coetzee, 1963, **33,** 1.
Swarming of *Proteus vulgaris*. Hughes, 1957, **17,** 49.
Swine, intestinal yeast flora of. van Uden & Carmo Sousa, 1962, **27,** 35.
Symbiosis, *see also* Symposium **13.**
Symbiosis, leaf-nodule, of *Psychotria*. Centifanto & Silver, 1963, **32,** v.
Symbiosis of hydra with algae. Muscatine & Lenhoff, 1963, **32,** vi.
Symposium on Aspects of Cell-surface Adsorption Phenomena, 1963, **32,** 11.
Some sorption phenomena at mammalian cell surfaces. Weiss.
The mechanism of influenza virus haemagglutination as a model of specific receptor adsorption. Belyavin.
The bacterial cell wall. The result of adsorption, structure or selective permeability? Rogers.
Some biologically important aspects of adsorption of antibody on to tissue cells. Humphrey.
Group N streptococcus phage lysin. Reiter & Oram.
Symposium on Bacterial Lysis, 1958, **18,** 473.
Lysis by physical and chemical methods. Pethica.
The lysis of micro-organisms by lysozyme and related enzymes. Salton.
Lysis by agents of microbial origin. Welsch.
Lysis resulting from metabolic disturbance. McQuillen.
Biochemical parallels between lysis by virulent phage and lysis by penicillin. Weidel & Primosigh.
The mechanism of lysis by phage studied with defective lysogenic bacteria. Jacob & Fuerst.
Colicins, colicinogenic factors and their relations to bacteriophages. Fredericq.
Lysis of Gram-negative bacteria by serum. Rowley & Wardlaw.
Symposium on Some Comparative Aspects of Intermediary Metabolism in Micro-organisms, 1963, **32,** 151.
Comparative aspects of alcohol formation. Dawes.
The breakdown and biosynthesis of glutamic acid. Hoare.
The assimilation of 1-C compounds. Quayle.
The assimilation of 2-C compounds other than acetate. Morris.
Carbon and energy storage in bacteria. Wilkinson.
The microbiological degradation of aromatic compounds. Evans.
Symposium on Metabolic Activity and Bacterial Structure, 1962, **29,** 15.
Cell-wall structure and biosynthesis. Salton.
Metabolism, transport, and morphogenesis: which drives which? Mitchell.
The bacterial cytoplasmic membrane. Hughes.
The chromatophores of photosynthetic bacteria. Lascelles.
Bacterial ribosomes and protein synthesis. McQuillen.
The effect of various drugs and inorganic ions on bacterial ribonucleoprotein. Dagley, White, Wild & Sykes.
The final stages of protein synthesis and the role of lipids in the process. Hunter & Godson.
Symposium on Plankton, 1957, **16,** 265.
The plankton around the British Isles. Rae.
Planktonic bacteria. Collins.
Some factors affecting the sinking rate of diatoms. Marshall & Orr.
Toxic marine flagellates; their occurrence and physiological effects on animals. Ballantine & Abbott.
Utilization of trace elements by marine unicellular algae. Spencer.
Auxotrophy and organic compounds in the nutrition of marine phytoplankton. Droop.
Relationships between metabolism and growth in plankton algae. Fogg.

SYMPOSIUM 7: Microbial Ecology, 1957, *Symp.* **7.**
The genome as a component of the ecosystem. Shepherd, 1.
Nutritional aspects of microbial ecology. Gibson, 22.
Influence of hydrogen-ion concentration and oxidation-reduction conditions on bacterial behaviour. Hewitt, 42.
The role of light in the microbial world: some facts and speculations. Stanier & Cohen-Bazire, 56.
Micro-organisms resisting high concentrations of sugars or salts. Ingram, 90.
The ecological significance of antibiotic production. Brian, 168.
The action of pressure and temperature. Johnson, 134.
The relations of bacteriophages to bacterial ecology. Anderson, 189.
The predacious fungi and their place in microbial ecology. Duddington, 218.
Ecological factors and the survival of fungi. Hawker, 238.
Some factors in the life of free-living protozoa. Kitching, 259.
Ecology of micro-organisms in soils as observed during their development upon buried cellulose film. Tribe, 287.
The role of plant hosts in microbial ecology. Bawden, 299.
The biological influences of man and animals on microbial ecology. Lovell, 315.
Ecology of viruses. Andrewes, 328.
The selective action on bacteria of various factors inside and outside the animal body, with particular reference to their effect on virulence. Wilson, 338.
Some factors influencing the spread of plant viruses by arthropod vectors. Smith, 364.
SYMPOSIUM 8: The Strategy of Chemotherapy, 1958, *Symp.* **8.**
The relation of strategy to tactics: some general biochemical principles. Woods & Tucker, 1.
The antibiotic approach. Woodruff & McDaniel, 29.
Selective inhibition of bacterial cell-wall synthesis: its possible applications in chemotherapy. Park, 49.
Surface-active bactericides. Newton, 62.
Membrane penetration and the therapeutic value of chemicals. Mitchell, 94.
Inhibitors of energy-supplying reactions. Krebs, 104.
Metal-binding agents in chemotherapy: the activation of metals by chelation. Albert, 112.
The designing of antimetabolites. Woolley, 139.
Lethal synthesis. Markham, 163.
Selective inhibition of virus multiplication. Tamm, 178.
Specific inhibitors of protein synthesis. Gale, 212.
Mechanisms of chemotherapeutic synergy. Lacey, 247.
The chemotherapy of bacterial infections. Knox, 288.
The chemotherapy of fungal diseases. Byrde & Ainsworth, 309.
The chemotherapy of some protozoal infections. Goodwin, 336.
Factors affecting the chemotherapy of amoebiasis. Neal, 350.
SYMPOSIUM 9: Virus Growth and Variation, 1959, *Symp.* **9.**
Viruses: a survey of some current problems. Luria, 1.
Growth of bacteriophage. Kellenberger, 11.
The multiplication of viruses in plants. Harrison, 34.
Some observations concerning the reproduction of RNA-containing animal viruses. Schäfer, 61.
Studies of mixed infections with NDV, poliovirus and influenza. Hirst, 82.
Viral interference. Isaacs, 102.
Host-controlled variation in animal viruses. Hoskins, 122.
Growth studies with herpes virus. Stoker, 142.
Special interactions between virus and cell in the Rous sarcoma. Rubin, 171.
Studies on vaccinia virus in HeLa cells. Maitland & Postlethwaite, 185.
The chemical approach to the study of animal virus growth. Cooper, 200.
Fluorescence microscopy: observation of virus growth with aminoacridines. Anderson, Armstrong & Niven, 224.
Electron-microscopic observations on adenoviruses and viruses of the influenza group. Morgan & Rose, 256.
SYMPOSIUM 10: Microbial Genetics, 1960, *Symp.* **10.**
Introduction: micro-organisms in genetics. Stocker, 1.
The bacterial chromosome. Hayes, 12.
The physical state of the bacterial nucleus. Kellenberger, 39.
Episomic elements in bacteria. Jacob, Schaeffer & Wollman, 67.
Fine genetic structure as revealed by transduction. Clowes, 92.
Genetic and functional aspects of galactose metabolism in *Escherichia coli* K-12. Lederberg, 115.
On the biological functions of deoxyribonucleic acid. Ephrussi-Taylor, 132.
The bearing of recombination analysis at high resolution on genetic fine structure in *Aspergillus nidulans* and the mechanism of recombination in higher organisms. Pritchard, 155.
Relation of genotype to enzyme content. Catcheside, 181.
DNA and specific protein synthesis. Brown, 208.
Genetic control of the specificity of the bacterial enzyme, alkaline phosphatase. Garen, 239.
Ribonucleic acid as genetic material of viruses. Gierer, 248.
The nucleic acids and the control of bacterial growth. Maaløe, 272.
Inheritance in amoeba, studies by nuclear transfer. Danielli, 294.
SYMPOSIUM 11: Microbial Reaction to Environment, 1961, *Symp.* **11.**
The environment and growth: protozoan origins of metazoan responsitivities. Hutner, 1.
Response of enzyme synthesis and activity to environment. Pardee, 19.
The effect of environment on the formation of bacterial flagella. Kerridge, 41.
Environmentally induced changes in bacterial morphology. Duguid & Wilkinson, 69.
Spore formation and germination as a microbial reaction to the environment. Murrell, 100.
External factors influencing structure and activities of *Streptococcus pyogenes*. Gooder & Maxted, 151.

Symposium 11 (*cont.*)
Phenotypic variation and bacterial infection. Meynell, 174.
Some aspects of the influence of environment on the radiosensitivity of micro-organisms. de Serres, 196.
Synchronization of division in cultures of *Saccharomyces cerevisiae* by control of the environment. Williamson & Scopes, 217.
The relationship between biochemical and morphological differentiation in non-filamentous aquatic fungi. Cantino, 243.
Environmental influence on genetic recombination in bacteria and their viruses. Fisher, 272.
Some effects of changing environment on the behaviour of plant viruses. Bawden, 296.
Antibiotic production as an expression of environment. Woodruff, 317.
Non-genetic variation of surface antigens in *Bordetella* and other micro-organisms. Lacey, 343.
The chemical composition of micro-organisms as a function of their environment. Herbert, 391.
Symposium 12: Microbial Classification, 1962, *Symp.* **12.**
The evolution of taxonomic principles. Cain, 1.
Purposes and procedures in the taxonomic treatment of higher organisms. Heslop-Harrison, 14.
Taxonomic procedures in classification of protozoa. Corliss, 37.
Classical and modern criteria used in algal taxonomy with special reference to genera of microbial size. Lund, 68.
The morphological approach to the taxonomy of microfungi. Smith, 111.
Fine structure and taxonomy of bacteria. Murray, 119.
Classifying viruses at higher speeds: symmetry and structure of virus particles as criteria. Wildy, 145.
Comparative biochemistry and enzymology in bacterial classification. De Ley, 164.
The use of biochemical criteria in the taxonomy of yeasts. Kreger-van Rij, 196.
Immunochemical specificity and the location of antigens in the bacterial cell. Cummins, 212.
Soluble bacterial antigens as discriminants in classification. Oakley, 242.
Pathogenicity and the taxonomy of fungi. Ainsworth, 249.
Genetics and microbial classification. Roper, 270.
The construction of taxonomic groups. Sneath, 289.
A quantitative approach to the systematics of actinomycetes based on overall similarity. Silvestri, Turri, Hill & Gilardi, 333.
The phylogenetic concept in bacterial taxonomy. Bisset, 361.
Prerequisites for virus classification. Pirie, 374.
Nomenclature and taxonomy. Ross, 394.
The practice of bacterial identification. Steel, 405.
The microbial species—a macromyth? Cowan, 433.
Appendix I: The proposal and selection of scientific names for micro-organisms. 456.
Appendix II: Culture collections. 464.
Appendix III: Some key works on the taxonomy of micro-organisms. 467.
Symposium 13: Symbiotic Associations, 1963, *Symp.* **13.**
Integrative and disintegrative factors in symbiotic associations. Dubos & Kessler, 1.
Bacteriophage lysogeny. Arber, 12.
Experimental studies of lichen physiology. Smith, 31.
Factors influencing the balance of mutual advantage in legume symbiosis. Nutman, 51.
The root nodules of non-leguminous angiosperms. Bond, 72.
The biochemistry of nitrogen fixation. Nicholas, 92.
Some effects of forest tree roots on mycorrhizal basidiomycetes. Melin, 125.
Vesicular-arbuscular mycorrhiza: an extreme form of fungal adaptation. Mosse, 146.
Algae and invertebrates in symbiosis. Droop, 171.
Symbiosis and aposymbiosis in arthropods. Brooks, 200.
Ambrosia beetles and their fungi, with particular reference to *Platypus cylindrus* Fab. Baker, 232.
Symbiotic associations: the rumen bacteria. Hungate, 266.
The growth and metabolism of rumen ciliate protozoa. Coleman, 298.
Studies of bacterial associations in germ-free animals and animals with defined floras. Lev, 325.
Defence reactions in orchid bulbs. Nüesch, 335.
Synergistic action of cephalosporin C and benzylpenicillin against a penicillinase-producing strain of *Staphylococcus aureus*. Crawford & Abraham, 1957, **16,** 604.
Synthesis, and breakdown of poly-β-hydroxybutyric acid by bacteria. Hayward, Forsyth & Roberts, 1959, **20,** 510.
Synthesis, induced, of hydrogenase by *Hydrogenomonas facilis*. Linday & Syrett, 1958, **19,** 223.
Synthesis, methionine, repression in *Escherichia coli*. Rowbury & Woods, 1961, **24,** 129.
Synthesis of encephalomyocarditis in Krebs-2 ascites tumour cells. Bellett & Burness, 1963, **30,** 131.
Synthesis of vitamin B_6 by some mutant strains of *Escherichia coli*. Morris, 1959, **20,** 597.
Synthesis, protein, in *Saccharomyces carlsbergensis*, effect of actidione and other antifungal agents. Kerridge, 1958, **19,** 497.
Synthesis, protein, role of lipids in. Hunter & Godson, 1962, **29,** 65.

Tartaric acids, enzymic conversion of, to oxaloacetic acid. Shilo, 1957, **16,** 472.
Tartaric acids, utilization of, by pseudomonads. Shilo & Stanier, 1957, **16,** 482.
Tartrate dehydratases, repression in Pseudomonas. Rosenberger & Shilo, 1963, **31,** 413.
Taxonomy, Adansonian, of yellow pigmented marine bacteria. Floodgate & Hayes, 1963, **30,** 237.
Taxonomy and cell-wall composition of Actinomycetales and related groups. Cummins & Harris, 1958, **18,** 173.
Taxonomy and pathogenicity of '*Streptococcus bombycis*' for silkworm caterpillars. Lysenko, 1958, **18,** 774.
Taxonomy, application of computers to. Sneath, 1957, **17,** 201.
Taxonomy, comparison of methods for computer. Beers, Fisher, Megraw & Lockhart, 1962, **28,** 641.
Taxonomy, electro-taxonomic survey of bacteria. Sneath & Cowan, 1958, **19,** 551.
Taxonomy, experimental methods in computer. Beers & Lockhart, 1962, **28,** 633.
Taxonomy of *Aeromonas*, *Pseudomonas* and *Comamonas*. Park, 1962, **27,** 121.

Taxonomy of bacillus by esterase systems. Norris, 1962, **28,** vii.
Taxonomy of genus *Micrococcus*. Kocur & Martinec, 1962, **28,** vi.
Taxonomy of *Mallomonas*. Harris & Bradley, 1960, **22,** 750.
Taxonomy of *Pasteurella septica*. Talbot & Sneath, 1960, **22,** 303.
Taxonomy of the species *Pseudomonas odorans*. Málek, Radochová & Lysenko, 1963, **33,** 349.
Taxonomy of *Vibrio*. Davis & Park, 1962, **27,** 101.
Taxonomy of *Xanthomonas uredovorus*. Hayward & Hodgkiss, 1961, **26,** 133.
Taxonomy, position of *Phaeodactylum tricornutum*. Lewin, 1958, **18,** 427.
Taxonomy, use of oxidase reaction. Steel, 1961, **25,** 297.
Technique, glass slide, infection of clover root hairs by nodule bacteria studied by means of. Fåhraeus, 1957, **16,** 374.
Technique, replica plating, for isolation of Lac$^+$ mutants from a Lac$^-$ strain of *Escherichia coli*. Banič, 1958, **18,** 586.
Techniques, replica plating, for the isolation of nutritionally exacting mutants of a filamentous fungus *Aspergillus nidulans*. Roberts, 1959, **20,** 540.
Teepol in substitution for bile salts. Jameson & Emberley, 1958, **18,** 238.
Teichoic acid distribution in staphylococci. Davison & Baddiley, 1963, **32,** 271.
Teichoic acid, identity with streptococcal group D antigen. Wicken, Elliott & Baddiley, 1963, **31,** 231.
Teichoic acids, in lactobacilli. Baddiley & Davison, 1961, **24,** 295.
Temperature and medium controlling cell size and composition in *Salmonella typhimurium*. Schaechter, Maaløe & Kjeldgaard, 1958, **19,** 592.
Temperature, basis of low, in Cryptococcus. Hagen & Rose, 1962, **27,** 89.
Temperature, effect on natural mutation in *Escherichia coli*. Ryan & Kiritani, 1959, **20,** 644.
Temperature, effect on staphylokinase production. Bungay, 1961, **24,** 393.
Temperature, effect on viability and heat resistance of bacterial spores. Marshall, Murrell & Scott, 1963, **31,** 451.
Temperatures, controlled, and bacteriological changes in silage. Gibson *et al.*, 1958, **19,** 112.
Temperatures, differential effect on gas production by coliform organism. Hopton, 1958, **19,** 507.
Temperatures during drying, relation to the death of micro-organisms. Leach, Ohye & Scott, 1959, **21,** 658.
Test for rapid breakdown of arginine by bacteria. Sherris, Shoesmith, Parker & Breckon, 1959, **21,** 389.
Tetanus, fixation of toxin by ganglioside. van Heyningen & Miller, 1961, **24,** 107.
Tetanus toxin, chemical assay of receptor in nervous tissue. van Heyningen, 1959, **20,** 301.
Tetanus toxin, effect on frequency of miniature end-plate potentials. Feigen, Peterson, Hofmann, Genther & van Heyningen, 1963, **33,** 489.
Tetanus toxin, fixation and influenza virus inhibition by ganglioside. Bernheimer & van Heyningen, 1961, **24,** 121.
Tetanus toxin, fixation by frog brain. van Heyningen & Woodman, 1963, **31,** 389.
Tetanus toxin, fixation by ganglioside. van Heyningen, 1963, **31,** 375.
Tetanus toxin, fixation by nervous tissue. van Heyningen, 1959, **20,** 291.
Tetanus toxin, tentative identification of receptor in nervous tissue. van Heyningen, 1959, **20,** 310.
Tetrahymena, influence of folic acid, threonine, and glycine on serine synthesis. Dewey & Kidder, 1960, **22,** 72.
Tetrahymena pyriformis, growth of mixed populations of *Chilomonas paramecium* and. Mučibabić, 1957, **16,** 561.
Tetrahymena pyriformis, influence of sterols on phosphates. Conner, Kornacker & Goldberg, 1961, **26,** 437.
Tetrahymena piriformis, inhibition of growth by certain steroids. Connor, 1959, **21,** 180.
Tetrahymena pyriformis, orthophosphate accumulation in. Connor, Goldberg & Kornacker, 1961, **24,** 239.
Tetrahymena, serine synthesis from non-amino acid sources and compounds derived from serine. Dewey & Kidder, 1960, **22,** 79.
Thermal inactivation of a 'marine' bacteriophage. Spencer, 1957, **16,** vi.
Thermophilic bacillus, protein synthesis in. Hancock, 1957, **16,** v.
Thermophilic bacillus, protein synthesis in a species of. Hancock, 1957, **17,** 480.
Thermostability and activation of *Neurospora crassa* tyrosinase. Gest & Horowitz, 1958, **18,** 64.
Thiamine, assay by *Flavobacterium aquatile*. Weeks & Beck, 1960, **23,** 217.
Thiamine deficiency in cultures of *Proteus vulgaris*, pyruvate accumulation and development of. Jackson, 1957, **16,** 711.
Thiamine, gene modifying strains of *Neurospora crassa*. Eberhart & Tatum, 1959, **20,** 43.
Thiamine-requiring mutants of *Salmonella typhimurium*, transduction studies. Watanabe, 1960, **22,** 102.
Thiobacilli, inter-species change. Johnston, Townshend & White, 1961, **24,** 201.
Thiobacilli, metabolism of thiosulphate by. Jones & Happold, 1961, **26,** 361.
Thiobacillus denitrificans, *T. thioparus* and *T. thiocyanoxidans*, metabolic differences between. Woolley, Jones & Happold, 1962, **29,** 311.
Thiodendron mucosum, a new species and genus of colourless sulphur bacteria. Lackey & Lackey, 1961, **26,** 29.
Thionin blue sensitivity test in examination of Brucella. Morgan, 1961, **25,** 135.
Thiorhodaceae, carboxydismutase formation in. Hurlbert, 1963, **31,** xvii.
Thiorhodaceae, ribulose diphosphate carboxylase in. Hurlbert & Lascelles, 1963, **33,** 445.
Thiosulphate, polythionate as intermediate in metabolism by thiobacilli. Jones & Happold, 1961, **26,** 361.
Threonine, influence on serine synthesis in Tetrahymena. Dewey & Kidder, 1960, **22,** 72.
Thymectomy, viral infections in animals after. Denys, Leyten, Vandeputte & De Somer, 1963, **32,** ii.
Tissue culture, characteristics of vesicular stomatitis virus in. Cooper, 1957, **17,** 327.
Tissue cultures, trypsinized, fluorescent antibody studies with herpes simplex virus in unfixed preparation of. O'Dea & Dineen, 1957, **17,** 19.

Titres, ready reckoner for calculation of geometric mean Perkins, 1958, **19,** 540.
Tobacco leaves, virus-inactivating system from. Bawden & Pirie, 1957, **16,** 696.
Tobacco mosaic virus, activity of fragmented and reassembled. Bawden & Pirie, 1957, **17,** 80.
Tobacco mosaic virus by the gel diffusion precipitin tests, a preliminary study of. Kleczkowski, 1957, **16,** 405.
Tobacco mosaic virus, reversible changes in strains of, from leguminous plants. Bawden, 1958, **18,** 751.
Tobacco necrosis virus strains, serology of. Babos & Kassanis, 1963, **32,** 135.
Tomato black ring, beet ringspot, potato bouquet viruses, relationship between. Harrison, 1958, **18,** 450.
Torulopsis castellii, a new species of yeast. Capriotti, 1961, **26,** 41.
Torulopsis ingeniosa n.sp., from grass leaves. di Menna, 1958, **19,** 581.
*Toxic action of adenovirus. Pereira & Kelly, 1958, **18,** viii.
Toxic marine flagellates; their occurrence and physiological effects on animals. Ballantine & Abbott, 1957, **16,** 274.
Toxicity, of solanine and related alkaloids to *Fusarium caeruleum*. McKee, 1959, **20,** 686.
Toxin and coproporphyrin, effect of cobaltous ions on the formation by *Corynebacterium diphtheriae*. Clarke, 1958, **18,** 708.
Toxin and porphyrin, effect of ferrous ions on the formation by *Corynebacterium diphtheriae*. Clarke, 1958, **18,** 698.
Toxin, anthrax, factors I and III. Stanley & Smith, 1961, **26,** 49.
Toxin, anthrax, production *in vitro* of, previously recognized *in vivo*. Harris-Smith, Smith & Keppie, 1957, **16,** viii.
Toxin, anthrax, purification of factors I and II. Stanley, Sargeant & Smith, 1960, **22,** 206.
Toxin, anthrax, serological relationships with factors I and II. Stanley, Sargeant & Smith, 1960, **22,** 219.
Toxin, diphtheria, kinetics of formation. Pappenheimer, Miller & Yoneda, 1962, **28,** 531.
Toxin, endo, interaction with cationic macromolecules. Mora & Young, 1961, **26,** 81.
Toxin, fixation of tetanus by ganglioside. van Heyningen & Miller, 1961, **24,** 107.
Toxin from *Prymnesium parvum*. Yariv & Hestrin, 1961, **24,** 165.
Toxin-inactivating substance excreted by *Penicillium cyaneo-fulvum*, studies. Rose & Martin, 1959, **20,** 451.
Toxin, isolation and composition of staphylococcal α. Bernheimer & Schwartz, 1963, **30,** 455.
Toxin, of *Bacillus anthracis*, production *in vitro*. Harris-Smith, Smith & Keppie, 1958, **19,** 91.
Toxin production and growth of *Corynebacterium diphtheriae* in submerged culture. Edwards, 1960, **22,** 698.
Toxin production and phage multiplication in *Corynebacterium diphtheriae*. Barksdale, 1958, **18,** x.
Toxin, purification of factor III of anthrax. Smith & Stanley, 1962, **29,** 517.
Toxin, tetanus, action in frogs. Rowson, 1961, **25,** 315.
Toxin, tetanus, chemical assay of receptor in nervous tissue. van Heyningen, 1959, **20,** 301.
Toxin, tetanus, effect on frequency of miniature end-plate potentials. Feigen, Peterson, Hofmann, Genther & van Heyningen, 1963, **33,** 489.
Toxin, tetanus, fixation by nervous tissue. van Heyningen, 1959, **20,** 291.
Toxin, tetanus, tentative identification of receptor in nervous tissue. van Heyningen, 1959, **20,** 310.
Toxins, bacterial, fatal effect on mice pre-infected with mouse hepatitis virus (MHV1). Gledhill, 1958, **18,** xvii.
Trace elements, utilization of, by marine unicellular algae. Spencer, 1957, **16,** 282.
Transaminase of *Trigonopsis variabilis*. SentheShanmuganathan & Nickerson, 1962, **27,** 465.
Transaminases in uredospores of *Puccinia helianthi*. Smith, 1963, **30,** 35.
Transduction between histidine-requiring Salmonella mutants, structure mapping. Hartman, Loper & Šerman, 1960, **22,** 323.
Transduction, effect on *Salmonella typhimurium* cells. Hubáček, 1963, **33,** 205.
Transduction in a strain of *Pseudomonas aeruginosa*. Loutit, 1958, **18,** 315.
Transduction of histidine-requiring Salmonella mutants, complementation mapping. Hartman, Hartman & Šerman, 1960, **22,** 354.
Transduction of phages for *Bacillus subtilis*. Takahashi, 1963, **31,** 211.
Transduction of streptomycin resistance in *Salmonella typhimurium*. Watanabe & Watanabe, 1959, **21,** 16.
Transduction of streptomycin sensitivity into resistant mutants of *Salmonella typhimurium*. Watanabe & Watanabe, 1959, **21,** 30.
Transduction of swarming in *Proteus mirabilis*. Coetzee, 1963, **33,** 1.
Transduction, reversion of antigenic characters in *Salmonella typhimurium*. Spicer & Datta, 1959, **20,** 136.
Transformability of *Haemophilus influenzae*. Stuy, 1962, **29,** 537.
Transformations, structural, of *Halobacterium salinarium*. Mohr & Larsen, 1963, **31,** 267.
Translocation of dicarboxylic acids across the osmotic barrier, component of the plasma membrane. Mitchell & Moyle, 1959, **21,** iii.
Transmission, unilinear, of motility and its material basis in Salmonella. Quadling, 1958, **18,** 227.
Transport, metabolism, which drives which? Mitchell, 1962, **29,** 25.
Tricarboxylic acid cycle intermediates, oxidation by *Corynebacterium erythrogenes*. Tucker, 1960, **23,** 267.
Tricarboxylic acid cycle intermediates, permeases for. Clarke & Meadow, 1959, **20,** 144.
Tricarboxylic acid cycle, utilization by yeasts. Barnett, 1960, **23,** 65.
Trichophyta, pigments of. McCabe & Mier, 1960, **23,** 1.
Trichophyton mentagrophytes in increased carbon dioxide tensions. Chin & Knight, 1957, **16,** 642.
Trichophyton mentagrophytes, metabolism and CO_2. Chin & Knight, 1963, **30,** 113.
Trichophyton mentagrophytes, morphological response to methionine. Klein, 1963, **31,** 91.
Trichophyton mentagrophytes, stimulation of glucose metabolism in increased CO_2. Chin & Knight, 1963, **30,** 121.

Trichophyton rubrum, action of 11-deoxycorticosterone on. Chattaway, Townsley & Barlow, 1963, **30,** 261.
Trichophyton rubrum, growth effected by steroids. Chattaway, Townsley & Barlow, 1962, **28,** 437.
Trichophyton rubrum, growth of, in increased carbon dioxide tensions. Chin & Knight, 1957, **16,** 642.
Trigonopsis variabilis, composition of cells and cell walls. SentheShanmuganathan & Nickerson, 1962, **27,** 451.
Trigonopsis variabilis, control of cellular form. SentheShanmuganathan and Nickerson, 1962, **27,** 437.
Trigonopsis variabilis, D-amino acid oxidase of. SentheShanmuganathan & Nickerson, 1962, **27,** 465.
Trigonopsis variabilis, transaminase of. SentheShanmuganathan & Nickerson, 1962, **27,** 465.
Triphenylmethane dyes and the inhibition of glutamine synthesis by *Staphylococcus aureus*. Fry, 1957, **16,** 341.
Trypanosoma brucei, antigens of. Weitz, 1960, **23,** 589.
Trypanosoma cruzi, stearic acid a growth factor for. Boné & Parent, 1963, **31,** 261.
Trypanosoma lewisi, formation of antibody and cytoplasmic inclusions. Ormerod, 1959, **21,** 287.
Trypanosomal antigens by immunofluorescence. Weitz, 1963, **32,** 145.
Trypanosomes, cytoplasmic inclusions (volutin granules) in different species. Ormerod, 1958, **19,** 271.
Trypanosomid flagellate, action of antrycide on nucleic acid synthesis. Newton, 1958, **19,** ii.
Tryptophan-dependent bacteriophage, conditions governing adsorption. Fildes & Kay, 1963, **30,** 183.
Tryptophan-dependent bacteriophages. Kay & Fildes, 1962, **27,** 143.
Tryptophan, effect of amino acid on uptake by *Neurospora crassa*. Panicker, Shanmugasundaram & Acharya, 1962, **28,** 409.
Tryptophan synthetase, mutational alteration in *Escherichia coli*. Gibson, Gibson & Yanofsky, 1961, **24,** 301.
Turbidity, changes in suspensions of Gram-positive bacteria in relation to osmotic pressure. Kuczynski-Halmann, Avi-Dor & Mager, 1958, **18,** 364.
Typing, serological, of *Bacillus megaterium*. Baumann-Grace & Tomcsik, 1957, **17,** 227.
Tyrosine, transfer, by recombination in coli strains. Furness, 1958, **18,** 782.

Ultraviolet-induced reversion from auxotrophy in *Escherichia coli*. Hill, 1963, **30,** 281.
Ultraviolet-induced reversions from auxotrophy in *Escherichia coli*, stability of. Hill, 1963, **30,** 289.
Ultraviolet-irradiated and active Rift Valley fever virus, interference between. Naudé & Polson, 1957, **16,** 491.
Ultraviolet radiation on the pathogenicity of *Botrytis fabae*, *Uromyces fabae* and *Erysiphe graminis*, effects of. Buxton, Last & Nour, 1957, **16,** 764.
Urease, distribution in *Clostridium perfringens* types. Brooks, 1961, **26,** 231.
*Urease in *Corynebacterium renale*, pathogenic significance of. Lister, 1957, **16,** ix.
Uredospores of *Puccinia helianthi*, transamination reactions in. Smith, 1963, **30,** 35.
Uric acid, aerobic breakdown of, by certain pseudomonads. Bachrach, 1957, **17,** 1.
Uric acid and blue-green algae. van Baalen & Marler, 1963, **32,** 457.
Uridine diphosphoglucose, biosynthesis of a disaccharide from. Smith & Mills, 1963, **33,** 255.
Uridine pyrophosphoglucose dehydrogenase in pneumococcus type I. Smith, Mills, Austrian & Bernheimer, 1960, **22,** 265.
Uridine pyrophosphoglycosyl metabolism of capsulated and non-capsulated pneumococci, a comparison of. Smith, Mills & Harper, 1957, **16,** 426.
Uridine pyrophosphoglycosyl metabolism, study of some enzymes in extracts of a non-capsulated strain of pneumococcus concerned with. Smith *et al.*, 1959, **20,** 654.
Uromyces fabae, effects of ultraviolet radiation on the pathogenicity of. Buxton, Last & Nour, 1957, **16,** 764.

Vaccinia and cowpox viruses, infectivity of purified and partially purified preparations. Kaplan & Valentine, 1959, **20,** 612.
Valine carboxyl group as a source of active formate in *Aerobacter aerogenes*. Webb, 1958, **18,** xiv.
Variants, Gram-positive, production of, by *Azotobacter chroococcum*. Bisset *et al.*, 1957, **16,** 572.
Variants, rough, of *Bacillus anthracis*. Meynell, 1963, **32,** 55.
Variation, antigenic, in *Vibrio cholerae*, study of. Bhaskaran & Gorrill, 1957, **16,** 721.
Variation, geographical, in bacteriophage sensitivity. Spencer, 1957, **17,** xi.
'Vegetative hybridization' in Streptomyces. Bradley, 1958, **18,** 591.
Ventricillium albo-atrum, ultraviolet irradiation-induced mutants. Buxton & Hastie, 1962, **28,** 625.
Venturia inaequalis, inhibition of sporulation. Kirkham & Flood, 1963, **32,** 123.
Venturia inaequalis, relationships between cultural characters and pathogenicity in. Kirkham, 1957, **16,** 360.
Venturia inaequalis, significance of polyphenolic metabolites of apple and pear in the host relations of. Kirkham, 1957, **17,** 491.
Venturia inaequalis, studies of the significance of polyphenolic host metabolites in the nutrition of. Kirkham, 1957, **17,** 120.
Venturia pirina, relationships between cultural characters and pathogenicity in. Kirkham, 1957, **16,** 360.
Venturia pirina, significance of polyphenolic metabolites of apple and pear in the host relations of. Kirkham, 1957, **17,** 491.
Venturia pirina, studies of the significance of polyphenolic host metabolites in the nutrition of. Kirkham, 1957, **17,** 120.
Verticillium albo-atrum, genetic recombination in. Hastie, 1962, **27,** 373.
Vesicular stomatitis virus growth-curves in tissue culture. Cooper, 1957, **17,** 327.
Vesicular stomatitis virus, osmotic barrier for inorganic phosphate in chick embryo cells and its stability during the latent and release periods of infection by. Cooper, 1957, **17,** 353.
Vesicular stomatitis virus, paths of phosphate transfer in normal chick embryo cells and in cells infected with. Cooper, 1957, **17,** 335.
Viability and heat resistance of bacterial spores. Marshall, Murrell & Scott, 1963, **31,** 451.
Viability of dried bacterial cultures, effect of rehydration on. Leach & Scott, 1959, **21,** 295.
Viable counting of *Mycobacterium tuberculosis* in a silica gel medium. Selkon & Mitchison, 1957, **16,** 229.

Vibrio, a new sulphate-reducing. Adams & Postgate, 1959, **20,** 252.
Vibrio anguillarum, disease of finnock. Smith, 1961, **24,** 247.
Vibrio, cell-free extracts, in oxidation of homogentisic acid. Chapman & Dagley, 1962, **28,** 251.
Vibrio cholerae and water vibrios, toxic proteins from. Jenkin & Rowley, 1959, **21,** 191.
Vibrio cholerae cultures, stimulation of production of neuraminidase by *N*-acetylneuraminic acid. French & Ada, 1959, **21,** 550.
Vibrio cholerae, genetic recombination. Bhaskaran, 1958, **19,** 71.
Vibrio cholerae*, isolation of a toxic protein from. Jenkin, 1959, **21, v.
Vibrio cholerae, properties of crystalline neuraminidase. Pye & Curtain, 1961, **24,** 423.
Vibrio cholerae, purification and properties of neuraminidase. Ada, French & Lind, 1961, **24,** 409.
Vibrio cholerae, stimulation of the production of neuraminidase by *N*-acetylmannosamine. Ada & French, 1959, **21,** 561.
Vibrio cholerae, strain 162, recombination in mutant stocks. Bhaskaran, 1960, **23,** 47.
Vibrio cholerae, study of antigenic variation in. Bhaskaran & Gorrill, 1957, **16,** 721.
Vibrio comma, streptomycin-dependent, investigation on streptomycin inhibitors with. Olitzki & Godinger, 1959, **20,** 54.
Vibrio costicolus, lysis by osmotic shock. Christian & Ingram, 1959, **20,** 32.
Vibrio fetus, sensitivity to streptomycin and the emergence of resistant mutants. Morgan, 1958, **19,** 517.
Vibrio flagella, electron microscope study. Follett & Gordon, 1963, **32,** 235.
Vibrio, taxonomy of. Davis & Park, 1962, **27,** 101.
Vi-phage typing scheme for *Salmonella typhi*. Bernstein & Wilson, 1963, **32,** 349.
Virolysin in phage-infected staphylococci. Ralston, Baer, Lieberman & Krueger, 1961, **24,** 313.
Virulence-determining factors, effect of metabolite analogues on growth of *Bacillus anthracis* in the guinea pig and on the formation of. Tempest & Smith, 1957, **17,** 739.
Virulence, intracerebral, of *Bordetella pertussis* in mice. Brown, 1959, **20,** 532.
Virulence, production of, in an avirulent strain of *Mycobacterium tuberculosis* by certain non-ionic surface-active agents. Hart & Rees, 1957, **16,** vii.
Virus, *see also* Symposium **9.**
Virus, cell-wall constituents of rickettsiae and psittacosis-lymphogranuloma. Perkins & Allison, 1963, **30,** 469.
Virus, cucumber mosaic, inactivation by polyphenols and metals. Pierpoint & Harrison, 1963, **32,** 429.
Virus, cucumber mosaic, instability and polyphenoloxidase. Harrison & Pierpoint, 1963, **32,** 417.
Virus, cytopathogenic bovine orphan. Kipps, Turner & Polson, 1961, **26,** 405.
Virus, cytopathogenic bovine orphan, neutralization by Francis type inhibitor. Turner, Kipps, Polson & van den Ende, 1961, **26,** 415.
Virus dependent on another for its multiplication. Kassanis, 1962, **27,** 477.
Virus, encephalitis, action of phospholipase A and lipid solvents. Anderson & Ada, 1961, **25,** 451.
Virus, encephalomyocarditis, intracellular sites of synthesis in ascites tumour cells. Bellett & Burness, 1963, **30,** 131.
Virus, enteroviruses, effect of cystine on. Pohjanpelto, 1959, **21,** vii.
Virus, enzyme levels in mice infected with. Mahy, Parr & Rowson, 1963, **32,** i.
Virus, foamy, in monkeys. Plummer, 1962, **29,** 703.
Virus, foot-and-mouth disease, application of detergents. Cartwright & Thorne, 1959, **20,** 61.
Virus, foot-and-mouth disease, complement-fixation studies. Bradish & Brooksby, 1960, **22,** 405.
Virus, foot-and-mouth disease, complement-fixation test. Bradish, Brooksby & Tsubahara, 1960, **22,** 392.
Virus, foot-and-mouth disease, concentration and electron microscopy of characteristic particle. Bradish, Henderson & Kirkham, 1960, **22,** 379.
Virus, foot-and-mouth disease in culture, multiplication of. Cartwright, Pay & Henderson, 1957, **16,** 730.
Virus, foot-and-mouth disease, inactivation of. Brown, Cartwright & Stewart, 1963, **31,** 179.
Virus, foot-and-mouth disease, interferon in infection with. Philipson & Dinter, 1963, **32,** 277.
Virus, foot-and-mouth disease, ultracentrifugation in caesium chloride. Trautman & Breese, 1962, **27,** 231.
Virus, foot-and-mouth, influence of proflavine on synthesis. Brown & Stewart, 1960, **23,** 369.
Virus, fowl plague, formation of incomplete forms. Rott & Scholtissek, 1963, **33,** 303.
Virus haemagglutinins and cell receptors, stability of. Buckland & Tyrrell, 1963, **32,** 241.
Virus, herpes, electron microscope studies of HeLa cells infected with. Stoker, Smith & Ross, 1958, **19,** 244.
Virus, herpes, from solitary HeLa cells. Wildy, Stoker & Ross, 1959, **20,** 105.
Virus, herpes, growth in HeLa cells. Stoker & Ross, 1958, **19,** 250.
Virus, herpes simplex; adsorption, penetration and eclipse in chorio-allantois. Watkins, 1960, **22,** 40.
Virus, herpes simplex, early stages of infection of HeLa cells with. Watkins, 1960, **22,** 57.
Virus, herpes simplex, fluorescent antibody studies with. O'Dea & Dineen, 1957, **17,** 19.
Virus-inactivating system from tobacco leaves. Bawden & Pirie, 1957, **16,** 696.
Virus, inclusion blennorrhoea, complement-fixing antigens. Reeve & Taverne, 1962, **27,** 501.
Virus, inclusion blennorrhoea, growth in HeLa cells. Furness & Fraser, 1962, **27,** 299.
Virus, inclusion blennorrhoea, neutralization test for. Reeve & Graham, 1962, **27,** 177.
Virus, inclusion blennorrhoea, replication in HeLa cell monolayers. Furness, Henderson, Csonka & Fraser, 1962, **28,** 571.
Virus, inclusion blennorrhoea, titration in cell culture. Furness, Graham & Reeve, 1960, **23,** 613.
Virus, infections in thymectomized animals. Denys, Leyten, Vandeputte & De Somer, 1963, **32,** ii.
Virus, influenza, biological and physical properties of filamentous strain. Ada, Perry & Abbot, 1958, **19,** 23.
Virus, influenza, effect of infecting the cells of the deembryonated egg. Mills, 1958, **19,** 473.

Virus, influenza, filamentous nucleic acid. Ada & Perry, 1958, **19,** 40.
Virus, influenza, filaments, staining of. Lindenmann, 1957, **16,** 759.
Virus, influenza, genetic analysis of the development of serum resistance in. Edney, 1957, **17,** 25.
Virus, influenza, haemagglutination of a model of specific receptor adsorption. Belyavin, 1963, **32,** 15.
Virus, influenza haemagglutinin inhibition by mucoproteins. Gottschalk & Fazekas de St Groth, 1960, **22,** 690.
*Virus, influenza, increments of virulence during successive cycles of double infection. Fraser, 1959, **21,** viii.
Virus, influenza, inhibition and tetanus toxin fixation by ganglioside. Bernheimer & van Heyningen, 1961, **24,** 121.
Virus, influenza, particles by haemagglutination and electron microscopy, assay of. Tyrrell & Valentine, 1957, **16,** 668.
Virus, influenza, the structure of filaments and spheres of. Valentine & Isaacs, 1957, **16,** 195.
Virus, lymphogranuloma venereum, replication in HeLa cell monolayers. Furness & Csonka, 1963, **31,** 161.
Virus, mouse hepatitis, fatal effect of some bacterial toxins on mice pre-infected with. Gledhill, 1958, **18,** xvii.
Virus, Murray Valley encephalitis, properties. Ada, Abbot, Anderson & Collins, 1962, **29,** 165.
Virus, Murray Valley encephalitis, purification of. Ada, Anderson & Abbot, 1961, **24,** 177.
Virus, plant, tobacco necrosis, activation of one by another. Kassanis & Nixon, 1961, **25,** 459.
Virus, polio, mutants with altered responses to cystine. Dubes & Chapin, 1958, **18,** 320.
Virus, polio, relations of hydrogen bonding to growth. Cooper, 1962, **28,** i.
Virus, poliomyelitis, effect of environment in tissue culture. Furness, 1961, **25,** 421.
Virus, poliomyelitis, neutralizing action of saliva and gastric juice. Szöllösy & Balázs, 1963, **31,** x.
Virus, pox, purification by density gradient. Zwartouw, Westwood & Appleyard, 1962, **29,** 523.
Virus, properties of an inhibitor from leaves of raspberry. Cadman, 1959, **20,** 113.
Virus, purification and concentration of soluble antigens on calcium phosphate. Taverne, Marshall & Fulton, 1958, **19,** 451.
Virus, rabies, characterization of soluble antigens. Mead, 1962, **27,** 415.
Virus, rabies, purification of soluble antigens. Mead, 1962, **27,** 397.
Virus, rat polyoma, virus cell relation in tumours. Vandeputte & De Somer, 1962, **29,** 105.
Virus, Rift Valley fever, interference between active and ultraviolet-irradiated. Naudé & Polson, 1957, **16,** 491.
Virus, Rous, observations on the fine structure of. Epstein, 1958, **18,** vii.
Virus, Rous sarcoma, effects of 5-fluoro-uracil on infection *in vitro*. Fairman, 1959, **20,** ii.
Virus, smallpox, diagnosis by tissue culture. Dekking, 1963, **31,** xii.
Virus, sparing action against ectromelia of sera from mice treated with mouse hepatitis virus. Gledhill, 1959, **21,** vi.
Virus, the concept of. Lwoff, 1957, **17,** 239.
Virus, *Tipula*, iridescent, developmental stages. Smith & Hills, 1959, **21,** ix.
Virus, tissue culture aiding diagnosis of smallpox and other diseases of the skin. Dekking, 1963, **31,** xii.
Virus, tobacco mosaic, activity of fragmented and reassembled. Bawden & Pirie, 1957, **17,** 80.
Virus, tobacco mosaic, early infection and nucleic acid. Kassanis, 1959, **20,** 704.
Virus, tobacco mosaic, infectivity and inactivation of nucleic acid preparations from. Bawden & Pirie, 1959, **21,** 438.
Virus, tobacco mosaic, reversible changes in strains of, from leguminous plants. Bawden, 1958, **18,** 751.
Virus, tobacco mosaic, study of, by the gel diffusion precipitin tests. Kleczkowski, 1957, **16,** 405.
Virus, tobacco necrosis, mixtures with satellite virus. Kassanis, 1962, **27,** 477.
Virus, tobacco necrosis, serology of. Babos & Kassanis, 1963, **32,** 135.
Virus, tobacco rattle, properties of infective preparations prepared with phenol. Harrison & Nixon, 1959, **21,** 591.
Virus, tobacco rattle, separation and properties of particles. Harrison & Nixon, 1959, **21,** 569.
Virus, tobacco rattle, structure of particles in electron miscrocope. Harrison & Nixon, 1959, **21,** 582.
Virus, trachoma, complement-fixing antigens. Reeve & Taverne, 1962, **27,** 501.
Virus, trachoma, infection of mice with strain TE55. Watkins & Mackenzie, 1963, **30,** 43.
Virus, trachoma, neutralization test for. Reeve & Graham, 1962, **27,** 177.
Virus, trachoma, sensitivity to oxytetracycline. Watkins, 1961, **26,** 427.
Virus, trachoma, structure and replication in cell cultures. Armstrong, Valentine & Fildes, 1963, **30,** 59.
Virus, trachoma, titration in cell culture. Furness, Graham & Reeve, 1960, **23,** 613.
Virus, trachoma, titration of in yolk-sac by single dilution method. Watkins, 1961, **26,** 427.
Virus, vaccinia and cowpox, infectivity of purified and partially purified preparations. Kaplan & Valentine, 1959, **20,** 612.
Virus, vaccinia, a simple plaque method for titration. Postlethwaite, 1959, **21,** vii.
Virus, vaccinia, effect of cations, pH, and heat on inactivation of. Kaplan, 1963, **31,** 311.
Virus, vaccinia, heat inactivation of. Kaplan, 1958, **18,** 58.
Virus, vaccinia, replication in monkey kidney cell cultures. Furness & Younger, 1959, **21,** viii.
Virus, van den Ende strain. Kipps, Turner & Polson, 1961, **26,** 405.
Virus, vesicular stomatitis, changes in cellular ribonucleic acid in chick cell culture. Turco, 1959, **21,** 510.
Virus, vesicular stomatitis, growth-curves in tissue culture. Cooper, 1957, **17,** 327.
Virus, vesicular stomatitis, homotypic non-exclusion in chick cell culture. Cooper, 1958, **19,** 350.
Virus, vesicular stomatitis, in chick cell culture, 'shortened latency' as a result of multiple infection. Cooper, 1958, **19,** 340.
Virus, vesicular stomatitis, osmotic barrier for inorganic phosphate in chick embryo cells and its stability during the latent and release periods of infection by. Cooper, 1957, **17,** 353.

Virus, vesicular stomatitis, paths of phosphate transfer in normal chick embryo cells and in cells infected with. Cooper, 1957, **17,** 335.
Virus, vesicular stomatitis, properties of the transmissible interfering component. Bellett & Cooper, 1959, **21,** 498.
Virus, vesicular stomatitis, transmissible interfering component. Cooper & Bellett, 1959, **21,** 485.
Virus, wound tumour, physical and chemical properties. Black, Hills & Markham, 1962, **28,** i.
Viruses of the Newcastle disease–mumps–influenza (Myxovirus) group, structure of. Valentine & Isaacs, 1957, **16,** 680.
Viruses, nucleic acid contents of. Allison & Burke, 1962, **27,** 181.
Viruses, relationship between beet ringspot, potato bouquet and tomato black ring viruses. Harrison, 1958, **18,** 450.
Viruses, RNA, nucleotide composition of. Cocito, Laduron & De Somer, 1963, **32,** iii.
Vitamin B_6, assay, with *Saccharomyces carlsbergensis* 4228. Morris, Hughes & Mulder, 1959, **20,** 566.
Vitamin B_6 in the synthesis of methionine by *Escherichia coli*. Wijesundera, Cross & Woods, 1960, **22,** 786.
Vitamin B_6, serine and glycine, inter-relationships, in the growth of mutants of *Escherichia coli*. Morris & Woods, 1959, **20,** 576.
Vitamin B_6, synthesis, by some mutant strains of *Escherichia coli*. Morris, 1959, **20,** 597.
Vitamin, B_{12}, growth of the flagellate *Ochromonas malhamensis*. Ford, 1958, **19,** 161.
Vitamin B_{12}, influence of certain derivatives on growth of micro-organisms. Ford, 1959, **21,** 693.
Vitamin B_{12}, influence on growth rate and cell composition in the flagellate *Ochromonas malhamensis*. Ford & Goulden, 1959, **20,** 267.
Vitamin K, action in bacteria. Lev & Brodie, 1963, **31,** x.
Vitamin K group, growth-promoting activity, and analogues for a rumen strain of *Fusiformis nigrescens*. Lev, 1959, **20,** 697.
Vitamins B_{12} in metabolism of *Prymnesium parvum*. Rahat & Reich, 1963, **31,** 203.
Vitamins B_{12} of *Prymnesium parvum*. Rahat & Reich, 1963, **31,** 195.
Vitamins, requirements of *Lactobacillus* spp. Rogosa, Franklin & Perry, 1961, **25,** 473.
Vitamins, requirements of root nodule bacteria. Graham, 1963, **30,** 245.
Volutin granules, in different species of trypanosomes. Ormerod, 1958, **19,** 271.

Waksmania gen.nov.: a new genus of the Actinomycetales. Lechevalier & Lechevalier, 1957, **17,** 104.
Wanted, a word. Cowan, 1957, **16,** vii.
Water activity and temperature effect on freeze-dried bacterial spores. Marshall, Murrell & Scott, 1963, **31,** 451.
Water content and killing in bacteria. Bateman, Stevens, Mercer & Carstensen, 1962, **29,** 207.
Water, effect on the survival of dried bacteria. Scott, 1958, **19,** 624.
Westerdijk, Johanna; obituary notice. ten Houten, 1963, **32,** 1.
Wool, ammonium alginate, filter for collecting micro-organisms from air. Hammond, 1958, **19,** 267.

Xanthomonas malvacearum, bacteriophage sensitivity and biochemical type in. Hayward, 1963, **33,** viii.
Xanthomonas uredovorus, taxonomic relationships. Hayward & Hodgkiss, 1961, **26,** 133.
X-radiation, stimulation by, of enzyme induction and growth in *Escherichia coli*. Laser & Thornley, 1957, **17,** viii.
X-ray, influence of β-mercaptoethylamine on sensitivity of *Escherichia coli*. Cromroy & Adler, 1962, **28,** 431.
Xylanases of *Fusarium roseum*. Gascoigne & Gascoigne, 1960, **22,** 242.

Yeast, activity and cell-wall permeability. Ebbutt, 1961, **25,** 87.
Yeast, a new species of *Torulopsis*. Capriotti, 1961, **26,** 41.
Yeast cell wall, new aspects of the structure of the. Eddy & Rudin, 1957, **17,** v.
Yeast, effect of *S*-methyl-cysteine on growth. Maw, 1961, **25,** 441.
Yeast, effect of monovalent cations on inhibition of metabolism. Marini, Arnow & Lampen, 1961, **24,** 51.
Yeast, from soils and allied habitats. di Menna, 1959, **20,** 13.
Yeast, *Hansenula wingei*, conjugation in. Brock, 1961, **26,** 487.
Yeast, hydrogen sulphide formation by pantothenate-deficiency. Wainwright, 1962, **28,** v.
Yeast, *Kloeckera brevis*, meso-inositol in growth of. Dawson, White & Freinkel, 1962, **27,** 331.
Yeast, melibiose-fermenting, *Saccharomyces hienipiensis*, unable to assimilate raffinose. Santa Maria, 1962, **28,** 375.
Yeast, production of 5-aminoimidazole. Woodward & Rainbow, 1961, **25,** 141.
Yeast, sodium rich, movement of sodium and cell volume changes in. Kotyk & Kleinzeller, 1959, **20,** 197.
Yeast, uptake of sulphur-containing amino acids by. Maw, 1963, **31,** 247.
Yeasts, a survey of antibiotic powers. MacWilliam, 1959, **21,** 410.
Yeasts, brewers', action of acriflavine. Millbank & Hough, 1961, **25,** 191.
Yeasts, diazotizable amine produced by. Lones, Rainbow & Woodward, 1958, **19,** 146.
Yeasts from Antarctica. di Menna, 1960, **23,** 295.
Yeasts from soil and leaves, antibiotic relationships of. di Menna, 1962, **27,** 249.
Yeasts from soil, isolation of. di Menna, 1957, **17,** 678.
Yeasts from the bovine caecum. van Uden & Carmo Sousa, 1957, **16,** 385.
Yeasts from the bovine rumen. Clarke & di Menna, 1961, **25,** 113.
Yeasts, intestinal flora, of horses, sheep, goats and swine. van Uden, Carmo Sousa & Farinha, 1958, **19,** 435.
Yeasts, intestinal, in swine. van Uden & Carmo Sousa, 1962, **27,** 35.
Yeasts isolated from the mammalian alimentary tract. Parle, 1957, **17,** 363.
Yeasts, pathogenic, from Pacific Ocean. van Uden & Castelo-Branco, 1961, **26,** 141.

Yeasts, two new species from New Zealand. di Menna, 1958, **18,** 269.
Yeasts, utilization, of acids of tricarboxylic acid cycle. Barnett, 1960, **23,** 65.

Zinc-deficient *Nocardia opaca*, metabolism of. Webley, Duff & Anderson, 1962, **29,** 179.
Zinc, manganese and iron, deficiencies in growth of *Nocardia opaca*. Webley, 1960, **23,** 87.
Zygorrhynchus moelleri, metabolic significance of the citric acid cycle in the growth of the fungus. Moses, 1957, **16,** 534.
Zygorrhynchus spp., nutritional studies. Fothergill & Jones, 1958, **19,** 298.
Zygospore formation in *Rhizopus sexualis*. Hepden & Hawker, 1961, **24,** 155.
Zygote formation in *Escherichia coli*. Bernstein, 1958, **18,** viii.
Zygote, lethal, produced by crossing non-colicinogenic with colicinogenic bacteria. Ben-Gurion, 1963, **30,** 173.
